

Mission:

SkillsUSA's mission is to empower its members to become world-class workers, leaders and responsible American citizens.

SkillsUSA is an applied method of instruction for preparing America's high-performance workers in public career and technical programs. It provides quality education experiences for students in leadership, teamwork, citizenship and character development. It builds and reinforces self-confidence, work attitudes and communications skills. It emphasizes total quality at work — high ethical standards, superior work skills, lifelong education, and pride in the dignity of work. SkillsUSA also promotes understanding of the free-enterprise system and involvement in community service.

Employment Potential

The Automotive Technology class is an essential training program for potential workers in the automotive industry. Students are prepared for a wide range of career opportunities, such as working for automotive car dealers, independent auto repair shops, service stations automobile, rental agencies, federal, state and local governments and other organizations.

Nondiscrimination Policy

It is the official policy of the Winston County School System that no person in the system shall, on the grounds of race, color, disability, sex, religion, creed, national origin, or age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program, activity, or employment.

Automotive Technology

Winston County Technical Center
Double Springs, Alabama

Terry Lewis, Instructor
ASE Certified
Master Automobile Technician

Automotive Technology

The automotive technology program prepares students with the basic skills needed to gain employment as maintenance and light repair technicians. Students participate in realistic training that teaches them how automotive repair facilities operate. In addition, they learn industry standards for certification, comprehensive work ethics, and customer service. This program will teach students how to work with their hands, work with others, leadership and decision making skills. The program is also designed to prepare students for entry-level positions as automotive technicians.

Program Admission

Admission to the Automotive Technology program is open to any high school student in the 10th, 11th, and 12th grades who has a sincere desire to become competent in automotive training which will enable them to earn a living in the future. The student's interest, aptitudes, and school record will be considered as a determining factor for admission in the program. Due to limited space and teaching slots, top priority is given to students who have the capacity to schedule and complete the entire sequence of courses in a program of study.

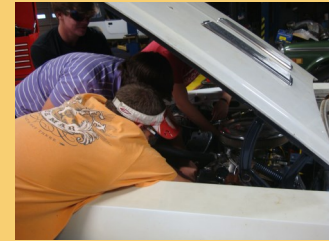

Program Description and Goals

Students enrolled in automotive technology will take a series of courses:

- Transportation, Distribution, and Logistics
- Maintenance and Light Repair A
- Maintenance and Light Repair B
- Maintenance and Light Repair C
- Maintenance and Light Repair D

Upon successful completion students will be able to certify in various ASE student level career readiness indicators such as:

- Engine Repair
- Automatic Transmission/Transaxle
- Manual Drive Train & Axles
- Suspension & Steering
- Brakes
- Electrical/Electronic Systems
- Other additional areas

Cost to Students

A lab fee is necessary for the maintenance of the shop, replacement of equipment, supplies, instructional materials, and servicing costs on equipment. Student organizational (SkillsUSA) dues may be included in the fees because the student organization is an integral part of the instructional program. The fee is \$20 per semester; additional fees may apply at the discretion of the instructor and will be announced at the beginning of each semester.
