

Learn a highly skilled trade, WHILE YOU GET PAID

YOU CAN HAVE IT ALL

GET PAID to learn. Gain a highly employable skill that is always in demand. A career in the electrical construction industry will provide you with high wages, exceptional health insurance benefits, a solid pension, challenging work environments and great advancement opportunities to catapult your career. The average apprentice earns over \$150,000 in wages and benefits WHILE they learn the trade.

How is this possible? It all starts at the best electrical training apprenticeship available from the International Brotherhood of Electrical Workers (IBEW) and the National Electrical Contractors Association (NECA). When you train with the IBEW-NECA, you are investing your future in an industry that is leading the way to our energy demands.

Rather than going into debt for years, only to just begin searching for your career opportunities; invest now and get immediate results.

Your opportunity is knocking now. Are you ready to make the most of it?

TYPES OF WORK

Our trained Journeyworker Inside Wireman perform installation and maintenance for commercial office buildings and all complexes, including petrochemical, pulp and paper plants, oil refineries, power houses, retail stores, hospitals, and manufacturing plants. Types of work include:

- Electrical Power and Lighting Systems
- Power Distribution and Metering Systems
- Motor Control and Programmable Logic Controllers (PLCs)
- Building Automation Systems
- Energy Management Systems
- Packaging Systems, Manufacturing Systems, Refining Systems
- Backup Power Generation Systems
- Uninterruptible Power Supply Systems

SET FOR LIFE.

After going through the IBEW-NECA program, you'll be trained in all aspects of the electrical trade, reaping the benefits of a job that pays well, is always challenging and that offers the security of long-term employment with a comfortable retirement.

PROGRAM DETAILS

5-year Systematic Program of Learning
Apprentices can obtain all essential knowledge and skills necessary for becoming a Journeyworker Inside Wireman.

8,000 Hours of On-the-Job Training
Apprentices train to proficiency in installation, maintenance and troubleshooting of various electrical systems on commercials and industrial job sites.

900 Hours of Related Study (minimum)
Apprentices will study theories relating to all job tasks important to the trade. Classroom time incorporates the latest technology of blended learning, combining hands-on training with online, instructional lessons to reinforce concepts taught by the instructors.
