CREDIT REQUIREMENTS

Subject	Graduation Requirement
English	4 units
Health	½ units
Math	4 units ¹
Physical Education or Waiver	½ units ²
Science	3 units ³
Social Studies	3 units ⁴
Fine Arts	1 unit ⁵
Electives	5 units ⁶
TOTAL HIGH SCHOOL CREDITS	21 units

STUDENTS ARE PERMITTED TO SCHEDULE 1 STUDY HALL PER YEAR AND REQUIRED TO BE ENROLLED IN 6 CLASSES/ELECTIVES PER YEAR.

¹ Math units must include 1 unit of Algebra II or the equivalent of Algebra II

² The board of education of Delphos City Schools has adopted a policy to excuse from the high school physical education requirement each student who, during high school, has participated in interscholastic athletics, marching band, or cheerleading for at least two full seasons. Therefore, the board does not require this student to complete any physical education course as a condition to graduate. These students will not earn credit for PE but will be exempted from the PE requirement. Any student not participating in interscholastic athletics, marching band, or cheerleading for at least two full seasons will be required to take a ½ credit independent study PE course.

³ Science units must include 1 unit of physical science, 1 unit of life science and 1 unit of advanced study in one or more of the following: Chemistry, physics or other physical science; Advanced biology or other life science; astronomy, physical geology or other earth or space science.

⁴ Social Studies units must include: American History (½ unit) American Government (½ unit). Class of 2021 and beyond will need World History (½ unit) in their required 3 units along with American History and American Government. Each course will integrate the content of economics and financial literacy.

⁵ Students must complete at least two semesters of fine arts taken any time in grades 7-12. Fine arts is not a requirement for students following a career-technical pathway. The fine art requirement can be earned through 7th and 8th grade art or high school Yearbook, Digital Media, Choir, or Band. Fine Art requirement is waived for students taking at least one course in Agriculture. **For those working towards a Honors Diploma the fine art credit must be earned in grades 9-12.**

⁶ Any combination of foreign language, fine arts, business, career-technical education, technology, agricultural education, or English language arts, mathematics, science or social studies not otherwise require, for a total of 5 units.

EARNING AN OHIO HIGH SCHOOL DIPLOMA

For the 2023 Graduating Class and Beyond:

- <http://education.ohio.gov/getattachment/Topics/Ohio-s-Graduation-Requirements/Sections/Classes-of-2023-and-Beyond-Graduation-Requirements/GradReq2023.pdf.aspx?lang=en-US>
- [Fine and Performing Arts Seal](#)
- [Student Engagement Seal](#)
- [Community Service Seal](#)

LOCAL GRADUATION AWARDS

The Award of Distinction (Beginning with the Class of 2013; Must meet all four criteria)

- 1) Top 10% of graduating class based upon Cumulative GPA
- 2) Cumulative GPA of 3.75 or higher after 7 semesters
- 3) Must have completed at least 2 Advanced Placement classes
- 4) No reports of cheating/plagiarism/suspensions/expulsions
- 5) Vantage students will be excluded from #3 but must be recommended by their Vantage lab instructor

The Award of Honor (Must meet all three criteria.)

- 1) Top 20% of class based upon Cumulative GPA
- 2) Cumulative GPA of 3.5 or higher after 7 semesters
- 3) No reports of cheating/plagiarism/suspensions/expulsions

Honors Diploma

The Ohio Department of Education (ODE) is prohibited from granting an Honors Diploma to any student not meeting the Core requirements. The SBOE has created rules for obtaining an Honors Diploma based upon exceeding the Core criteria. To qualify for the state Honors Diploma, students in a college preparatory curriculum must meet 7 of the following 8 guidelines.

