

Accelerate instruction with the Star Assessments to Nearpod connection

Give teachers the answer to “What do my students need next?”

Nearpod makes Star data actionable in classroom instruction.

Teachers differentiate instruction using high-quality lessons, videos, and activities tied directly to the skills and standards identified by Star data and deliver those lessons with a click of a button.

The Star to Nearpod connection turns data into insights, giving teachers exactly what they need to address every student’s need.

Star Assessments

Classroom insights that make a difference

Knowing the class's strengths and weaknesses is not always enough. By aligning student assessment results to instructional materials, teachers get an engaging, interactive, and targeted plan aimed to improve student outcomes for all students.
