AGRICULTURE EDUCATION

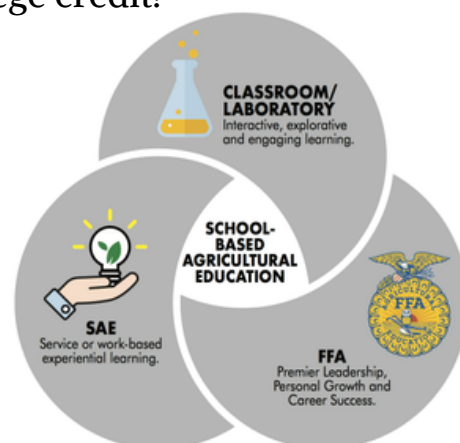

What is Agriculture Education?

Agriculture Education is a hands on learning approach within Career Technical Education (CTE) elective credit-bearing courses. Students must be enrolled in an agricultural education course to be enrolled in the National FFA Organization. ALL COURSES are A-G approved for graduation and college credit!

Agriculture Education courses consist of three segments depicted in the 3-Ring Model

- **Classroom Instruction**
- **Supervised Agriculture Experience (SAE)**
- **National FFA Organization**

FFA is a dynamic youth organization within agricultural education that prepares students for premier leadership, personal growth, and career success. Today, more than 700,000 student members are engaged in a wide range of agricultural education activities, leading over 300 career opportunities in the agricultural science, food, fiber and natural resources industry. Student success still remains the primary mission of the FFA.

Why should YOU join our Agriculture Program?

You will be given limitless opportunities to learn more about yourself, career opportunities and the agriculture industry while participating in hands on learning classes, SAE projects and FFA leadership conferences and competitions! Agriculture education classes also look amazing on resumes to employers, for scholarships and colleges. **Live Oak High Schools offers numerous agriculture education classes – look on the back of this paper for more information!**
