Art II	3 weeks	June 26 - July 14	8-12:15		\$115.00 (\$55.00 lab fee)

***Students completing this course are required to take the End of Year exam in July or December 2023**

CENTERVILLE HIGH SCHOOL
SUMMER SCHOOL 2023
COURSE DESCRIPTIONS

ALGEBRA 1

Placement from 8th grade Math

6 week course / 1 credit

Mathematics Dept. (Math Credit)

Course Code - 1109

Algebra 1 is a one-year course aligned with the Ohio Learning Standards for Mathematics. Areas of focus include number and quantity, functions (linear, absolute value, quadratic, and exponential), statistics and probability. Real world application and modeling is woven into all areas of focus. **Ownership and use of a scientific calculator ** is required. Ownership of a graphing calculator (TI-83, TI-84 or equivalent) is recommended.**

Students enrolled in this course are required to take the End of Year State Assessment.

GEOMETRY

Placement from Algebra 1

6 week course / 1 credit

Mathematics Dept. (Math Credit)

Course Code - 1115

Geometry is a one-year course that is aligned with the Ohio Learning Standards for Mathematics and follows the successful completion of Algebra I. Areas of focus include transformations, constructions, congruence, similarity, proof, trigonometry, circles, and probability. **Ownership and use of a compass, protractor, and scientific calculator ** is required. Ownership of a graphing calculator (TI-83, TI-84 or equivalent) is recommended.**

Students enrolled in this course are required to take the End of Year State Assessment.

MODERN WORLD HISTORY

3 week course / .5 credit

Social Studies Dept. (Social Studies Credit)

Course Code - 13061

This semester course will focus on significant world events, people, and places from 1688 through the 20th century. This course will introduce students to historical ideas and events that have shaped the world today. The historical content covered in the class will be studied from a social, political, and economic perspective as students learn about regions across the globe. Content will include subjects ranging from the enlightenment to world revolutions to the cold war. Emphasis will be on establishing skills to critically analyze and interpret events from various time periods and regions.

UNITED STATES GOVERNMENT

3 week course / .5 credit

Social Studies Dept. (Social Studies Credit)

Course Code - 1345

The goal of this semester course is to study the structure of our U.S. Government and to compare it to other types of governments. The student also studies the behavior of citizens in making our government work. Students learn the law-making process through the experience of debating legislation. Additionally, students will gain an understanding of personal financial literacy and its relationship to the global economy.

Students enrolled in this course are required to take an End of Course State Assessment.

WESTERN CIVILIZATION A

3 week course / .5 credit

Social Studies Dept. (Social Studies Credit)

Course Code - 1324

This semester course focuses on the political, economic, and social themes that led to the development of Western civilization in the ancient world beginning with the earliest civilizations in Mesopotamia and the Near East through the fall of the Roman Empire in 476 C.E. Topics include Mesopotamia, the Trojan War, the Persian Wars, Athens, Sparta, the Age of Alexander the Great, the Roman Republic and the Roman Empire.

CHEMISTRY 1

6 week course / 1 credit (Lab fee)

Science Dept. (Physical/Advanced Science Credit)

Course Code - 1224

This course is designed for those college bound students intending to pursue a career in science, mathematics, or related fields, or for those students who want a more in depth chemistry course. Chemistry 1 will provide an introduction to the science of chemistry with an emphasis on the scientific method, problem solving, and precise laboratory procedures. Note that Chemistry 1 and ChemCom are not two levels of the same course. They cover the general topic of chemistry in different ways and following different timelines, thus level changes between these classes are not permitted. Prerequisite: Successful completion of Geometry or Concurrent enrollment in Geometry.

PHYSICS 1

6 week course / 1 credit (Lab Fee)

Science Dept. (Physical/Advanced Science Credit)

Course Code - 1242

This course is a first-year course that provides a thorough introduction to topics from both classical and modern physics, including mechanics, electricity, magnetism, waves and basic nuclear physics. This college preparatory course, while rigorous, emphasizes conceptual understanding and real-life applications of physics. In addition to problem-solving, students should expect to participate in hands-on projects and laboratory experiments. Students must have completed Geometry, and should have completed or be concurrently enrolled in Algebra 2.

