

MENTAL HEALTH INTERVENTIONS SPECIALIZATION

THE FACTS

The Mental Health Interventions Specialization is a 15-credit program open to Psychology majors that integrates a series of mental health focused coursework. Students can opt to concentrate on children and adolescents (Child Focus) or adults (Adult focus). The course sequence is parallel across both populations starting with typical and atypical development followed by diagnosis, characteristics and treatment of psychological disorders.

This program is only available to Psychology majors. Students can only select one focus (Child or Adult).

CHILD FOCUS

- Psychological Assessment
- Child and Adolescent Psychology
- Child Psychopathology
- Child Interventions
- Psychopharmacology

ADULT FOCUS

- Psychological Assessment
- Adult Development and Aging
- Psychopathology
- Counseling and Psychotherapy
- Psychopharmacology
