

Measles

What you should know.

It's a serious viral infection.

Measles is very contagious and can be deadly.

It's still in the air 2 hours after an infected person leaves an area.

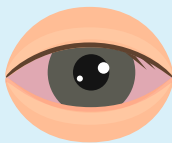

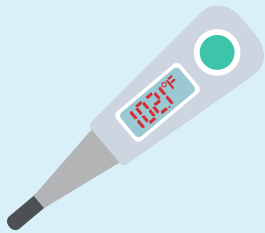

Protect your family.

The measles vaccine is safe and effective. Get your family immunized.

What to look for.

Measles starts with a fever, red eyes, cough and runny nose.

About 3 days later, a red rash starts on the face and spreads down the body.

Young children usually get the sickest and may need to go to the hospital.

If you think you or a family member has measles:

- 1** Call your healthcare provider right away.

- 2** Your healthcare provider will tell you how to get care without exposing others.

- 3** Stay home and don't have visitors in your home.