- 1) 4 units of English
- 2) 4 units of Math (Algebra I, Geometry, Algebra II and one higher level math)
- 3) 4 units of Social Studies
- 4) 4 units of Science (including Chemistry, Anatomy & Physiology, Physics and/or CCP Science)
- 5) 1 unit of fine arts (obtain between 9-12 grade year)
- 6) 3 units of one foreign language or two units each of 2 languages
- 7) 3.5 GPA or higher
- 8) ACT composite score of 27 or the SAT equivalent

Scholastic “D”

To earn the Scholastic “D” issued at the yearly Academic Awards Reception, a student must have a cumulative GPA of 3.33 after the 3rd semester of high school. Bars will be issued for each additional year of maintaining the 3.33 Cumulative GPA.

Honor Roll.

1. A student will be listed on the honor roll announced for each grading period if he or she has an average of “B” (3.0) or better with no grade in any subject below a “C”.
2. An “I” (Incomplete) grade will disqualify any student from the honor roll unless the incomplete is made up promptly.

POSSIBLE FOUR YEAR TRACKS

COLLEGE PREP

English: 4 units
Math: 4 units
Social Studies 4 units
Foreign Language 2-3 units
Science (Lab) 4 units
P.E./Health: 1/2-1/2 unit
Humanities: 1 unit
Electives: 3-4 units
21 units

VOCATIONAL

English: 4 units
Vocational class: 4 units
Math: 4 units
Science: 3 units
Social Studies 3 units
P.E./Health: 1/2-1/2 unit
Electives 5 units
21 units

*Students considering attending Vantage Career Center should complete 2 English, 2 Math, 2 Social Studies, 2 Science, Health/P.E. careers and financial literacy, and a minimum of 11 total credits by the end of their sophomore year. Students with deficiencies in any of the above could still qualify for Vantage if deficiencies don't exceed 2 credits.

College Admission Requirements

Each state university (excluding Central State University, Shawnee State University and Youngstown State University) will only admit Ohio students if they have completed the Ohio Core curriculum. A student will be exempted from this requirement if one of the following applies:

- The student has earned at least ten semester hours, or the equivalent, at a postsecondary institution except a state university.
- The student met the high school graduation requirements by successfully completing an individualized education program.
- The person is receiving or has completed the final year of instruction at home or graduated from a non-chartered, nonpublic school in Ohio, and demonstrates mastery of the academic content and skills in reading, writing, and mathematics.
- The person is a high school student participating in the post-secondary or another dual enrollment program.
- The student graduated from high school in another state and has completed a curriculum equal to the Ohio Core, or has demonstrated mastery of the academic content, or is seeking admittance to the university as an international student.
- The student did not graduate from high school, but has completed a GED and demonstrated mastery of the academic content. More than twelve months must have elapsed since the student attended high school.
- Any student demonstrating mastery of some, but not all, academic content of the Ohio Core may be admitted on a case by case basis at the discretion of the university, so long as the university develops and implements a remediation plan for the students designed to achieve mastery of all Ohio Core content.

Technical School Requirements

Most schools require the applicant to be a graduate of a high school or have an equivalent diploma of graduation with preparation in related fields of that school.

Employment Opportunities

Most industries are seeking people with a completed high school education and evidence of good work records. Employers are interested in the pattern of studies taken, school citizenship, attendance record, rank in class, references and attitude toward work.

SCHEDULE CHANGES

The courses selected this spring will determine the schedule of classes for the next school year. These course selections are binding following the verification by parents/guardians. There will be no schedule changes after school begins unless a Student Schedule Change form is completed. All schedule changes must be made within the **first five days**, starting with the first day of school. A student who drops a course after this date will result in a WF (withdraw/fail) grade, which will impact GPA and will remain on high school transcript. Changes that have to be made will be done so according to the following guidelines:

- 1) Insolvable conflict; two courses offered in the same time slot,
- 2) Failure of required subject,
- 3) Procedural errors: Error in computer print-out. Omission of a required class or credit for graduation due to an oversight,
- 4) Students may substitute another class for a course completed outside of the regular classroom, and
- 5) Course cancellation.

Any student dismissed from a course for disciplinary or other reasons will be given a failing grade in the course. This grade will be entered in the student's grade accumulation as failed. If the student receives the permission of the instructor, school counselor, and principal to drop a course, he will simply be marked as withdrawn without an academic grade recorded.

