

We Need Your Help To Make The Safe Routes To School Plan For Your School!

THIS PLAN WILL

1. Use public input to identify safety concerns and opportunities on routes where children walk or bike.
2. Recommend safety improvement projects.
3. Position schools to secure funding to make those improvements.

Why Safe Routes to School

Within the span of one generation, the percentage of children walking or bicycling to school has dropped significantly

48% 1969

13% 2009

Kids are not getting enough physical activity

Roads near schools are congested, decreasing safety and air quality for children

What you can do today

Visit the website to

Take the survey. Use the interactive map.

What you can do tomorrow

Call for Volunteers

This spring, staff and volunteers like you will meet to perform a Walk Audit informed by the input we get from the website.
