## What I wish I had known about registration my freshman year...

I wish I had taken both my PE requirements my freshman year so I didn't have to do it as a sophomore.

I should have taken two Running Start classes in order to get 6 free college credits at FVCC.

I wish I would have taken an engineering class my freshman year so I could get all four years in my schedule.

I should have taken more out-of-the-box elective classes before my senior year.

I wish I had gotten my welding certificate through GHS.

I wish I had continued with my foreign language class my junior and senior years.

I should have taken one more science class in order to get the Lab Coat.

Leaving room in my schedule for a learning lab during football season really helped me get my homework done.
