

TECHNOLOGY PLAN

PROGRESS SUMMARY

2022 - 2023

This document was created to provide the community with a summary of the current progress towards the five goals identified in the Eanes ISD Technology Plan. Through the 2023-24 school year, the district will continue to prioritize efforts to make progress towards each goal.

GOAL	PROGRESS SUMMARY
<p>1) Using an evaluation matrix, the district will identify exemplary learning management systems (LMS) as a possible K-12 solution by the 2023-24 school year.</p>	<p>Funding for a K-12 learning management solution was included on the Bond 2023 election in May. Once funding is received, the district will move to the next phase of implementing this goal.</p>
<p>2) Identifying future funding opportunities, the district will maintain state of the art infrastructure and end user technologies representative of the ever evolving needs of learners by focusing on a 4-year refresh cycle.</p>	<p>During the 2022-23 school year district administrators were awarded a TASB Cybersecurity grant and supplemental eRate funding.</p>
<p>3) Prioritizing the district's beliefs regarding the thoughtful use of technology, the district will provide learning opportunities for staff by offering professional development, emphasizing universal design for learning (UDL) and technology integration (SAMR) concepts, in alignment with new implementations.</p>	<p>Progress towards this goal will be continual and ongoing. Technology integration, accessibility and best instructional practices are foundational elements of all professional development and planning.</p>
<p>4) To ensure the safety of students and staff, the district will prioritize cybersecurity and data privacy by evaluating and maintaining safety protocols and risk management opportunities.</p>	<p>The district has implemented additional layers of security as it relates to cybersecurity and data privacy including data requests, infrastructure protocols and staff awareness.</p>
<p>5) The district will continue to emphasize thoughtful use of technology, by evaluating applications and digital resources (mobile apps, YouTube, etc.) incorporated into classroom instruction and accessed by students for academic relevance, appropriateness, and integration.</p>	<p>The Educational Technology team has streamlined evaluation processes and procedures to better identify digital resources that align with best instructional practices and thoughtful use of technology.</p>
