

The district shall provide for an adequate and trained staff of custodians and maintenance personnel. The building and grounds supervisor will annually prepare recommendations for building and grounds maintenance and improvements. The recommendations will be prioritized, supported by cost estimates, and submitted to the board by the superintendent for consideration in preparing the district's budget.

Procedures shall be established for the periodic inspection of school buildings to ensure that each has adequate light, heating and ventilation and that the premises are clean and sanitary and conform to current fire safety and health codes.
