Administrative Regulation: Enrollment In An Advanced Course Or Program And Challenging Curriculum

The Coventry Board of Education (the “Board”) understands the importance of providing opportunities for students to enroll in an advanced course or program and offering students challenging curriculum in the Coventry Public Schools (the “District”). In accordance with the Board’s Policy Addressing Enrollment in an Advanced Course or Program and Challenging Curriculum, the administration adopts the following regulations:

1. The District will identify students in grades eight and nine who may be eligible to take or enroll in an advanced course or program. Students will be eligible to enroll in advanced courses or programs throughout their high school career, even if they are not identified as eligible in grades eight or nine.
2. In addition to or as part of student success plans required by Conn. Gen. Stat. § 10-221a(j), the District will create an academic plan for each student who is identified in grade eight or nine as eligible for enrollment in an advanced course or program. A student, or the student’s parent or guardian, may decline to implement the provisions of an academic plan created for such student.
3. Such academic plan will be designed to enroll the student in one or more advanced courses or programs and allow the student to earn college credit or result in career readiness.
4. Middle School Preparation: Academic achievement and engagement are strong precursors to high school success. Therefore, the District strives to:
 - Coordinate standards, instruction, and expectations across middle and high school by fostering regular communication among faculty districtwide, with a focus on vertical articulation of content across the grades rather than offering courses for high school credit in middle school.
 - Offer career awareness, exploration, and immersion activities that directly align with the high school program of studies.
 - Encourage high school faculty to familiarize themselves with the Smarter Balanced system of assessments and Next Generation Science Standards assessments, including interim assessment blocks, which can be used to measure student understanding and adjust instruction in Grades 9-12.
 - Remind middle school faculty that their messaging to students regarding high school expectations has an impact on students, and assure students that if they are mastering middle school standards, they are prepared academically.
 - Share students’ middle school data with high school faculty to improve the quantity and quality of information available for decision making, reduce

unnecessary pre-tests and the administration of screening tools, and maximize instructional time.

5. Partnerships with Families: The District recognizes and values the importance of engaging with a student's family throughout the student's educational experience. Therefore, the District strives to:
 - Engage families in the development of student success plans during students' middle school years.
 - Continue and improve upon effective systems of family engagement used in middle school at the high school level.
 - Ensure families are fully aware of the benefits of taking college courses and participating in work-based learning opportunities, if available, during high school.
 - Communicate in a manner that is ongoing and accessible to families.
 - Provide families with a variety of options for engaging on the topic of course selection.
 - Invite students and families to express interest in advanced coursework and discuss those choices along with career options with their school counselors, who can answer questions and serve as an advocate for the students.

6. Reducing Barriers: The District recognizes the importance of reducing barriers to opportunities for advanced courses and programs. Therefore, the District strives to:
 - Provide school counselors and teachers with lists of students identified by the Connecticut State Department of Education as having potential for success in rigorous courses.
 - Share descriptive statistics with faculty showing advanced course enrollment over time and disaggregated by student group. These data can be used to track progress, discuss effective strategies, identify challenges, and/or generate potential solutions.
 - Urge staff to pay special attention to student interests and coursework fit rather than relying solely on past performance when recommending advanced coursework for students.
 - Not exclude students from consideration based on disability status or English language proficiency.
 - Communicate directly with students from low-income families that registration fees and exam fees for advanced coursework will be waived.
 - Encourage students to self-advocate based on their individual goals and future plans.
 - Monitor course registrations throughout the enrollment period and encourage students to reconsider selections if they have potential to be successful in more challenging courses.

7. Increasing Supply: The District recognizes the importance of providing a wide range of advanced courses that appeal to students with various interests. Therefore, the District strives to:

- Promote enrollment in advanced courses to students in all grades, including for students who may not have taken an advanced course at the beginning of high school.
- Review the current program of studies to identify courses with the potential to be offered in partnership with a college or university.
- Consider adding sections of high-interest courses while encouraging teachers of advanced courses to ensure consistency of content and expectations for a diverse set of learners.
- Consider offering or expanding work-based learning opportunities for students.
- Leverage remote options to expand the range of courses available to students.
