

Dear parents/guardians,

Your district is introducing new technology to its school bus fleet to increase the safety of your students and improve communication about their locations with a solution called Tyler Drive. This solution helps drivers focus on the road, manages student location information, and provides oversight of this important part of your child's day.

Tyler Drive is a system that includes software and a tablet that is mounted near the school bus driver. It provides drivers with turn-by-turn directions to each stop on their routes, and manages student ridership, which is reported in real time back to your district's transportation office.

Safer Driving

Tyler Drive guides bus drivers with audio directions leading them to their scheduled stops. This eliminates traditional paper route sheets and the dangerous distracted driving caused when drivers try to read the directions to their next stop. Tyler Drive can also provide visual directions or can be set to black out the screen when the bus is in motion. The tablet is mounted so that it does not block the driver's view of the windshield or mirrors. This system makes it easier for bus drivers to keep both eyes on the road and both hands on the wheel.

Student Scan Cards

At each stop, Tyler Drive displays the names and photos of students who should be boarding or disembarking at that location. Your district's students will be issued Radio Frequency Identification (RFID) scan cards, which will act as their IDs when boarding and leaving the school buses. No student information is stored on the cards.

Student scan cards

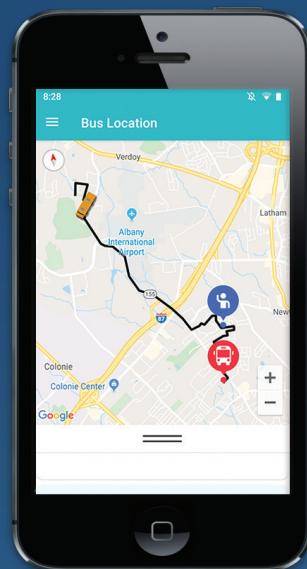

This card scan system helps to ensure the security of every child. Knowledge of where and when a student boarded or left a bus allows your district to proactively manage student safety, address concerns, and prevent errors such as students boarding the wrong bus.

Real-Time Access for Parents

The Traversa Ride 360 mobile app for Apple and Android devices can help to ensure that your students never miss the bus again. This portal allows parents and students to access their own secure data for bus stop locations, routes, and pick up times. This app uses the GPS in Tyler Drive to let users know when to expect their buses each day. Search the app store for "Traversa Ride 360" to register.

Safety, Security, Visibility

Your district is focused on providing safe transportation for its students. By adding Tyler Drive to its buses, they show an ongoing commitment to that safety, and to providing parents and guardians with the information you need to feel secure and informed.
