IMPORTANT INFO

- **Cyclone SPIN Newsletter & EHS Instagram**

The Cyclone SPIN is a weekly newsletter to help inform students about special events and announcements from across the EHS community while also highlighting the amazing things that our students do.
Also be sure to follow the EHS Instagram account @elizabethtonhs for dates, schedules, highlights, and some special surprises throughout the school year.

Welcome Back from Dr. Minton

Welcome back! It is always exciting to get back to the start of a new school year. It has been a productive summer on our campus and you will likely notice that some things have changed in and around our building. We hope you had a chance to relax and gear up for what is to come, and we are looking forward to walking alongside you amidst new challenges. We hope to see more of a normal school year but, as you know, the pandemic has created a variety of hurdles, new ideas, and unexpected moments. The landscape is still changing and we have to be ready to adjust quickly if called on to do so. We have a set of guidelines built for our return that will still allow for some physical distancing and safety and we will share those with you during our class meetings. You will also hear about our new Cyclone Student Center and some updates to our handbook that are both exciting and different at the same time. Stay tuned for more.

Finally, know that our teachers and school staff have put in extra time and effort during the summer to help make our facilities and our instruction better than ever. You learned a tremendous amount about resilience last year by hanging tough during a difficult situation. This year we will hopefully get to spend more of our efforts working toward regaining a sense of community, a core action that we value at EHS. Let's have a great school year together and, as always, GO CYCLONES!

Changemaker of the Month Awards

Every month, faculty and staff will nominate students who they believe demonstrate one of the five EHS Core Actions of Community, Accountability, Excellence, Resilience, and Integrity. One of these nominated students will be selected by Administration to be highlighted as the EHS Changemaker of the Month!
