

United at Work Health & Well-being presentations

At UnitedHealthcare, our mission is to help people live healthier lives. That's why we offer United at Work, a comprehensive library of health and well-being presentations consisting of over 70 health-related topics. These pre-recorded presentations help to educate members and increase health risk awareness to encourage healthier behaviors throughout a lifetime. From preventive care to chronic illness, nutrition to ergonomics, sleep to behavioral health, we've got you covered. Should you have any questions or need additional materials for any of these featured topics below, please reach out to your Health Engagement Consultant, Nurse, Coordinator or Coach.

United Healthcare

Aging Well	While getting older is a guaranteed part of life, we may take steps toward a higher quality of life at any age. During this presentation, we will define and identify normal effects of aging, and discuss how to minimize the effects of aging.
Back for Health	Often overlooked, it is important to protect your back, as many injuries result from weak back muscles or low back pain. This presentation will review the anatomy of the back and common causes of back pain. We will also discuss preventive strategies for maintaining back health.
Breathing for Better Health	Something as simple as conscious breathing may lead to many health benefits, calming the mind and reducing stress. During this presentation, we will define diaphragmatic breathing and discuss benefits of breathing techniques and its impact on health. We will also review breathing strategies, as well as good breathing practices.
Childhood Obesity	Childhood obesity, a serious problem in the United States today, puts adolescents at risk for poor health. This presentation will highlight the importance of making healthier lifestyle choices and provide tips that may help to improve the state of your family's health. Specifically, we will define childhood obesity, discuss contributing factors, and learn more about how to treat childhood obesity.
Choosing Care	The right care for you and your family may lead to better health outcomes. While we will discuss the importance of having a primary care physician during this presentation, you will also learn about care setting options and when it is appropriate to use each one, as well as tools to help determine the cost of care in different care settings.
Choosing Food for Health	The food that we consume may make a major impact on our health status. This presentation will teach you how to think about food differently and explain why food selection is important. We will also discuss the benefits of incorporating color into your diet.
Complementary and Alternative Medicine	Adjacent to western medicine, this style of care refers to health care practices that traditionally have not been part of conventional medicine. During this presentation, we will review the differences between complementary, alternative, and functional therapies. We will also discuss common CAM practices, detailing how they work, medical uses and differences amongst them.
Cooking for Better Health	The food that we cook at home may impact our health status. During this presentation, learn about healthier types of fats, different cooking oils and how to use them. We will also review common herbs and spices, as well as their benefits and uses. Finally, learn food safety tips that will help keep you and your family safe in the kitchen.
Coping with Anxiety	Anxiety may be your body's natural response to stress, but how much anxiety is too much? Covering anxiety in depth, this presentation will teach you why you have anxiety and review the signs and symptoms of anxiety. You will also learn how to better handle your anxiety, and how to recognize if you need help.
Coping with Trauma	A traumatic event may happen unexpectedly to anyone, even those most prepared. During this presentation, learn how to manage a traumatic or violent experience and discover when to receive help.
DASH Eating Plan	The DASH eating plan is widely followed by those with hypertension (high blood pressure). This presentation will define and identify health benefits of the DASH eating plan. Additionally, review the recommendations of the DASH eating plan and learn how to incorporate this style of eating into your daily routine.
Dealing with Grief and Loss	Grieving is the emotional process and life adjustment you go through after a loss. Depending on who you are and the nature of your loss, your process of grieving will be different from another person's experience. This presentation covers the stages of grief, ways to manage grief, and understanding grief in children and teens.

