

# S.T.E.A.M. LEGO Robotics and 3D Printing Camps

Ages 5-13 — No experience required!

At Robot Academy summer camps, kids ages 5-8 and 9-13, learn about S.T.E.M. in a fun and supportive environment.

Kids build and program Lego robots to compete in a BattleBot championship! Campers make friends and improve grades at school with skills learned at S.T.E.M. Camps.

Campers complete robotics challenges to win trophies. No experience necessary - we teach kids everything they need to know to build and program epic LEGO robots or bring their ideas to life with 3D Modeling and 3D Printing.
