

Virtual PBIS Booster Series *A Snapshot Review of PBIS Tier I Features*

This Virtual PBIS Booster Series is designed to provide PBIS Leadership Team members with a quick snapshot of the Tier I features to assist them with implementing the PBIS framework with fidelity in their schools. This series is not a replacement for the PBIS Tier I training, but an ideal option for: 1) team members who are new and have never received PBIS Tier training or for, 2) existing team members who would like a refresher on various parts of the initial Tier I training.

The Virtual PBIS Booster Series is made up of nine modules covering all Tier I features with the exception of TFI 1.8 Classroom (PBIS in the Classroom is a separate training). Each module is designed to stand independently of one another so teams can customize the training content based on need/TFI Tier I feature. It is recommended that new PBIS team members watch all the modules in chronological order to build strong foundational knowledge of the PBIS framework.

To complete each module, watch the video recordings using the links below. The PowerPoints as well as any supplemental readings and/or handouts can be accessed in the [corresponding training folder](#). Use the [ReCharge! Virtual Booster Handout](#) to capture any notes or questions that arise while viewing the recordings as there are suggested next steps for follow-through at the end of each module.
