Petiton\_To\_Keep\_ArborView\_In\_JacobWismer.pdf;

Respected Members of Elementary Boundary Committee ,

Thank you very much for your time in volunteering for the difficult job you have undertaken. Residents of Arbor View community deeply appreciate your contribution and patience during the Elementary Boundary Adjustment process to relieve overcrowding at Springville K-8. We, as a founding community of Jacob Wismer Elementary school, request you to allow us to continue educating our children at jacob Wismer Elementary School as we have been doing since the school's Inauguration.

A petition has been signed by members of Arbor view community requesting the Superintendent of Beaverton School District to keep Arbor View community in Jacob Wismer Elementary school. A copy of petition is attached for your reference.

Thank you

Arbor view K5 Alliance

Superintendent  
Central Administration Center  
Beaverton School District  
165550 SW Merlo Rd  
Beaverton, OR, 97003

October 16, 2016

CC: Beaverton School Board

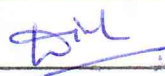

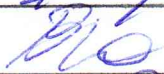

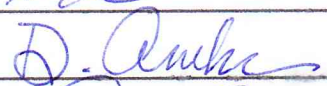

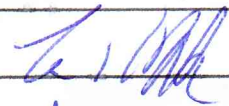

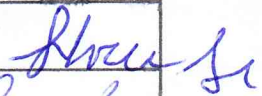

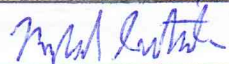

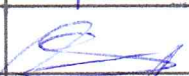

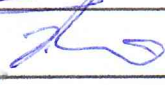

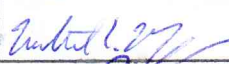

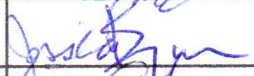

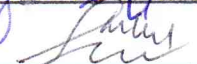

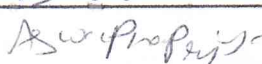

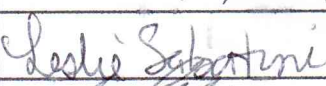

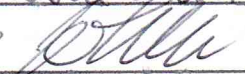

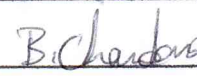

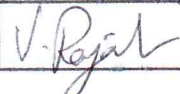

**Petition to continue Arbor View Neighborhood in Jacob Wismer Elementary**

Dear Mr. Grotting:

We are the community members and parents of children from the Arbor View neighborhood in the Jacob Wismer Elementary boundary. We have been notified that some of the children attending Jacob Wismer Elementary this year could be reassigned to the new Elementary School being built on Kaiser Road. The community of Arbor View is a founding neighborhood of Jacob Wismer Elementary School, as such, there are strong sentiments and connection to our neighborhood school. We hereby request you to leave Jacob Wismer Elementary out of the plan to reduce overcrowding at Springville K-8 school, so that our children can continue to go to their beloved school.

Thank you,

Arborview K-5 Alliance

**Comment:**

Springville K-8 has a large geographic catchment area - Needs to be reduced.

1. Westview heights appartments - at junction of springville and 185th should go to Rock Creek
2. Springville Oaks appartments and new housing development east of these appartments should go to Kaiser elementary school
3. Everything north of brugger and east of Joss should go to Kaiser.
4. Everything north of springville and east of kaiser rd should go to Kaiser.
5. New development immediately north of arbor oaks and west of Joss should go to springville

Thank you

ARchit

If Abbey creek community is shifted to new school, we would have to drive down a narrow road to reach the school.  
School Bus not available and bike and Walk is not possible putting all of us at disadvantage and also crowd the narrow roads.

**Comment:**

Hello. My two sons attend Springville school and very much enjoy the Expeditionary Learning environment. They are deeply attached to the school and have several friends there. I live in the new neighborhood just to the north of Springville school on the south side of NW Antonio Street by NW 170th Ave (directly in front of the small segment of the PCC forest). I am deeply concerned as the boundary adjustment maps 1, 8, 12, and 13 all draw an arbitrary line just south of our house that would have my children taken out of Springville to attend the new Kaiser Rd. school. This would be especially problematic as I can literally see Springville school from my house on Antonio Street. To send them to the new school would make them have to travel much farther to school on busy, construction clogged roads. This new neighborhood around NW Antonio Street and NW 170th Ave is clearly a natural fit to remain within the boundaries of Springville school as it is so close. I strongly support acceptance of maps 7, 9, or 10 which have this area where it belongs - within the boundaries of Springville school.

