

## Pharmacy + Public Health Dual Degree Program

### Eyeing a PharmD degree?

Here's why you should consider adding a master in public health, especially in the wake of the Covid pandemic: **Healthcare is changing fast.** Prevention is emphasized over treatment, and care is increasingly taking place in the home or the community. Above and beyond your pharmacology focus, you may find yourself administering vaccines, screening for diseases and offering health coaching. You'll be in a position to help people stay healthy, better manage chronic conditions and age in place. **Your role as a pharmacist — arguably the most accessible of healthcare providers — will also give you the chance to assess community health needs, help identify and implement systems for disease surveillance and monitor health outcomes.** With a master in public health, you'll be ready for that role, equipped with an understanding of informatics, program design and evaluation.

**Wingate's MPH program, with an emphasis in health education and promotion, will give you the tools you need to maximize your pharmacy practice and navigate the ever-changing healthcare landscape.** And perhaps best of all, you can get that master in public health while earning your PharmD. Wingate's dual degree can be completed in just four years.

## BECOME A HEALTHCARE LEADER AND DIFFERENCE-MAKER WITH DEGREES IN BOTH PHARMACY & PUBLIC HEALTH

- Earn a masters (MPH) and doctorate degree (PharmD) in just 4 years
- Enjoy maximum flexibility in the MPH curriculum — online, asynchronous, and integrative — while preparing for the workforce.
- Engage with accomplished public health faculty and community partners who will mentor you and offer robust hands-on learning to shape you into a healthcare professional with public health knowledge and real-world experience.

### PROGRAM OVERVIEW

The intentionally designed PharmD curriculum offers hands-on experience through a longitudinal skills lab, immersion in community healthcare outreach and rotations during every year of the program. The MPH integrative curriculum with a focus on health education and promotion is a flexible, online degree pathway. With both degrees, you'll be able to explore a variety of career options.

As a dual-degree student, you'll begin taking public health courses at the beginning of your second year in the School of Pharmacy, enrolling in one or two MPH-specific courses each semester in addition to your pharmacy courses.

You will be able to earn both degrees at a reduced tuition cost. And you can pay the dual-degree tuition in equal installments over the course of eight semesters.

## APPLY TODAY

Complete the online application.

Submit your resume and share your motivation for applying and your career aspirations via a 500-1,000 word essay. Include how your academic, professional and personal experiences have helped you prepare for this opportunity.

Your previously submitted PharmCAS applications and your Wingate University unofficial transcripts will be considered as a part of the admissions process.