Fees. All students will be charged a \$51.00 fee. (\$10.00 class dues, \$8.00 Agenda Book, \$8.00 technical fee, and \$25.00 Chromebook fee). Freshmen are charged \$17.00 for Career Pathways I workbook. Seniors are charged an additional \$26.00 for the graduation gown rental and cap/tassel. Students on free lunches may be eligible for a waiver on Chromebook fees.

COLLEGE CREDIT PLUS

College Credit Plus allows academically talented students in grades 7-12 to apply for admission to any Ohio public or participating private college. The program is intended to provide expanded opportunities for appropriately qualified students to experience coursework at the college or university level and receive high school and college credits while in high school.

Enrollment

- Students and parents/guardians must attend a College Credit Plus orientation meeting at DJHS
- **By April 1 of each year**, the student and his/her parents must sign the Notice of Intent and CCP School Contract to participate in the CCP program. Failure to do so will exclude them from participation in CCP.
- Students must apply to the university in which they want to take courses. Each college or university will have their own individual application forms, processes, and procedures that must be followed to be admitted into each program.
- Students must meet the admissions requirements of the participating college or university and must demonstrate college-readiness scores on either the ACT, SAT, or other placement tests selected by the college or university.
- CCP courses may be taken at DJHS, at a college where they have been admitted, or in online courses offered by the college.

Eligibility Criteria

- The college will admit students based on their college-readiness in one or more subject areas.
- A student may not take more than 30 CCP hours per academic year and not more than 120 CCP hours in high school.
- Students may be limited to the number of CCP courses they may take depending on the high school courses they are taking.
- All CCP course grades will appear on the student's HS transcript and computed into their GPA. Classes failed or WD with an "F" will receive an "F" on the HS and college transcripts and will be computed into the HS and college GPA.
- Students enrolled in CCP courses are expected to follow the rules and regulations set by the college/university they are enrolled in, including the drop/withdrawal procedures.

Financial Arrangements

- There is no cost to students for participating in CCP at any Ohio public college/university. If students choose to attend a participating private college, any fees, in accordance with state law, are the responsibility of the student.
- If the student does not receive a passing grade the district may seek reimbursement.

COURSE DESCRIPTIONS

AGRICULTURAL EDUCATION

AG SCIENCE I - Course 174

(Agriculture, Food, and Natural Resources) This is the first course in the Agricultural and Environmental Systems career field. It introduces students to the pathways that are offered in the Agricultural and Environmental Systems career field. As such, learners will obtain fundamental knowledge and skills in food science, natural resource management, animal science and management, plant and horticultural science, power technology and biotechnology. Students will be introduced to the FFA organization and begin to develop their leadership ability. **No prerequisite 1.00 Credit**

AG SCIENCE II - Courses 274

(Animal & Plant Science) Learners will develop business leadership, problem-solving and communication skills in relation to the science and technology of animals. Students will learn responsible animal management principles and routine husbandry practices in relation to animal welfare and behavior. Learners will identify and describe the anatomy and physiology of monogastric and ruminant organisms as it applies to nutrition, reproduction, and animal health. Learners will investigate animal genetics and how it impacts principles of animal improvement, selection and market. **Prerequisite: AG Science I 1.00 Credit**

****Successful Completion of AG Science I and AG Science II = 1 Science Credit****

AG BUSINESS I - Course 376

(Communications and Leadership) (SAE included) Students will analyze attributes and capabilities of those in leadership positions and develop their communication and leadership skills in authentic situations. The course prepares students to apply journalistic, communication and broadcasting principles in development, production, and transmission of agricultural and environmental systems information. This course starts at 7:30AM. **Prerequisite: AG Science II 1.00 Credit**

(Mechanical Principles) Students will engage in the mechanical principles utilized in animal and plant production systems. They will learn electrical theory, design, wiring, hydraulic and pneumatic theory, along with metallurgy in relation to hot and cold metals. Students will apply knowledge of sheet metal fabrication applicable to the agricultural industry as well as identify, diagnose, and maintain small air-cooled engines. Throughout the course, students will learn critical components of site and personal safety as well as communication and leadership skills. **Prerequisite: AG Science II 1.00 Credit**