ART 1

3 week course / .5 credit (Lab Fee)

Arts Dept. (Fine Arts Credit)

Course Code - 1803

Art 1 is the foundation class which introduces the elements and principles of art through varied experiences. Students will begin to develop the skills and techniques used by artists in a wide variety of careers, while engaging in the basics of art criticism and art history. Some outside class work is expected. Open to students in grades 9-12.

ART 2

3 week course / .5 credit (Lab Fee)

Arts Dept. (Fine Arts Credit)

Course Code - 1806

Students continue to build on the skills and techniques introduced in Art 1. Students will begin to work with increasingly complex processes and media while developing an individual solution to class problems. Individual research and outside class work are an expectation. Prerequisite: Art 1. Open to students in grades 10-12.

DIGITAL PHOTOGRAPHY

3 week course / .5 credit (Lab Fee)

Non-Departmental Elective Courses (Fine Arts Credit)

Course Code - 1907

This course introduces students to the art of photography. Students will develop a vocabulary for describing, analyzing, interpreting, and judging photographic images. They will understand and apply the elements of photography and the principles of composition in developing their own sense of style. Students will use artistic intent and processes to capture, develop, print, and present multiple images. Students explore photography's historical and cultural context, along with contributions of important photographers to the art form.

DIGITAL LITERACY (Formerly Computer Applications & Digital Literacy)

3 week course / .5 credit (Lab Fee)

Career Education Dept., Business (Non-Block Elective Credit)

Course Code - 15032

Students develop computer and technical skills to keep up with the evolving business world. Students will learn formatting for school, personal and business use. Using word processing, desktop publishing, spreadsheets, database software, presentation software, and photo editing. Students will learn how to use social media platforms in a professional manner. The software used includes Google, Microsoft Office, online photo editing and Google Drive and Suite.

FINANCIAL LITERACY

3 week course / .5 credit (Lab Fee)

Non-Departmental Elective Courses (Elective Credit)

Course Code - 1515

Financial Literacy is defined as the ability to read, analyze, manage and communicate about personal financial conditions that affect one's material well-being. It includes the ability to discern financial choices, discuss money and financial issues without (or despite) discomfort, plan for the future and respond completely to life events that affect every day financial decisions, including events in the general economy. Topics covered in this course include: financial responsibility and decision making, planning and money management, the informed consumer, investing, credit and debt, and risk management and insurance.

This course is a graduation requirement beginning with the class of 2026.

HEALTH

3 week course / .5 credit (Lab Fee)

Physical Education Dept. (Health Credit)

Course Code - 1703

This course is a one-semester course in which the student earns one-half credit. It is required for graduation.

CURRICULUM: The curriculum is based on teen health concerns with the goal that students will develop healthy skills, attitudes, and knowledge as a foundation for lifelong learning.

Topics Include:

- Dimensions of Health
- Nutrition & Fitness
- Body Image
- Character Building
- Emergency Care, CPR, & First Aid
- Relationships (Dating Abuse)
- Sexual Health
- Mental Health
- Stress Management
- Suicide Prevention
- Alcohol, Tobacco & Other Drugs (HOPE Program)
- Organ Donation
- Social Media Safety

PHYSICAL EDUCATION 1 (PE 1)

3 week course / .25 credit (Lab Fee)

Physical Education Dept. (PE credit)

Course Code - 1706

This course is a one-semester course in which the student earns one-fourth credit. One-half credit, or 2 semesters, is required for graduation.

CURRICULUM: This course offers a variety of enjoyable fitness activities to challenge students. Students will enhance their physical, mental, and social health through team sports, leisure activities, and personal fitness goals.

Activities Usually Include:

- Bowling
- Hiking
- Canoeing
- Top Golf
- Miniature Golf
- Team Sports
