WHAT IS INCLUSIVE EDUCATION?

All students, regardless of any challenges they may have, are placed in age-appropriate general education classes that are in their own neighborhood schools to receive high-quality instruction, interventions, and supports that enable them to meet success in the core curriculum.

Research

Many studies over the past three decades have found that students with disabilities have higher achievement and improved skills through inclusive education.

Parents

On average, parents were somewhat uncertain if inclusion was a good option for their child but the more experience with inclusive education they had, the more positive parents of IWD were about it.

Teachers

Teachers with more experience — and, in the case of teachers, more training with inclusive education — were significantly more positive about it.

Strategies

- Use a variety of instructional formats
- Ensure access to academic curriculum
- Apply universal design for learning