*******Communication & Leadership will be an every other year rotation with Mechanical Principles*******

AG BUSINESS II - Course 476

(Business Management for Agricultural and Environmental Systems) (SAE included) Learners will examine elements of business, identify organizational structures, identify and apply management skills. Learners will develop business plans, financial reports and strategic goals for new ventures or existing skills. Learners will use market concepts to evaluate the marketing environment and develop a plan with marketing channels, product approaches, promotion and pricing strategies. Learners will practice customer sales and apply concepts of ethics and professionalism while understanding related business regulations. This course is offered before school, starting at 7:30AM. **Prerequisite: AG Business I 1.00 Credit**

AGRICULTURAL AND ENVIRONMENTAL SYSTEMS CAPSTONE - Course 474

The capstone course is an opportunity for students to solve problems and demonstrate that they have achieved the requisite knowledge and skills in their chosen agricultural and environmental systems career field pathway. The course is designed to assess cognitive, affective, and psychomotor learning and to do so in a student-centered and student directed manner. The capstone requires the application of learning to a project that serves as an instrument of evaluation. **Prerequisite: Must be enrolled in AG Business II 2.00 Credits**

FOREIGN LANGUAGE

SPANISH I - Course 117

This course focuses on basic vocabulary, grammar, and pronunciation of the Spanish language. Students will read and listen to the language as well as speak and write. Language production is limited to sentences, brief conversations, and short paragraphs in the present tense. Throughout the course, students are introduced to the geography and culture of Spanish speaking countries. **No prerequisites 1.00 Credit**

SPANISH II - Course 217

This course continues the expansion of vocabulary and grammar of the Spanish language. Students expand reading, writing, listening, and speaking skills to include progressive, past and future tense verbs. Language production expands to more detailed conversations and lengthier paragraphs. Throughout the course, students continue studying the culture of Spanish speaking countries. **Prerequisite:** Earn a C - or higher in Spanish I **1.00 Credit**

SPANISH III - Course 317

This course advances students' comprehension and production of the Spanish language. Students will expand vocabulary on topics previously learned as well as more complex grammatical structures including conditional statements and fundamental understanding of the subjunctive. More emphasis will be placed on production at this level. Students will be introduced to lengthier authentic sources of input such as literature and film.

Prerequisite: Earn a C - or higher in Spanish II **1.00 Credit**

SPANISH IV - Course 417

This course focuses on Spanish language production and comprehension. Students will have the opportunity to develop the use of all four language skills: reading, writing, speaking, and listening in a variety of authentic situations. Students will continue to acquire vocabulary, develop more sophisticated language usage, and explore authentic sources of input. There is some flexibility based on the interests of the students. **Prerequisite:** Earn a C - or higher in Spanish III **1.00 Credit**

SPANISH FOR NATIVE SPEAKERS I-IV

This course is tailored to the unique interests and needs of the native speaker. Students will be integrated into a Spanish course for English speakers, but the focus will be on language use. Students will be expected to share their culture and Spanish language knowledge with peers. Native Spanish speakers who also qualify for ESL services will be supported in both English and Spanish.

Prerequisite: Native Speaker of Spanish **1.00 Credit**

HEALTH AND PHYSICAL EDUCATION

ATHLETIC or BAND OPTION PE - Course 189

In accordance with ODE, our board has adopted a policy to excuse HS students from the physical education requirement if they, during high school, participated in interscholastic athletics, marching band or cheerleading for at least two full seasons. Students who choose this option will not earn PE credit but they will be excused from the Physical Education requirement. **No Credit**

PHYSICAL EDUCATION FLEX CREDIT - Course 188FC

Students will develop their own Physical Education program that will be approved by Mr. Brinkman or Mrs. Heringhaus. Detailed documentation will be required. This physical education course is designed to help students develop a healthy lifestyle which includes physical activity. **.5 Credit**

