

## **Center For Early Learning Curriculum**

Too many people believe that curriculum only benefits older children. A strong curriculum during the PreK year is vital to prepare children for kindergarten and to aid in their development. The curriculum implemented at the Center for Early Learning helps foster a love of learning in children by teaching them in fun and exciting ways. The best educational programs don't force kids to only sit still and listen, they allow them to play games, sing songs and make art. Find out more below:

**The Georgia Early Learning and Development Standards (GELDS)**-Our curriculum and learning activities support the Bright From the Start Standards [found here](#).

**Fundations**-Early literacy is supported through the use of **Fundations**. The Foundations Pre-K Activity Set supports students' growing understanding of letters, sounds, and beginning letter formation. Reading comes alive through literacy-rich activities during center time and with classroom read-aloud time.

**Eureka Math**-Numbers should add up to more than a right answer. They should inspire aha moments and joyful connections. **Eureka Math** set a new standard for rigor, coherence, and focus in the classroom beginning in PreK so students gain a deeper understanding of the why behind the numbers, all while making math more enjoyable to learn and teach.
