

WASTE MANAGAEMENT AND RECYCLING

Code **EDE** Issued **1/13**

Purpose: To establish the board's vision for resource conservation and a basic structure for waste management and recycling.

The board directs the superintendent to develop and implement an energy management program that will result in energy conservation throughout the district. The program will ensure that employees, students and users of facilities cooperate and support measures designed to conserve energy.

The program will integrate the concept of resource conservation, including waste reduction and recycling, into the environmental education curriculum at all levels of the school system.

Adopted 1/14/13