HEALTH - Course 257

Required for sophomores. In this course, students will analyze personal physical, emotional, social and intellectual growth for a healthy lifestyle. Counts as ½ credit of health, which is a graduation requirement. **.5 Credit**

LANGUAGE ARTS

ENGLISH I - Course 111

In this required freshman course, students will reinforce their skills by writing formal argumentative essays about the elements of short stories, class novels, and other required readings. Throughout the reading of this literature, theme, setting, characterization, plot, and conflict are stressed. **1.00 Credit**

HONORS ENGLISH I - Course 110

This course covers the same or similar content as College Prep English I with the expectation that students in this course will approach the course with high expectations of themselves and that they will strive for excellence in their work. **Required:** 8th grade teacher recommendation **1.00 Credit**

ENGLISH II - Course 211

This course consists of a review and continuation of the grammar skills learned in English 9. Students will read class novels, in which, reading and analytical skills will be the primary focus. Additionally, writing will be stressed through various essays and long-form prompts. **This course requires a state-mandated End of Course Exam. 1.00 Credit**

HONORS ENGLISH II - Course 210

This course covers the same or similar content as Course 211 with the expectation that students in this course will approach the course with high expectations of themselves and that they will strive for excellence in their work. Students must have satisfactorily completed a previous Honors course in English or must have a recommendation from their previous English teacher to be allowed in this course. **This course requires a state-mandated End of Course Exam. Prerequisite:** Honors English I **1.00 Credit**

ENGLISH III - Course 311

The major concentration in this course is learning to read and write effectively and critically. The reading selections are from American Literature, which includes short stories, poetry, essays, and dramas from Native American writing to the Modern Era. A novel from an American author will be read and discussed. A formal research paper using the techniques of MLA Style. **Juniors will be taking an ACT test in the spring;** this course will continue to build their English and Reading skills. Expectations are that students in this course will meet college-readiness standards in both the English and Reading sections of the ACT. **1.00 Credit**

HONORS ENGLISH III - Course 310

Honors English III has high expectations for students to complete and strive for excellence in their work. **Juniors will be taking an ACT test in the spring;** this course will continue to build their English and Reading skills. Expectations are that students in this course will meet or exceed college-readiness standards in both the English and Reading sections of the ACT. **Prerequisite: Honors English I, II 1.00 Credit**

ENGLISH IV - Course 411

This course is designed to prepare students in literature appreciation, critical thinking and analysis, grammar, composition, research, and general communication. This course is intended to challenge and elevate the student's language arts abilities through the study of British Literature. **1.00 Credit**

AP LITERATURE & COMPOSITION - Course 415

This course combines the close study of nonfiction prose with the opportunity to write in-depth about a variety of subjects. Students will read a variety of complex texts and analyze the interactions among the author's purpose, audience expectations, and rhetorical strategies. In addition, students will craft expository, analytical, and argumentative writing. The goal will be to prepare students for the AP Language & Composition exam in May. The approximate fee for the AP exam will be \$80.00. **Prerequisite:** Honors English III and Teacher Recommendation **1.00 Credit**

FILM STUDY - Course 316

Film studies is a course intended to familiarize students with the particulars of film history as well as to provide them with a chance to analyze film as a visual art form. This course should appeal to any and all students who love to watch movies and discuss them. English elective that is open to juniors and seniors, **1.0 Credit**

MATHEMATICS**PRE-ALGEBRA - Course 124**

The focus of Pre-Algebra is to build the foundation necessary for success in Algebra I. Students will become familiar with the language of algebra, solving and graphing equations and inequalities, operations with rational numbers and integers, ratio and proportion, percent, statistics and graphs, probability, applying algebra to geometry, measurement, basic right triangle trigonometry, and polynomials. Open to freshman only **1.00 Credit**

