LENAPE TECHNICAL SCHOOL

SECTION: PUPILS

TITLE: CLASS RANK

ADOPTED: January 16, 2003

REVISED: December 18, 2014

214. CLASS RANK

1. Authority
SC 1850.1

The Joint Operating Committee authorizes a system of computing grade point averages and class rank for students to inform students, parents and institutions of a student's relative placement among their peers.

2. Guidelines

By using the semester or yearly grades that students receive, students can mathematically compute their class rank or standing.

Certain elective courses are weighted and students should give this consideration when determining their academic course selection.

Upon graduation, students receive a rank that compares them with all students in their graduating class.

Any two (2) or more students whose computed grade point averages are identical shall be given the same rank. The rank of the student who immediately follows a tied position will be determined by the number of students preceding and not by the rank of the person preceding him/her.

Pol. 216

A student's grade point average and rank in class shall be entered on the student's record and transcripts and shall be subject to the Joint Operating Committee's policy on release of student records.

3. Delegation of Responsibility

The Administrative Director or appropriate personnel designated by the Administrative Director shall develop procedures for the computing grade point averages and assigning class rank to implement this policy, which shall include a statement of the methods for computation and rank assignment for those to whom a student's grade point average and class rank are released.
