

Sample Outline

Third Grade Math Educational Objectives

By the end of this school year, our child will be able to:

1. Add and subtract three digit numbers.
2. Multiply and divide single digit numbers.
3. Perform simple geometry
4. Tell time.
5. Count change.
6. Know basic temperatures and related instruments.

This is the minimum type of outline needed for each subject area. You may provide more detail as in the outline below.

The child will be able to:

1. Read, write, and understand numbers through 1,000,000.
2. Perform basic addition and subtraction facts (1-20).
3. Read, write, and understand the following symbols: = < >.
4. Solve story problems.
5. Use the order principle.
6. Use the grouping principle.
7. Do mental addition.
8. Know three ways to do subtraction.
9. Add and subtract when renaming is necessary.
10. Estimate answers to problems.
11. Write and solve multiplication equations.
12. Write and solve division equations.
13. Learn multiplication and division facts.
14. Measure lengths.
15. Tell time.
16. Locate points on a grid.
17. Read and write some common fractions.
18. Read and write some decimal fractions.
19. Add and subtract decimal fractions.
20. Read and write Roman numerals through 100.
21. Count out change.
22. Use the multiplication-addition principle.
23. Multiply numbers up to three digits.
24. Weigh objects.
25. Read a thermometer.
