This is a full year 3-period Skill Center class (3 high school credits). Work with industry experts who provide professional knowledge and first-hand experience. Utilize different materials and methods, fasteners and adhesives, learn to safely operate the various industry tools, and learn jobsite safety and OSHA requirements. Design and carry out hands-on skills in practices such as rigging, lifting and safely moving a load utilizing principles of mechanical advantage. Read, understand and interpret basic plan sets and engineering drawings. Apply academic concepts such as math and physics for a well-designed project, key concepts in plumbing and electrical, along with energy utilization and energy efficiencies.

Learn about a variety of project management approaches. Feel prepared to find employment in the field or continue at a post-secondary institution. Qualified students may enroll in the Construction Management Program at the University of Washington upon graduation.
