Phone: 503 481 7442
School attendance area: JW

Question /Comment: _____

- ° JW is not overcrowded, forecasted to have reduction in total # of students. What is a good reason to consider disrupting kids's school continuum. Why can't same rationale be applied to Finley and bring it also in the equation?
- ° Moving kids to a different school could be a overwhelming change to some kids. If there is no compelling reason, it should be avoided in my humble opinion.
- ° Safety of kids may be ~~comp~~ a concern if they are to cross two busy roads - Kaiser and Springville.

WELCOME...to a special meeting of the
Beaverton School District.

The Elementary School Boundary Advisory
Committee welcomes written comments and

Date: Nov. 17, 2016
Name: Stephanie Ciftci
Address: 15722 NW Graf St.
Portland, OR 97229
City State Zip

Phone: 503.539.0674

School attendance area: Springville

Question /Comment: North Bethany is projected to
have considerable growth. The area will
not have the capacity for all of these
students. Jacob Wismer is under capacity
with a decline in population. Even
moving 60 students would help Kaiser
and Springville long term. We all need
to share the burden in numbers.
Springville students should not have to
go through a severely crowded school
again, at Kaiser.

WELCOME...to a special meeting of the
Beaverton School District.

The Elementary School Boundary Advisory
Committee welcomes written comments and
questions. When finished please place your
sheet in the labeled basket on the table near
the entrance.

Date: 2016/11/17

Name: Nicholas Colman

Address: _____

City State Zip

Phone: 503-780-9692

School attendance area: Springville

Question /Comment: _____

It is OBVIOUS that there are only two proposals that make any sense (as a starting point) unless you are willing to even consider having Kaiser go over (WAY over) capacity in the next 5 years. So only the "ISLAND", or "SUBMITAL 1" (SUB1) make any sense, in terms of even distributions.

Both would need minor adjustments.

① I prefer "MAP 1", but that affects the most J.W. parents. However, it still leaves too many students in Kaiser. This can be remedied by moving sections "84", "0" and "14" to (South of Springville Rd) to Springville, thus equalizing the two

② If you stick with "ISLAND", then a simple ~~of~~ redistribution of sections "41", "12" and "60" (near Laidlaw & Kaiser) to J.W. would make that equitable.

MEMBERS OF THE COMMITTEE: Please do not push all growth to Kaiser: that is short-sighted...!

P.T.O. 2

OVER: →

IMPORTANT:

MOVE SECTIONS "41" + "60" + "12"

(South of Laidlaw @ Bethany)

to Jacob Wismer to equalize #
of students at all 3 schools.

WELCOME...to a special meeting of the
Beaverton School District.

The Elementary School Boundary Advisory
Committee welcomes written comments and

Question / Comment: _____

Modified Scenario #3 represents the
hard work of many, over many weeks
and meetings. It impacts the least amount
of communities and is a good long term
plan.

There is no need to move neighborhoods
known as Pirate Park to a new school
what "might" be built in 2022. What
makes sense "if" a new school is
built is neighborhoods northeast of
Springville Rd and Haizer Road go to
the future BSD school. This addresses the
concern of doing it right.

Map Submittal #2 would also
address many concerns as it is. All
neighborhoods should stay together as
noted with their respective assigned schools.

BEAVERTON SCHOOL DISTRICT

WELCOME...to a special meeting of the

School attendance area: springville Elementary school

Question /Comment: _____

I would advice against map submittal #3
we live Abbey creek community, little north of
springville elementary school. It would be far and
not safe to walk. It would also divide our community,
the projected enrollment is also too high in map submittal
3. ~~if~~ Given there are no bond measure, there is no
guarantee that there will be a new school.

I would recommend committee's modified scenario 3.
It is walkable distance and safe. It also keep
the student enrollment balanced.

WELCOME...to a special meeting of the
Beaverton School District.

Question / Comment: For Modified Scenario #3; Map Submitted #2

Dear Committee Members,

Thanks for your time. I was given an opportunity
to speak earlier this evening. Thank you for
the consideration!

Just to reiterate:

We are from Abbey Creek Neighborhood.

Our main concern is that our kids walk to school
Springville in less than 3 minutes. We are united
with Arbor Oak community. Our kids ^{would be split} ~~are~~ across the
schools. In this regard we strongly object to
Map Submittal #3. Please disregard the Map
Submitted #3. **AGAINST MAP SUBMITTAL #3**

We urge the committee to consider Modified
Scenario #3 that was also the tentative Committee
Recommendation. We have petition signatures
of 56 families that agree to Modified Scenario #3.
Thanks, Prashant

School attendance area: Springville

Question /Comment: I am strongly not recommend Map Submittal #3.

