INFORMATION PERTAINING TO MEDICAL DOCUMENTATION:

In the context of assessing an accommodation request, medical documentation may be needed. Medical documentation is often needed to determine if an employee has a disability covered by the ADA and is entitled to an accommodation (i.e., has a permanent disability, as distinguished from temporary disability, that substantially limits one or more major life activities, affects the employee's ability to perform essential job functions, and is of sufficient severity) and if so, to help identify an effective accommodation.

Generally, in the context of an accommodation, medical inquiries related to an employee's disability and functional limitations are permissible and may include consultations with knowledgeable professional sources, such as doctors, occupational and physical therapists, rehabilitation specialists, and organizations with expertise in adaptations for specific disabilities. The Business Services/Risk Management is the Districts Department charged with collecting medical documentation. In the event that medical documentation is required, the employee will be provided with the appropriate forms to submit to their medical provider. The employee has the responsibility to ensure that the medical provider follows through on requests for medical information.
