ELECTRICAL TECHNOLOGY

**Winston County Technical
Center**

Mr. Danny Snoddy, Instructor

NCCER Curriculum Electrical Technology 1, 2, & 3

These one-credit courses are designed to provide students with the fundamental knowledge and skills for this area of the construction industry. The course emphasizes safety while addressing basic electrical theory, National Electrical Code (NEC), terminology, conductors, circuit construction, basic alternating current, reactive circuit, and troubleshooting circuits.

Career and technical student organizations are integral, co-curricular components of each career and technical education course. These organizations serve as a means to enhance classroom instruction while helping students develop leadership abilities, expand workplace-readiness skills, and broaden opportunities for personal and professional growth.

Danny Snoddy, Instructor

SkillsUSA is a partnership of students, teachers and industry representatives working together to ensure America has a skilled workforce. SkillsUSA helps each student to excel. SkillsUSA is a national organization serving teachers and high school and college students who are preparing for careers in technical, skilled and service occupations, including health occupations and for further education. SkillsUSA was formerly known as VICA (the Vocational Industrial Clubs of America).

SkillsUSA programs also help to establish industry standards for job skill training in the lab and classroom, and promote community service. SkillsUSA is recognized by the U.S. Department of Education and is cited as a “successful model of employer-driven youth development training program” by the U.S. Department of Labor.