Diabetes in Times of Stress	Stress may affect blood sugar in someone with diabetes. This presentation will provide an opportunity for you to examine your stress level, identify your personal sources of stress, and provide you with tips to manage your diabetes during times of heightened stress.
Dietary Guidelines	The Dietary Guidelines provides advice on what to eat and drink to meet nutritional needs and prevent chronic diseases. This presentation focuses on weight management to address the prevention of a broad range of diet-related chronic diseases including Type 2 diabetes, heart disease and some cancers. We will also cover guidelines for achieving a healthier eating pattern.
Digital Eye Strain	Digital Eye Strain, also known as Computer Vision Syndrome, is a newer condition that has been brought upon due to the daily use of technology. During this presentation, we will discuss the signs and symptoms of this condition, review the risk factors, and learn how to manage Digital Eye Strain.
Eating Mediterranean	Following a Mediterranean Diet may be a great way to enjoy many foods while living a healthier lifestyle. This presentation will cover the health benefits associated with the Mediterranean diet and teach you how to adopt Mediterranean eating habits. We will also provide a sample meal plan for this diet.
Eating with Diabetes	People who have diabetes have different nutritional needs than others. During this presentation, we will review the nutritional recommendations for individuals with diabetes or pre-diabetes and discover eating strategies that may help stabilize blood sugar. We will also identify cooking and snacking tips, as well as considerations when dining out for this population.
Ergonomics and You	The environment in which you work may directly impact your posture and risk for injury. This presentation will teach you about ergonomics and musculoskeletal disorders. Specifically, we will define the causes and review the signs and symptoms of musculoskeletal disorders. We will also discuss the risk factors in your work environment and provide possible solutions to workplace hazards.
Essential Workers and Stress	Due to the nature of certain jobs, essential workers are at an increased risk for high stress levels. During this presentation, we will define essential worker stress, review the signs and symptoms of stress, and discuss how to identify personal sources of stress at work and at home.
Everyday Mindfulness	Mindfulness is the ability to be fully present in the moment. This presentation will begin by defining mindfulness, and will review the benefits of mindfulness, as well as different types of practices. We will also discuss how you may incorporate mindfulness into your everyday routine.
Everyday Nutrition	Consuming the right type of food daily is essential for a healthier life; food is fuel. This presentation will define nutrients and how our body uses them, discuss why water is so important for proper functionality, and review the power of fruits and veggies.
Everyday Time Management	Discover strategies for better time management. Topics of discussion include analyzing your time wisely, setting and managing priorities, planning tools, and procrastination. We will also review how to manage external time wasters and the importance of self-care in our busy world.
Exercise Nutrition	Learn how to properly fuel your body with nutrition and understand how the foods you eat, and drink can impact exercise. Discover the benefits of fitness supplementation and explore options for meal planning.
Five Fundamentals of Financial Well-being	Often overlooked, financial health is an essential part of your well-being. During this presentation, we will review the definition of "financial well-being," and explore the signs of money mismanagement. You will also learn about the fundamentals of financial well-being, as well as the negative impact financial stress has on overall health status.
Get Up & Go	Our bodies were made to move, but how it may be challenging to get enough exercise in today's world. The goal of this presentation is to increase your knowledge and awareness of exercising. We will review common facts and myths, benefits and different types of exercise, ways to exercise when time is a limiting factor, getting medical clearance for exercise, and hydration strategies.

