You Science

One of our most valuable tools for helping students with their college and career plans is *You Science*. *You Science* is an aptitude-based program that students use throughout middle school and high school to understand their strengths and to use that information to plan for their middle and high school classes as well as post-secondary plans.

Parents often have questions about how they can help their student(s) make the best use of their *You Science* results. Here are some links for a parent overview:

- [High School Parent Letter](#)
- [High School Parents Overview](#)
- [Middle School Parents Overview](#)

If you'd like to know how to access your student's *You Science* results, please sit down with them and follow these steps:

1. Log in to Infinite Campus with their student account
2. Click on "SLDS" (you may have to click "More" to get to SLDS")
3. Click on Career Plan
4. Click on "Go to *You Science*"
5. This will take you to your student's *You Science* account. From there, you can access their *You Science* results as well as career matches. Career matches can be sorted by aptitude, interest, or "overall fit" which takes both aptitude and interest into account.

Aptitudes are valuable information for helping students choose CTAE pathways within the JHS Schools of Excellence as well as planning for college and career after high school.

Although students have classroom lessons where they can look at their *You Science* results, this video may be a helpful refresher:
