

## Science Expo FAQs

### Where can I get more information about the [Science Expo](#)?

Go to the link below on the Parkway website for information about “Rules and Guidelines.” “Choosing a Science Project,” “Participation Permission Form,” “Trifold Presentation Board Examples” and “Sites and Links.”

<https://www.greenwichschools.org/fs/admin/site/pages/2728>

### Who should I contact if I have more questions?

Please contact Mrs. Attanasio in the Learning Commons if you need more information.

([lea\\_attanasio@greenwich.k12.ct.us](mailto:lea_attanasio@greenwich.k12.ct.us))

### How will the projects be judged?

The projects will not be judged. No one will “win” the Science Expo. This is an opportunity for students to explore a new science or technology idea or question they are interested in, and then to share this new learning with “the world.”

### Can my child build a volcano?

Not for the Science Expo. We all remember the first time we built a model of a volcano and then added the ingredients to make it erupt. Every child should have the chance to do this. Please do this experiment with your child(ren) at home sometime and then think about something else your child could do for the Science Expo. You can visit [Sciencebuddies.org](http://Sciencebuddies.org) for lots of ideas, including doing their online survey:

(<https://www.sciencebuddies.org/science-fair-projects/topic-selection-wizard/background-info>) to generate a list of experiments appropriate to your child’s age and interests.

### Are parents permitted to work on a project with their child(ren)?

Absolutely, yes, if you would like to work with your child, please do! Children may also work with older siblings and/or friends.

### How can I sign my child up for one of the one-day Science Expo Afters workshops?

Information about signing up for a workshop has been sent out via the PTA Afters program. There will be a maximum of 10 students per day, enrolled on a first come, first serve basis.