Health Insurance 101	Health literacy is an important topic that should be discussed frequently, as many Americans do not understand health insurance terminology. In the Health Insurance 101 presentation, you will learn about different healthcare spending accounts, preventive care guidelines, and where to go when you need care.
Healthy Dental Habits	Regular dental hygiene translates to good health overall. In addition to reviewing the importance of healthy and regular dental habits, we will define common health conditions and diseases associated with poor dental habits, and learn healthier behaviors that may help manage, improve, and prevent poor oral care.
Healthier Eating at Work	With donuts and snack machines around the corner, the typical workplace is not a positive environment for a healthy diet. During this presentation, we will discuss ways to make your meals healthier at work and answer the fast-food question, "To go or not to go". We will also discuss the benefits of packing your meals and provide tips for making healthier fast food-choices.
Healthier Eating at Work (At Home Edition)	Eating at home allows you to control your environment and eating habits more easily. This presentation will cover ways to make your meals while working at home healthier, as there are many benefits to eating at home. Topics include meal prepping tips, avoiding mindless eating, and creating an overall healthier work environment from home.
Healthier Eating on a Budget	It can be difficult to eat well while sticking to a budget. This presentation will teach you the benefits of meal planning, and how to shop for nutritious and cost saving foods all while doubling down on your grocery bill.
Healthier Ways for the Holidays	The most joyous season, or the most stressful, busy and glutenous season? In this presentation, we will review helpful tips that may make your holidays healthier and cover healthier holiday eating. We will also discuss coping mechanisms that may help with holiday-related stress, as well as how to address financial and family stress during the holidays.
Healthy Eating on the Go	Eating on the go is not ideal, but it can be inevitable. Learn how to make healthier eating choices on the go by planning. Discover ways to use convenience stores to your advantage, how to spot healthier fast-food items, and easy ways to sneak in veggies throughout the day.
Healthy Heart	A healthy heart is essential to a healthier life. During this presentation, we will explain the importance of making healthier choices and provide you with ways that may help to improve your heart health. Discussion topics include the functions of the heart, signs and symptoms of a heart attack, and risk factors for developing heart disease, as well as lifestyle factors that may help reduce risk.
Hydration & Healthier Beverages	Water is an essential part of our survival. Not only will we review the importance of water during this presentation, but we will also discuss dehydration, hydration in various food sources, and discover the nutritional information of what we drink.
Know Your Numbers	Knowing your health numbers is an important key to your overall well-being. This presentation provides information on healthy weight, obesity, and body mass index, along with explanations on Type 2 diabetes, blood pressure, cholesterol, and triglycerides. In addition, risk factors associated with heart disease and healthier ways to manage your health numbers are also covered.
Laughter is Medicine	Life is better when you're laughing! This presentation will explain the importance and power of laughter, while providing you with ways to incorporate laughter into your daily life. We will also review the health benefits of laughter.
Living Tobacco Free	Living smoke-free is an opportunity to live a healthier and possibly longer life. During this presentation, we will provide you with information on the risks of smoking, as well as tips and strategies you may use to help quit. Specifically, we will discuss why it is so difficult to quit, as well as the benefits of quitting, and review what to expect while quitting.

Living with Asthma	Although there may be barriers to living with asthma, it is possible to live a healthier life with this condition. During this presentation, we will review the symptoms of asthma, as well as the medications used to treat this disease. We will also discuss ways to prevent and manage asthma.
Maintaining a Healthy Immune System	The immune system is an amazing defense mechanism to outside invaders. Learn about the immune system, such as its components and protective functions. We will also discuss the factors that influence our immune system and review tips to maintain a healthy immune system.
Men's Health	Men have specific health recommendations and disease risks. During this presentation, you will learn facts related to men's health, define the leading cause of death among men, and look at risk factors and barriers to men's health. Finally, we will discuss the types of recommended screenings for men.
Mental Health and Emotional Well-Being	Taking care of your mental health is just as important as taking care of your physical health. This presentation will focus on mental health and emotional well-being. Specifically, we will define mental health and cover interesting facts about emotional well-being. We will also discuss the signs and symptoms of changes in mental health and discuss ways to manage your mental health.
Mindful Eating	Mindful eating may be a helpful tool toward weight maintenance and food appreciation. During this presentation, we will begin by defining mindful eating. Additional topics include how to become aware of physical hunger and anxiety cues, and how to choose food that is pleasing and nourishing.
Opioid Addiction and Drug Misuse	Opioid addiction is a serious health crisis that is impacting people across the country. During this presentation, we will define the different classes of opioids and their effects on the body. You will learn about safe ways to use these drugs, as well as ways to help someone with an addiction and coping mechanisms. Finally, we will discuss prevention methods and how to educate on this topic.
Popular Diets: Myths & Facts	Fad diets come and go, but how do you know what really works for long-term success? During this presentation, you will learn about healthier weight management and diet options and identify common risks of dieting.
Recognizing Burnout	Burnout may impact many individuals in all types of workforces. Not only will we define burnout, but we will review possible causes and warning signs of burnout. In addition, you will learn how to recognize when you need help.
Self-Care: Invest in Yourself	While taking care of those around you, it may be easy to lose sight of yourself. This presentation covers why it is important to invest in your own self-care to help maximize your well-being. Specifically, you will learn the key investments in self-care to address physical, mental, and emotional well-being. We will also define "self-care" and create an action plan to incorporate 1-2 key investments that may help improve your overall well-being.
Sleep for Health	Sleep is an all-encompassing part of your overall well-being, as it directly effects several factors related to your health status. This presentation will review the benefits of adequate sleep and risks due to insufficient sleep. You will also learn how better sleep can improve your health, as well as tips to optimize sleep.
Soothing Stress	Chronic stress may be detrimental to your overall health status. This presentation is designed to help you identify personal sources of stress. It will also teach you how to manage or reduce your everyday stress levels.
Stand for Health	To avoid contracting the "sitting disease," it is important to continue moving throughout the day. This presentation will review the potential risks of a sedentary lifestyle, as well as the potential benefits of being physically active.
Strength for Health – Basics	Strength training is a beneficial part of any physical activity routine. During this presentation, learn the benefits of resistance training and define physical activity recommendations. We will also discuss how to design a strength training program and develop and maintain a routine.

