## For Students & Households:

You will need your student(s) 6-, 7-, or 8-digit Student Number (issued by PowerSchool) to add them to your user account. This is not the 4-digit pin number they use to purchase meals. For middle schoolers and up, this number is one they may have used to log into their Chromebooks and other school accounts. For elementary students and any others who need this number, please email stephanie.deason@stoningtonschools.org to obtain it.

## For School Staff:

You will need your PowerSchool number to match yourself to your user account. If a zero appears as the first digit of your PowerSchool number, you must enter the number without the zero in front. For example, if the number in PowerSchool is "012345" then you would enter "12345"