ALGEBRA I - Course 121

The basic operations of elementary mathematics and variable replacement for numerals, techniques of equation solving, practical applications through the use of word problems, solving inequalities, basic graphing, and polynomial expressions will be covered. Additional topics include simplifying, solving and factoring of polynomial expressions. This course is required for Geometry or Algebra II. **This course requires a state-mandated End of Course Exam. 1.00 Credit**

ALGEBRA 101 - Course 126

The basic operations of elementary mathematics and variable replacement for numerals, techniques of equation solving, practical applications through the use of word problems, solving inequalities, basic graphing, and polynomial expressions will be covered. Additional topics include simplifying, solving and factoring of polynomial expressions. This course is required for Geometry or Algebra II. Open to sophomores or credit recovery only. **This course requires a state-mandated End of Course Exam. 1.00 Credit**

GEOMETRY - Course 224

This course includes material about parallel and perpendicular lines, angles, logic, right triangles, basic trigonometry, quadrilaterals, polygons, transformations, circles, three-dimensional figures, and proofs. A good background in Algebra is essential for this course. **This course requires a state-mandated End of Course Exam. Prerequisite: Algebra I 1.00 Credit**

GEOMETRY 101 - Course 225

This course includes material about parallel and perpendicular lines, angles, logic, right triangles, basic trigonometry, quadrilaterals, polygons, transformations, circles, three-dimensional figures, and proofs. A good background in Algebra is essential for this course. **This course requires a state-mandated End of Course Exam. Prerequisite: Algebra I 1.00 Credit**

ALGEBRA II - Course 321

This course will review the basic procedures learned in Algebra I. Additional topics include: systems of linear equations and inequalities in 2 or 3 variables, radical expressions and equations, polynomial functions, exponential functions, and rational functions. Much emphasis is placed on how various types of equations relate to their graphs. Students will need to purchase a TI 84 graphing calculator for this class. Rentals available \$20 fee. **Prerequisite: Algebra I and Geometry 1.00 Credit**

ALGEBRA 201 - Course 320

The course will review the basic procedures learned in Algebra I. Additional topics include radical expressions, rational expressions, polynomial functions, and exponential functions. **Prerequisites:** Algebra I and Geometry **1.00 Credit**

CCP COLLEGE ALGEBRA/HS Trigonometry - Courses 8209 & 428

Students will earn 4 college credits through Rhode State College. This course will cover equations and inequalities, graphs and equations of lines, functions including quadratic functions and composite functions, inverse functions, polynomial and rational functions, exponential and logarithmic functions, systems of equations, conic sections, and sequences and series. **Prerequisite:** Algebra II with a grade of B or higher **1.25 Credits**

MATH ANALYSIS - Course 429

This course will cover equations, inequalities, graphs and equations of lines, quadratic functions and composite functions, inverse functions, polynomial and rational functions, exponential and logarithmic functions, systems of equations, conic sections, and sequences and series. **Prerequisite:** Algebra II **1.00 Credit**

ADVANCED PLACEMENT STATISTICS - Course 427

Students are introduced to the major concepts and tools for collecting, analyzing and drawing conclusions from data. The four broad conceptual themes are Exploring Data, Sampling and Experimentation, Exploring random phenomena using probability and simulation, and Statistical Inference. Successful completion of the AP Statistics exam in May could earn college credit. Approximate AP exam will be \$85. **Prerequisite:** Algebra II **1.00 Credit**

ADVANCED PLACEMENT CALCULUS - Course 426

This course will include the following topics: Analysis of graphs, Limits of functions, Continuity, Derivatives, Applications of derivatives, Interpretations and properties of definite integrals, Applications of integrals, The Fundamental Theorem of Calculus, Techniques of antidifferentiation, and Applications of antidifferentiation. The approximate fee for the AP exam will be \$85.00. **Prerequisite:** Math Analysis or College Algebra **1.00 Credit**

