## COMPUTER/TECHNOLOGY LITERACY

Code **IHAJ** Revised **3/13**

---

Purpose: To establish board's vision for computer/technology literacy for the district's students.

The primary goal of the district's computer/technology program is to provide a learning environment that utilizes and integrates technology into the total school program. Technology and computers will be used primarily to support curriculum and instruction.

The district has established four ongoing technology priorities. The priorities are revised and updated on a continuous basis by the District Technology Committee and the district administration.

- **Technology maintenance** – maintenance of educational and administrative hardware and software throughout the district
- **Infrastructure to support instruction** – computer and electrical wiring and hardware to support computers throughout the district
- **Computers in classroom** – computer and supporting peripheral hardware in each classroom for instructional and administrative purposes
- **Teacher training in the use of technology** – specific training designed to assist teachers in effectively utilizing computers in the classroom

Adopted 6/1/98; Revised 3/4/13
