A Better Experience

“I think Skyward is the most advanced student management system available at this time. Qmlativ has resulted in a great system with all of the features we anticipated – and more.”

- Kevin Meyer, Superintendent at Central Community HSD 71, IL
Qmlativ customer since 2014

Qmlativ™ Education Management System, the next evolution of Skyward® technology, is the epitome of a better SIS and ERP experience. Built to leverage the latest technology, it's more than just a promise of features and functionality.

This SQL-based platform combines an enjoyable user interface with preemptive support measures and a focus on the growth and development of every user.

The most innovative platform the Skyward community has ever seen and most advanced system available, Qmlativ has been used by early adopters since 2014.

Based on feedback from our early adopters and a number of current customers, Qmlativ has been developed to ensure your needs are met today and well into the future.

Simple Design

- Logical navigation, simple shortcuts and sensible defaults
- User-centric design is uncluttered and customizable
- Global search from anywhere within the solution

You'll enjoy a better experience from the moment you log in. Qmlativ's clean, customizable interface and commonsense navigation ensure that information overload doesn't get in the way of improving district outcomes. With the simple design and navigation, even the most non-technical users can take full advantage of its power.

Flexible Architecture

With Qmlativ, gone are the days of struggling to keep up with the rapid pace of change. You can tailor your solution to meet your needs and do more without paying for custom changes. With a responsive design at your fingertips, you can now take full advantage of your technology without having to worry about what kind of device you are using.

- Field-level customization to support your unique needs
- Designed to adapt to various mobile devices
- Built to evolve with future-ready enhancements

Key Benefits of Qmlativ

- Applies the latest technology and design to provide a user-centric experience that adapts to your specific needs.
- Uses system architecture that enhances security and interoperability based on a SQL environment.
- Features a forward-thinking user interface that capitalizes on current environments, from multi-screen desktops to mobile platforms.
- Includes embedded customization and workflow tools to meet your unique needs for managing important tasks and processes.

Powerful Reporting and Analytics

When running reports, most systems require users to pull data from various tables, then cut, paste, and rearrange to create the report they actually want. Qmlativ's built-in report writer easily generates the reports you need so you and your staff can make better-informed decisions.

- Modern look and feel that is easy to customize
- Create and share report templates with other Qmlativ districts
- Able to customize any canned reports

With report manager you can run key financial reports

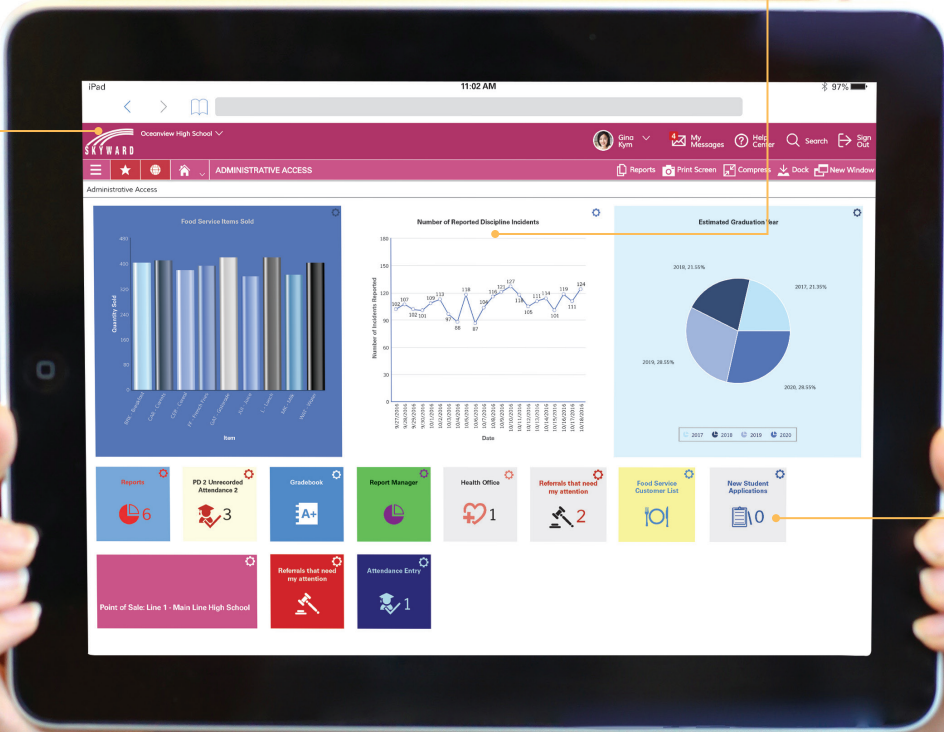

Unique Personalization

You'll enjoy the personalized touch that Qmlativ offers. See only the information you need, only when it's necessary. If you see a report or a measurement you like, snap it to your dashboard so you never have to go looking for it again.

Choose from several themes to customize your dashboard

Create graphs, charts and data points on the fly via personal tiles

Favorites give you one-click access to your most frequent destinations

Self-Service Support

The Skyward difference begins and ends with the human element. We don't just want to be the people who give you flashy new technology; we want to be the driving force behind a more productive, collaborative, and successful learning environment. Available exclusively with Qmlativ, our Help Center is the ultimate in self-service support.

- **Intelligent Search Capability** that delivers the content relevant to your specific role
- **Multimedia Tutorials** offering quick answers to our most commonly asked questions
- **Interactive Flowcharts** that improve transparency and provide a big picture view of the entire process