MATHEMATICS THROUGH MODELING WITH STEM/SENIOR MATH - Course 423

In this course, problem based learning of mathematics in real life applications is emphasized. Activities will involve the application of mathematical concepts and practices, as well as critical thinking, and problem solving skills. Activities will develop mathematical practices and will enhance understanding of, and facility with, topics from Algebra II, and select topics from statistics and finance. Mathematics in real life applications is emphasized. Students will gather and analyze data in order to build, use, and evaluate mathematical models of real situations and phenomena. Activities will involve the application of mathematical concepts and practices, as well as critical thinking, and problem solving skills. Activities will develop mathematical practices and will enhance understanding of, and facility with, topics from Algebra II, and select topics from statistics and finance. Only open to Seniors **Prerequisite:** Algebra II **1.00 Credit**

PROJECT LEAD THE WAY (PLTW)**INTRODUCTION TO ENGINEERING DESIGN - Course 150**

This course teaches problem solving skills using a design development process. Models of product solutions are created, analyzed and communicated using solid modeling computer design software. Students dig deep into the engineering design process, applying math, science, and engineering standards to hands-on projects. They work both individually and in teams to design solutions to a variety of problems using 3-D modeling software, and use an engineering notebook to document their work. This course will be open to all grade levels, with incoming freshmen being especially encouraged to consider the program. **Prerequisites:** Students must have successfully completed Algebra I. Freshmen will have priority scheduling (if meet prerequisite) but is also open to 10th-12th graders. **1.00 Credit**

COMPUTER SCIENCE PRINCIPLES - Course 250

Using Python® as a primary tool, students learn the fundamentals of coding, data processing, data security, and task automation, while learning to contribute to an inclusive, safe, and ethical computing culture. The course promotes computational thinking and coding fundamentals and introduces computational tools that foster creativity. Computer Science Principles helps students develop programming expertise and explore the workings of the Internet. Projects and problems include app development, visualization of data, cybersecurity, and simulation. This course will be open to all grade levels. **Prerequisites:** Students must have successfully completed Introduction to Engineering Design before taking this course. **1.00 Credit**

SCIENCE**PEC (Physics, Earth Science, and Chemistry) - Course 144**

PEC is a high school introductory-level course which satisfies Ohio Core requirements (ODE, 2008). It introduces students to key concepts and theories that provide a foundation for further study in other sciences and advanced science disciplines. Physical Science comprises the systematic study of the physical world, as related to chemistry, physics and space science. Students engage in investigations to understand and explain the behavior of nature in a variety of inquiry and design scenarios that incorporate scientific reasoning, analysis, communication skills and real-world applications. **No prerequisite 1.00 Credit**

BIOLOGY - Course 241

Biology is the study of all living things from viruses, bacteria, molds, plants and flowers to protozoa, worms, insects, fish, frogs, birds and man. During the year students will make their own "slime" (pond water microcosm) culture bacteria, dissect eight different animals, and prepare microscopic slides, among many lab activities. A foundation of the cell, its structure and function is stressed as the basis of all living things. Biology students will gain chemical knowledge of life through understanding of DNA, RNA, proteins, fats, and carbohydrates. **This course requires a state-mandated End of Course Exam. 1.00 Credit**

CHEMISTRY - Course 344

This course provides the basic facts and concepts reviewed in a framework of laboratory and textual content. Material is developed on atomic structure, periodic table, chemical composition, chemical bonds, chemical equations and problem solving. Desirable laboratory skills and techniques are developed by the use of selected experiments. **Recommendation:** Students complete Geometry before taking Chemistry **1.00 Credit**

ANATOMY & PHYSIOLOGY - Course 441

This course will stress a student's ability to locate, research, and present material in a scientific fashion. This course is needed for any student wanting a background in human anatomy for either a medical related career or just for a strong science major. Designed as a college-type course, this course deals with areas such as: genetics, metabolism, biochemistry, DNA, nerve and muscle physiology, the heart and EKG's, blood, bone, liver-kidney structure, and cancer. Routine hospital tests and procedures will be

discussed along with some lab experiments. Independent science projects are required. This course is designed for seniors but allows juniors who have good science ability. **Prerequisite:** Chemistry **1.00 Credit**