I thank you for your service on this committee.

Joel T. Davis, Ph.D.

Professor of History, Concordia University - Portland

**Comment:**

I did read the criteria used by the BSD for the boundary adjustment, however nothing is mentioned of the continuity of learning style. The fact that Springville is an expeditionary learning school and we do not know yet what type, if any, the Kaiser road school will be. My child has the right of continuity of the learning style. So if there is nothing that can be done to accommodate my child at Springville, then the least that the BSD can do is to guarantee that the Kaiser road school will be an expeditionary school too. It is not fair that children need to change schools and style of learning, because the BSD team of experts did not have enough expertise and with that the foresee ability of overcrowding problems in the area.

**Name:** Anu Shastri

**Email:** arundhati.shastri@intel.com

**Comment:**

Modified scenario 3 discussed on November 3 @Springville (SPR) seems like a shortsighted and incomplete and highly unsafe/unsustainable solution for the problem of overcrowding for the following reasons:

- 1 The lower southernmost yellow rectangle which consists of areas (60, 12, 91, 41 and 18) are going to be routed all the way ~1.5 miles up to Kaiser elementary. This is a group of 222 children.
- 2 This area pre 2010 was with Jacob Wismer (JW), from 2010-2015 currently bussed to Springville and according to modified scenario 3 starting 2017 will be routed via bus to Kaiser and looking at the line graph: "resulting projected enrollment" for the year 2019 will again be most possibly rerouted back to Jacob Wismer because of the projected disparate enrollment numbers of 691 (JW), 821 (Kaiser), 804 (Springville)
- 3 This yellow rectangular region is geographically closer to Jacob Wismer (less than a mile) than it is to the other 2 schools (Proximity is greater than 1 mile to Kaiser and proximity is greater than 1.5 miles to Springville).
- 4 Has the committee considered the scenario of adding region (60, 12, 91, 41 and 18) in that particular order to the adjacent pink JW area while adding area (61, 55 and 74) which totals 190 children in that particular order to Kaiser (yellow area). This would allow for the boundaries to be smoother transitions, cut bus costs, afford a continuity and allow closer safer travel route for region (60, 12, 91, 41 and 18) as well as region (61, 55 and 74) children.
- 5 From the data presented in the line graph; JW shows a declining trend in enrollment so the difference of  $222 - 190 = 32$  kids should be a no problem for JW.
- 6 Due to development of new homes in the northern Bethany area and the location of a BSD property for a post 2019 elementary school, it seems highly likely that region (61, 55 and 74) will eventually anyway in the near future be routed to new BSD property or to Kaiser, but at that later point of time yellow rectangular region (60, 12, 91, 41 and 18) will continue to feed into JW without a disruption if this is done right now.
- 7 Post 2019 everyone would agree that it would Not make sense for this yellow rectangular region kids to be dragged to either SPR, Kaiser or new BSD Property so again the yellow rectangle kids would most likely go back to JW.
- 8 If #4 above seems like a solution that would work then; post 2019 years would possibly need redrawing boundaries for only Kaiser and New BSD property instead of 4 schools: JW, SPR, Kaiser, New BSD Property.

Another thing that seems troublesome about Modified scenario 3 is:

- 1 JW committee members offer recommendations; while strongly locking down its boundaries towards being part of a solution space to the overcrowding problem.
- 2 So they don't seem to be part of a solution space but strangely they get to make recommendations on how 2 of their neighbors SPR/Kaiser should divide up their backyards. Pardon my analogy here but it is like there are 3 neighbors A B & C; A makes recommendations on how B AND C should divvy up their backyards while A won't budge.

**Comment:**

I am concerned about option number 3 as it seems to break up the Graff community. This would cause kids who live on different sides of the street from each other to have to attend different schools. I believe it is in the best interest of the community to go for option number 1 as it continues to build community in this neighborhood area. In the other options, students would not be able to attend school with their neighbors.

**Comment:**

The reason we need to take this pain and adjust boundary is because north bethany is expanding and Springville is over crowded. But looking at the data the committee showed, Jacob Wismer is not over crowded at all and the enrollment will even declining a bit in the near future. So why brother touch Jacob Wismer at all?! Some of the proposal is even take like some community out of JW and put new community in, which doesn't help at all. And guess what? 2X kids and 2x of families will have to take this pain of transition. I would say: LEAVE JACOB WISMER ALONE!
