This club will introduce your student to computer science programming and coding. We will focus on the fundamental concepts of programming, by using drag and drop blocks rather than a text language. Therefore students can learn the basics of programming without having to know how to type. Students will create programs with sequencing, loops, and events. They will develop problem solving skills while they work through a variety of programming puzzles. They will be given the chance to try and try again until they succeed, teaching them that when you fail and try again you can learn from your mistakes. This is a beginner class even if your child has never used a computer they will be more than capable to participate.
