HELPFUL INFORMATION FOR COURSE SELECTION

As you begin thinking about course selection in IC Portal, there are several pieces of information that should make the process easier for you to complete.

As you progress through the IC Portal, you will be prompted to choose courses. Only those courses that are able to be chosen by you or your student will be visible. The Course Identification sheet and the Program of Study both include a list of all courses offered at Downingtown High School. Please refer to the Program of Study while completing course selection for more detailed descriptions of each course.

In the Program of Study and the IC Portal, course numbers indicate how a class will meet. We have three types of courses:

- **Traditional courses** are those that meet face-to-face every scheduled day. Traditional courses have no letter in their course number.
- **Blended courses** are those that meet both face-to-face AND online. These courses end with a “B.”
- **Cyber courses** are those that meet only online. These courses end with a “C.”
- **Semester courses** are those courses which can be completed fully in one semester. One credit courses will be scheduled for two adjacent periods each day and .5 credit semester courses will be scheduled for one period 6 days per cycle. These courses end with an "S".

For example, Honors English 9 is offered as a traditional course, a blended course, and as a cyber course. In IC Portal, you will see three options: **0011** (traditional), **0011B** (blended), and **0011C** (cyber). Be sure to choose the appropriate version of the course you or your student would like to take.

The Course Identification sheet is organized by department; each block of classes represents one department’s offerings.