Reasons: ① Safety issue (narrow road around Kaiser Rd K-5)

② There are two large growing communities around Kaiser K-5.

Based on Map Submittal #3, there will be too many students
enrolling in Kaiser, much higher than its capacity. Speaking of
long-term development, this map is not suitable at all!

WELCOME...to a special meeting of the
Beaverton School District.

The Elementary School Boundary Advisory
Committee welcomes written comments and
questions. When finished please place your
sheet in the labeled basket on the table near

Portland

OR

97229

City

State

Zip

Phone: 971-727-0001

School attendance area: Springville

Question / Comment: Appreciate the time and efforts made by Boundary Advisory Committee!

I would like to strongly disagree submittal #3 by excluding
(93) Abbey Creek from Springville school boundary, because we
are the closest ~~comm~~ area / community to Springville school under
walkable distance. We are extremely ~~concern~~ concerned the safety
for our kids to walk to Kaiser school ~~where~~ because the way / roads to Kaiser
School is so un-developed if there is no school bus provided.

We are ~~deeply~~ ^{supporting} ~~conci~~ fully ~~with~~ Scenario 3 ~~and~~, or with
island, or Submittal #1, #2, #4 ~~and~~ but NOT #3!

Kindly consider our voice! This is so critical for the Abbey Creek
Community People's Life! Thank you so much!

WELCOME...to a special meeting of the

Phone: 503-690-9292

School attendance area: _____

Question /Comment: _____

Pirate Park area I feel needs to stay as a whole. I hope that this area will be put into a elementary school, and that the ~~boundaries~~ boundaries would not change. I feel if we are moved to new Kaiser, we will be moved again. This is the farthest school away, as well as not a good connection for our students. I feel that if you move the new development north of Springfield to New Kaiser it would be the best move for that community. Those houses are a new area, not even 10 years old. I feel the impact to these students will not be as high as the pirate park area-which is 15+ years established neighborhood.

*I also don't agree that Jacob Wismer is not helping w/any changes. I would like to see them take more students or not be involved with this decision process.

WELCOME...to a special meeting of the

Phone: _____

School attendance area: Jacob Whisman

Question / Comment: (I prefer Modified scenario #3) committee recommended
Based on what was discussed during the meeting
today, I humbly disagree with Scenario/Map Submittal
1 & 4 (Strongly disagree).

As this doesn't meet the basis of
the exercise keeping in mind the Neighbourhood unity
& Safety of the kids going to school.

Also based on what all the meetings
happened so far (4 meetings on this till date) ~~we saw~~ it was
proven multiple times based on data that Jacob Whisman is
not at all overcrowded and will not grow in future
So please keep Jacob Whisman AS-IS.

Thanks & Regards.

Dinesh.

Name: NARENDER MURUGAN

Address: 16906 NW Antonio St
Portland OR 97229
City State Zip

Phone: 503-267-7406

School attendance area: Springville

Question / Comment: North block of Springville is 2.02 or 0.5

miles to Springville, so I request to see that
block used/go to the Springville as it is more
safe, reduces budget and many more advantages. like
traffic...

So I support submitted #2 as it satisfied
everyone's concerns like Private Park going together
together and keep walkable kids of Springville
the same.

The submitted #3 is increasing the capacity of Kaiser
in next 1-2 yrs to 3007, whereas the other school is
27009 at that point, another exercise of what we are
doing now is required, and looking at the density,
you have to move the North block of Springville to
the Springville, which impacts kids education,
so I request to keep that block with Springville
now itself and help brighten the future of
kids by not disturbing in the middle of the
their elementary schooling.

Thank you.

School attendance area: TW

Question /Comment: _____

①. Arbor View being a founding member of
TW, keeping it in TW makes sense.

②. Map 3 /modified seems to meet most
of the requirements.

③. Other Scenarios would lead to
disturbance of many more communities
without any real benefit.

④. With the THPRD trails TW is a safe
walk (if needed) for Arbor View
community members.

⑤. Kaiser involves crossing the Springfield Rd.

⑥. Map #4 does not solve much of the problem
and breaks neighborhood unity.