PHYSICS - Course 446

This course provides the concepts of basic facts from the problem solving approach using theoretical and mathematical consideration of natural laws. Laboratory work is used to give students practical experience with matter and energy, force and motion, heat, sound, and light. **Prerequisite:** Algebra II **1.00 Credit**

GEOLOGY- Course 348

Geology incorporates chemistry, physics, and environmental science and introduces students to key concepts, principles and theories within geology. Students will explore content including the study of minerals, igneous rock, metamorphic rock, sedimentary rock. Students will also explore plate tectonics, the Earth's history, and glacial geology, and the Earth's resources. **1.00 Credit**

ENVIRONMENTAL SCIENCE - Course 349

This course incorporates biology, chemistry, physics, physical geology and introduces students to key concepts, principles and theories within environmental science. Investigations are used in this course to explain and understand the behavior of nature in a variety of inquiry and design scenarios that incorporate scientific reasoning, analysis, communication skills and real-world applications. This satisfies the Ohio Core science graduation requirements. It includes inquiry-based laboratory experiences that engage students in asking valid scientific questions and gathering and analyzing information. **1.00 Credit**

SOCIAL STUDIES

WORLD STUDIES - Course 134

The students will cover the basic facts of major themes of the 19th and 20th centuries and master the following social science skills: interpreting data, evaluating credibility of sources, analyzing bias, and checking the accuracy of facts. The class follows the academic content standards set forth by the state. The themes and skills covered in American History I will be revisited in more detail and specificity in Social Studies II. **1.00 Credit**

AMERICAN HISTORY - Course 234

The students will expand their grasp of information covered in Social Studies I. Students will use illustrations, graphs, lectures, presentations, visuals, projects, group work, and historical scenarios to heighten their knowledge of the major themes and skills. The class is geared to prepare the students for the Ohio Social Studies Test.

This course requires a state-mandated End of Course Exam. 1.00 Credit

AMERICAN GOVERNMENT/ECONOMICS - Course 434

Choice is a focus for social studies instruction at this level. How political, social, and economic choices are made; who makes them; and the effects of those choices. This is a mandatory course for juniors as it gives an overview of government and a foundation in economics. **This course requires a state-mandated End of Course Exam 1.00 Credit**

PSYCHOLOGY - Course 432

The course introduces students to the study of the behavior and mental processes of human beings. Students are exposed to the psychological facts and principles associated with each of the major subfields within psychology. Topics covered include developmental psychology, the biological bases of behavior, sensation and perception, cognition, personality, social psychology, and abnormal psychology. This course will meet the requirement for the fourth Social Studies credit for the honors diploma; therefore, students who are on schedule for earning the honors diploma will have priority in placement in this class. Social studies elective. Open to Juniors & Seniors only. **1.00 Credit**

AP PSYCHOLOGY - Course 431

Explore the ideas, theories, and methods of the scientific study of behavior and mental processes. You'll examine the concepts of psychology through reading and discussion and you'll analyze data from psychological research studies. Successful completion of the AP Psychology exam in May could earn college credit. Approximate AP exam will be \$85. Teacher approval is required. **1.00 Credit**

FINANCIAL LITERACY

FINANCIAL LITERACY - 103

This course is aligned to Ohio's New Learning Standards. It will examine the ability of individuals to use knowledge and skills to manage limited financial resources effectively for a lifetime of financial security. An emphasis will be placed on preparing students for their immediate financial future and teaching skills that will be applicable in real-world situations.

.5 Credit

ECONOMICS

ECONOMICS - 104

The course will explore the fundamentals that guide individuals and nations as they make choices about how to use limited resources to satisfy their wants, placing focus on micro and macroeconomic concepts, as well as the global economy. **.5 Credit**

ELECTIVES

APPLIED COMMUNICATIONS: YEARBOOK - Course 309

Students in this course will plan the school yearbook. This course meets as a club and may require hours outside of the typical school day. Students will be required to plan a yearbook and understand the business of a yearbook (income, expenses and budget) and the role of advertising, recognize and plan page layouts of body copy, captions, headlines, and pictures, and understand the legal issues involved.
