

BUS SCHEDULING AND ROUTING

Code **EEAC** Revised **1/13**

Purpose: To establish the basic structure for development of bus routes.

The district will establish bus routes throughout the district to best accommodate the majority of students eligible for school bus transportation to their particular schools. The director of transportation will supervise scheduling.

As specified by the state, all bus stops must be at least two-tenths of a mile apart. A bus may depart from its established route only in order to pick up a child who lives more than one-half (1/2) mile beyond the route. During inclement weather the bus may make additional stops.

Adopted 2/1/82; Revised 1/12/98; 1/14/13