School attendance area: Springville

Question /Comment: _____

Stability of an area should be considered more important than a temporary transportation issue. Within a short period of time the area north of Springville WILL be able to walk to Kaiser. Temporarily busing them to Kaiser should be preferable to moving the Pirate Park neighborhoods AGAIN to Kaiser as they will be shuffled back to Springville when Kaiser overcrowds. The housing market is unknown and to base a scenario on a projected growth area is tricky. However, new schools should ~~be~~ contain communities that are near them and that are experiencing said growth so that other areas are stabilized. Shifting an area so far south (the Pirate Park communities) to a northern school (Kaiser) does not make sense in the long-term. This area will NEVER be walkable to Kaiser. It is walkable to Springville - esp. with a crosswalk + stop light @ Springville + Joss. The North Bethany area will be walkable very soon. There is a community plan for North Bethany - as such it shows that they are already

considered their own community. let them start their own community @ Kaiser.

As far as Kaiser overcrowding rapidly - this is projected.

It might not happen - esp. under our new President-elect.

Also, moving the 185th neighborhood back to Rock Creek where they rightfully belong. This brings predicted # down to 907.

★ Keeping the 42 area with Springville further ↓ this number
★ to LONG-TERM + no overcrowding of any schools!

Also, if the projected # is correct, the location of the other BSD property must be considered. If it is opened, boundaries will fall along the lines of North Bethany going to Kaiser.

It makes more sense to send them there now than to send Pirate Park to Kaiser just to move them back to Springville in a few years.

As for the economic disparity that seems apparent in submittal #3 with ~~23%~~ 23% going to Kaiser. This is

temporary: $110/487$ (starting population) = 23% but as it is built out, this 110 will make up less of the population.

$110/750$ (capacity) = 15% Therefore it is a non-issue.

WELCOME...to a special meeting of the
Beaverton School District.

School attendance area: Sprongville.

Question /Comment: _____

Please consider the fact that the area
southernmost (area 41-61-12-18-71)
are all going to be moved eventually.
They've moved several times over
years.

The closest neighborhood school is
Jacob Wisner.

61-55-74 will anyway be
eventually moved to Kaiser.

Please do it now, rather than later.

WELCOME...to a special meeting of the
Beaverton School District.

The Elementary School Boundary Advisory
Committee welcomes written comments and
questions. When finished please place your
sheet in the labeled basket on the table near
the entrance.

Question /Comment: There are 2 ways to divide/mark school boundaries →
one is east/west (map #1) or north/south (original modified scenario 3,
or map #2). It looks like, long-term, E^W should be the
right thing to do.

Are we not considering it because we fear impacting a
lot of students? It might be painful short-term but
benefit long term.

Can the district make portables available for J.W. to
relieve ~~long~~^{short} term pain? Is it feasible?

Can there be adjustments made to map #1 to
relieve JW?

N-S is a challenge because long term it might impact
southern areas as growth is towards north.

BEAVERTON

SCHOOL DISTRICT

School attendance area: JW.

Question /Comment: _____

- ① JW is neither overcrowded nor under utilized
- ② ~~the~~ Arbor view community is boundary member of JW school keep it as it is.
- ③ ~~Since~~ Arbor view community has contributed & invested a lot in betterment of JW →
- ④ changing JW boundary to push ^{Arbor view} to Kerner school does not solve any problems.
- ⑤ It is reflected in the fact that only 1 of the 3 proposal maps suggested Arbor view community out of JW.
- ⑥ Additionally, keeping Arbor view ^{in JW} addresses all other criteria for boundary decision such as, proximity, accessibility, transportation costs, continuity, ~~safety~~ and community unity.

School attendance area: Springville

Question /Comment: _____

Map submittal 2 is possibly a great solution to Pirate Park issues. Map submittal #3 solves absolutely nothing and makes transportation unsafe, tear communities and set for very early failure when new Kaiser school gets ever crowded. Families near 185th will travel several miles to reach new Kaiser school.

Modified scenario 3 with island is also a good option to consider

School attendance area: SPRINGVILLE (ABBEEY CREEK) 4 mins walk

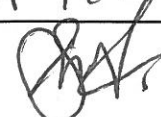

Question /Comment: _____

Today, my kid walks to school (Springville) along with 180 other kids everyday. I strongly oppose Submittal #3 as it will make atleast 20% of the Springville school kids who can walk today, will make them commute by bus/car. Keeping SAFETY as first priority and major contribution of all the factors, Submittal Report #2 is the BEST. It keeps the Thumb Rule of Boundary Adjustment to 100% Safety.

I request you to please consider Abbey Creek Area which has 200 kids as of today, will continue walking to School.

I'm really thankful to Beaverton School district for arranging various meetings and being patient to listen and consider feedback and concerns from every family member.

Beaverton School District is the best and we are all proud for being part of it.

 11/17/2016.

City State Zip

Phone: 6099376008

School attendance area: Springville - K8

Question /Comment: _____

We think the Map Submittal #3 is unreasonable.
(North Bethany)
The Abbey Creek Neighborhood is ~~only~~ within 0.5
mile distance to Springville Elementary School. It doesn't
make sense to draw it outside of this school district.

We are in favor of Modified Scenario 3!

April
Powers
Reference

Scenario 1b

PREDICTED FUTURE BOUNDARIES

Scenario 1

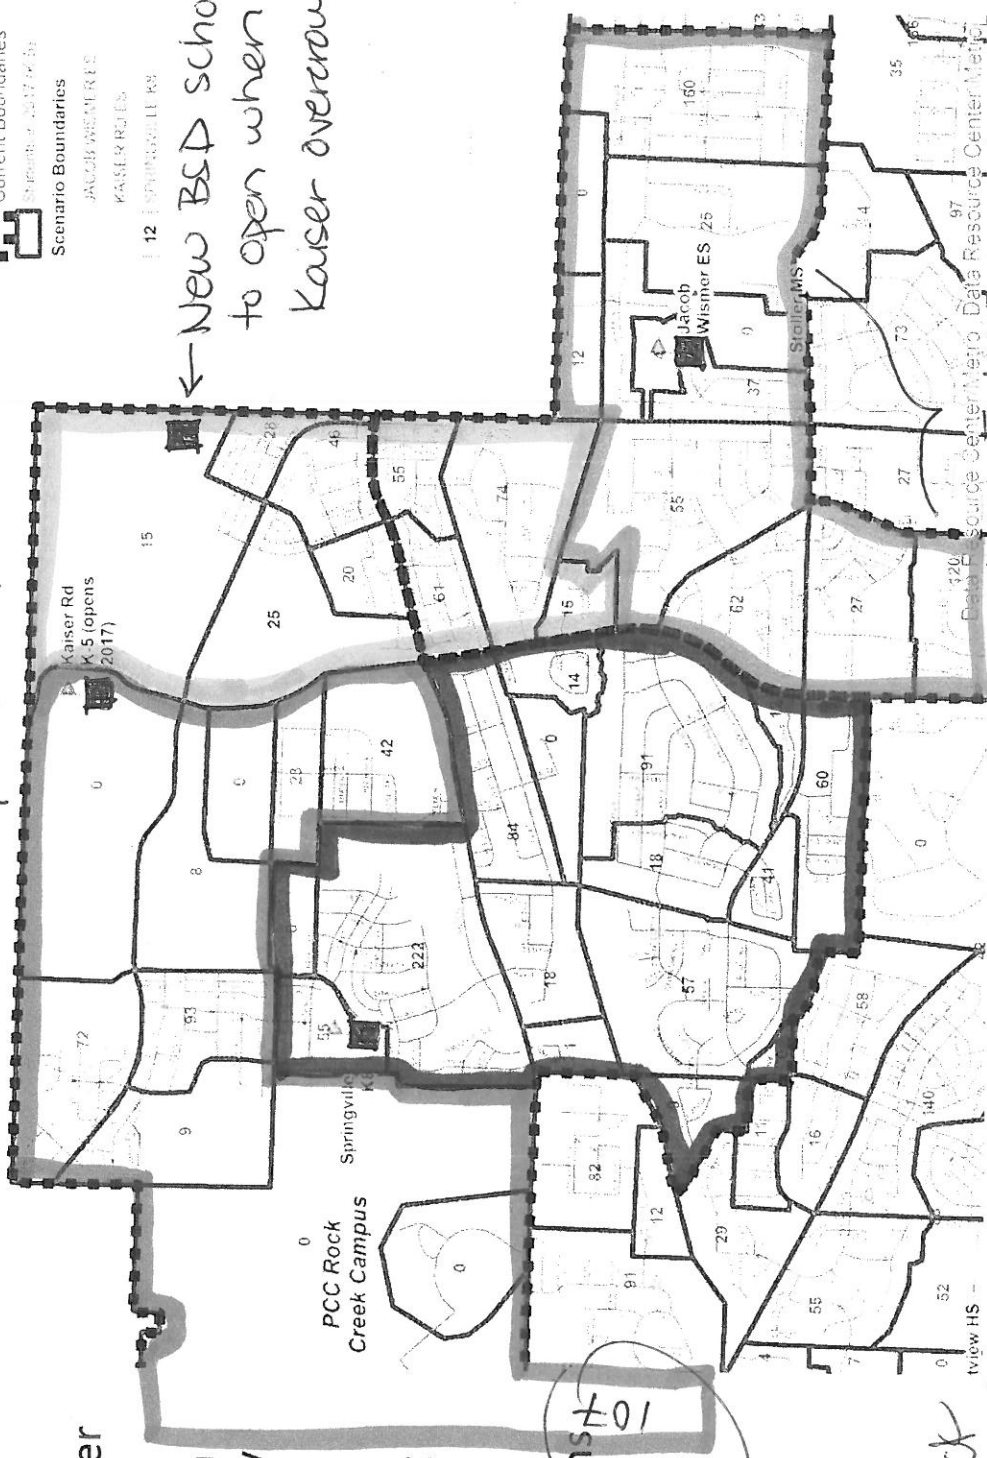

- Assigns major growth areas of Springville boundary to Kaiser
- Potential walk zones in NW area of Springville may be bussed to Kaiser
- Relies on housing growth to fill Kaiser
- Springville remains ± 0 above its K-5 capacity of 790
- Does not change Jacob Wismer boundary

* LONG-TERM *

← New BSD school to open when Kaiser overflows

Legend

- Current Boundaries
- Scenario Boundaries
- JACOB WISMER
- Kaiser
- 12 Springville

move to Rock Creek + Kaiser drops to 903!! Predicted!!

-keep 42 with SV makes all schools w/ capacity

SW on low side, so can relieve **BEAVERTON** SCHOOL DISTRICT Findley of overcrowding

**Beaverton School District Elementary School Boundary Committee
recommendation petition from**

Abbey Creek and Arbor Oaks Community

Strongly Against Map Submittal #3

Date: 11/15/2016

We, neighborhood of Springville K5/8, Abbey Creek and Arbor Oaks Community, thank you and appreciate the great work that boundary adjustment committee has been doing on the subject. We, further petition the BSD Elementary School Boundary Committee, to kindly consider Abbey Creek and Arbor Oaks community to remain under Springville K5 school boundary.

As a result of your diligent consideration of multiple scenarios, current approach (scenario 3 or modified variant) is possibly the best approach to address the school boundary adjustment, as it emerged almost unanimously during Jacob Wismar meeting on Oct 20th. However, there have been some proposals in recent days to remove Abbey Creek and possibly some parts of Arbor Oaks community from the Springville school boundary and retain unity of other communities.

