

TALENT READY APPRENTICESHIP CONNECTION

# YOUTH APPRENTICESHIP PROGRAM

Earn an associate degree debt-free and gain valuable work experience with our dual education program!

## SCHOOL

This program begins your student's senior year of high school and extends through their associate degree by combining theoretical lectures at school and practical training at work. Seniors start on an A/B schedule- school on A days, and work at Stadler on B days. After high school, they attend SLCC with other Stadler students to receive their Associate Degree in Applied Science-paid for by us!

## FIND OUT MORE AT PARENTS' NIGHT

Stadler is hosting a parents information night where you can come meet our staff, tour our facility, receive more information about this program, and discuss details with your student's school district representative and our program specialist.

**FEBRUARY 27TH 5:30-7:30PM**

Come anytime- tours and presentations start at 5:45pm

RSVP to your work-based learning coordinator in your career center!

## WORK

During their first year, students choose between our two tracks: Mechanical or Electrical. Students then rotate through various departments, in their track gaining an overall idea of our company and finding what area is the best fit for them. This is a three year commitment and each year work hours increase. By the end, a full time employment offer is presented to every student.
