

No matter what your corporate mission, you need a well-educated, highly skilled workforce to carry it out.

The Advanced Math & Science Academy Charter School is a public middle and high school dedicated to inspiring students to become future leaders who will make a difference in industries and companies such as yours.

We provide a tuition-free, college-preparatory education for students from a wide range of backgrounds. AMSA's rigorous and comprehensive curriculum, with an emphasis on Math, Science, and Technology, prepares students for success in cutting-edge fields.

Our graduates excel in top university programs and are becoming the scientists, engineers, programmers, strategists, and visionaries of tomorrow.

Since 2005, we have strived to fulfill our mission to create an atmosphere that celebrates knowledge and creates opportunities for children of all backgrounds and abilities to excel.

We need your support now to put the most current science and technology into our students' hands in earlier grades.

Your participation is essential to our success and will go directly to improving equity in access to science and technology for our diverse student population. Together, we can invest in educational facilities that are learning laboratories.

Be a part of educating the workforce of tomorrow. Contact us today to arrange a tour and hear more about how we can work together.