Descriptors of School Board Adopted Attendance Boundary Criteria to a Proposed Attendance Boundary Adjustment, "**Proximity to School**", "**Neighborhood Unity**", "**Safety**", "**Transportation**" are all closely matched by Abbey Creek and Arbor Oaks communities.

Abbey Creek and Arbor Oaks communities are the nearest possible neighborhoods to Springville school with majority of the community within ½ mile and a maximum of 1-mile radius from the school location. There are no major roads or intersections which enables majority of students to walk or bike to the school safely, either independently or with parents. The communities have students attending school for multiple years happily with a great social bonding between these communities. Modifying boundary to move/transfer the immediate neighborhood of Springville K5/8 to a new school at a relatively far away location will be detrimental to community unity, ease of transportation, walking/biking as well as to student's social life woven around Springville K5/8 and overall schooling experience.

There are other disadvantages of considering other scenarios, e.g. scenario 1 and scenario 2 with possible variants, doesn't help with current overcrowding of Springville, not making efficient use of new school's capacity by opening it with a relatively lower number and similar issues.

There are multiple locations which are multiple miles away from Springville which are currently being served by Springville (especially the area which is below green area on map, below Emerald State Park and Bethany Meadows Park). With the availability of a new school, this area will not be adversely impacted by daily commute, safe transportation to school and student safety. We would, however, request to kindly consider the community unity for this area before making the final decision (modified variant of scenario 3).

Thank you again for the excellent work which all of us sincerely appreciate. We further **emphasize that scenario 3 and modified variant, address the needs in the best possible way meeting most of the criteria on the consideration list.** Please let Arbor Oaks and Abbey Creek be a part of Springville K5/8 school boundary. Provide below is a list of all residents who are actively requesting you to consider the requests above. Names, addresses and signatures are included below.
