

Seventh Grade

In 7th grade, students gain more responsibility and independence. They are challenged and learn to excel in their academics as they develop greater critical thinking skills. Because they are at an age in which they are constantly changing, 7th grade can be a socially challenging year. Students learn to navigate new and changing friendships, and they need much guidance and mentoring in various topics, such as self-esteem and in navigating social media.

7th Grade Academic Schedule

- 8:30-1:05 – core subjects
