

Please read carefully: King's Daughters Medical Center ("KDMC," "we" or "us") will offer a series of vaccinations during the course of the 2020-2021 school year. The vaccinations to be offered protect against the following conditions:

1. Tetanus-Diphtheria-Pertussis ("TDAP") – Tetanus, diphtheria and pertussis are bacterial diseases that cause muscle pain, difficulty breathing, vomiting and a host of other symptoms, and can lead to serious health problems including but not limited to lockjaw, paralysis, heart failure and death. The TDAP vaccine is typically given in 1 dose (by shot). Potential side effects include but are not limited to soreness at the injection site, fever, headache, rash, body-aches or nausea.
2. Varicella ("Chickenpox") – Chickenpox is a very contagious disease that causes a blister-like rash, itching, tiredness, and fever. The Chickenpox vaccine is typically administered in 2 doses (each a shot). Potential side effects include but are not limited to soreness or swelling at the injection site, fever, mild rash, seizure or pneumonia.
3. Meningococcal ("Meningitis") – Meningitis is a serious bacterial illness, which can lead to infection of the lining of the brain and spinal cord and infections of the blood. The Meningitis vaccine is typically administered in 2 doses (each a shot). Potential side effects include but are not limited to redness or soreness at the injection site or mild fever.
4. Hepatitis A is a highly contagious liver infection caused by the hepatitis A virus. The virus is one of several types of hepatitis viruses that cause inflammation and affect your liver's ability to function. The hepatitis A vaccine is given as two shots, six months apart. The most common side effects are usually mild and last 1 or 2 days. They include the following: sore arm from the shot, headache, tiredness, fever, loss of appetite.
5. Genital human papillomavirus ("HPV") is the most common sexually transmitted virus in the United States. Most HPV infections don't cause any symptoms, and go away on their own; however, HPV can cause cervical cancer in women. HPV is also associated with several less common cancers, such as vaginal and vulvar cancers in women, and anal and oropharyngeal (back of the throat, including base of tongue and tonsils) cancers in both men and women. HPV can also cause genital warts and warts in the throat. The HPV vaccine can prevent most cases of cervical cancer in females, if it is given before exposure to the virus. In addition, it can prevent vaginal and vulvar cancer in females, and genital warts and anal cancer in both males and females.

In order to receive a vaccination for any of the above conditions, student's parent/legal guardian must complete this Vaccination Consent Form in addition to a separate Consent for Services form on file at school, both completed and signed by student's parent or legal guardian.

Please complete this form and indicate which vaccinations you wish for student to receive. Please sign below as Parent/Guardian if you give permission to King's Daughters to administer the selected vaccinations to student.

1. STUDENT INFORMATION

Today's date: / /

School district: _____ School location: _____

Student name: _____ Gender: Male Female Date of birth: / /

Is the student in foster care? Yes No

If yes please provide the name of the social worker and the agency: _____

2. MEDICAL QUESTIONNAIRE

Is student taking any medications (over-the-counter or prescription)? Yes No

If yes, please list: _____

Does the student have allergies to food, medications or environmental pollens? Yes No

If yes, please list: _____

Does the student have a moderate or severe illness today? Yes No

Has the student had a severe allergic or other reaction to a previous dose of any of the selected vaccinations? This would include an allergic reaction to the combined vaccination for MMR and Chickenpox known as the "MMRV" vaccination or Hepatitis A vaccine. Yes No

continued on back

Does the student have cancer or a disease that affects the immune system? Yes _____ No

Is the student being treated with drugs that affect the immune system, such as steroids, or receiving cancer treatment with radiation or drugs? Yes No

3. SELECTION OF VACCINATIONS

Using your initials below, please select the vaccinations you wish for student to receive:

TDAP Meningitis Hepatitis A HPV

By my signature below, I certify the following:

- I was provided with, and have read and understand, the vaccine information statements related to the selected vaccinations, and I have also read and understand the description of each selected vaccination contained in this Vaccination Consent Form;
- I was given the opportunity to ask questions about the risks and benefits of the selected vaccinations;
- I have been informed that as a result of the selected vaccinations student may experience some side effects including but not limited to the side effects described on the first page of this Vaccination Consent Form;
- I agree that the information provided herein is true and accurate to the best of my knowledge; and
- I give my consent for student to receive the selected vaccinations (all doses, if applicable).