Stretch for Health	It is helpful to include stretching in your regular exercise regimen. During this presentation, you will learn about the benefits of stretching and define the guidelines for safe stretching. Explore the connection between stretching, flexibility and fitness while learning the proper techniques for stretching.
Summertime Health	Summertime safety includes water, sun, and food. During this presentation, we will define these areas and learn the indicators associated with each factor. We will also review the role that water, sun and food play on our bodies, as well as how to incorporate summertime health into your daily routine.
Sun Safety	Safety is an important component to having fun in the sun. During this presentation, the goal is to increase your knowledge and awareness of sun safety. This presentation is designed to educate participants about the harmful effects of the sun and will provide tips and information on what you can do to protect yourself and your family so you may stay safe and enjoy your time outside. Topics will include heat-related illness and skin cancer.
The Power of Positivity and Affirmation	Your attitude and outlook are a choice. During this presentation, we will explain the importance and power of positive thinking and provide you with ways that may help to improve your mental health and emotional well-being.
Understanding Adolescent Mental Health	During this presentation, learn about the unique stages of adolescent mental health. Mental health conditions that may affect adolescents, as well as the risk factors for mental illness among this group will be discussed. Lastly, review how you can help an adolescent with a mental health condition.
Understanding Alcohol Use & Misuse	Alcohol consumption has become a large part of sports events, holiday parties, and weekend gatherings, but when is the dependence of alcohol too much? This presentation will take a closer look at facts to know about alcohol use and misuse, as well as the reasons why people choose to drink. We will also discuss the potential health concerns associated with over drinking and offer resources to seek help.
Understanding Blood Pressure	Understanding blood pressure is an important part of your overall well-being. This presentation will explain why it is important to understand your blood pressure and teach you how to check your blood pressure. You will also learn the signs and symptoms of hypertension and discover healthier behaviors that may help to lower or manage high blood pressure or hypertension.
Understanding Cardiovascular Disease	Cardiovascular disease is the number one leading cause of death in the United States for both men and women. During this presentation we will explain the importance of making healthier choices and provide you with education on how to increase your cardiovascular health. Specifically, we will cover the signs and symptoms of cardiovascular disease, as well as the risk factors for developing heart disease and how to check your risk.
Understanding Colds and Flu	Understanding the cold and flu may be key to treating sickness early. This presentation includes an overview of the common cold and flu symptoms and explores the differences between these two illnesses. Preventive measures, flu vaccination facts, and myths and treatment options are also discussed.
Understanding Diabetes	Although directly related to high blood sugar, diabetes is a complex disease that may lead to other serious health conditions overtime. During this presentation, you will learn about obesity trends and the rise of diabetes in the United States. We will also define diabetes, learn the risk factors for developing diabetes, and discuss healthier behaviors that may help manage diabetes.
Understanding Digestive Health	Digestion is a function your body must perform to live and thrive. However, there are many things that may lead to GI discomfort. This presentation will cover the importance of "gut" health and the anatomy of the digestive system. It will also help participants understand how preventive care may help improve digestive health.
