

ADDENDUM 2 – BID 23-1220
Facility Utilization Study
WALLED LAKE CONSOLIDATED SCHOOL DISTRICT

December 16, 2022

In regards to RFP 23-1220, Facility Utilization Study, this addendum will serve as a notice of Q & A from an interested bidder:

Q: Scope item 2.3.1. states that the successful bidder shall, “Perform a study of the School District’s grade level and school configurations to include a general instructional program review to include Pre-K through Age 26 grade level configuration options.”

- *Please describe the deliverable(s) the District expects from this study and how the District expects they will be utilized in the utilization study. We assume the answer includes the impact potential program changes would have on capacity but want to know what other information the District hopes to obtain from this scope item.*

A: Your assumption that the answer includes the potential impact potential program changes would have on capacity is accurate. We’re strictly looking at the capacity issues at each school relative to the current and projected district enrollment. This includes preschool and Adult Transition Program needs and capacity. Instructional program content is not within the preview of this study. Please let me know if you have any other questions.

Sincerely,
