COMPUTER APPLICATIONS

Assistive Technology

Course Code: ~Com130

Description: In the Assistive Technology course, students learn about the assistive technology available on a personal computer and available online through open access for their appropriate uses, focusing especially on academic tasks. Basic steps for identification of accessibility, range of motion issues, assistive technology devices available on new computers, and various operating systems are demonstrated and utilized. Students also learn to identify the assistive technology software that best suits their own learning styles and needs, as well as procedures for finding free software on the Internet.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Basic Tech Skills

Course Code: ~Com115

Description: The Basic Tech Skills curriculum focuses on building computer and keyboarding skills while using Microsoft Office programs and Google Workspace applications. Students work on Microsoft Word, Excel and PowerPoint and Google Docs, Slides and Sheets. Students also complete several assignments in each of the above software programs and learn how to attach and send as an attachment, edit their work, and also to share a document using the online resources. Students learn, while doing, the strengths and challenges inherent in each software package and compare results. The desired goal is for students to achieve an improvement in all basic computer and technological skills and to integrate these skills in the completion of schoolwork. Additional lessons on the topics of cybersecurity, copyright and fair use practices, and citation of resources are included when needed.

Prerequisites:

Permission Required: No

Grades: 8,9,10

Credits: 3

Cybersecurity

Course Code: ~Com155

Description: Cybersecurity is a one-term class to train students who have a computer background in pertinent skills, practices, and information about cybersecurity. The goal of the class is to raise awareness and provide background information for career paths in cybersecurity. Students will learn about the K-12 National Cybersecurity Standards that were written in 2020 and are in use. These guidelines are sourced from www.cyber.org. Students will engage in practical hands-on activities for cyber hygiene and password protection, as well as learn about threats, attacks and vulnerabilities encountered in a cyber world by reviewing case studies.

Prerequisites: Previous computer applications or computer science coursework

Permission Required: No

Grades: 10,11,12

Credits: 1

Excel Only

Course Code: ~Com140

Description: This is a one-term class in the Computer Applications Department that covers the use and integration of Excel in schoolwork and daily life. Students will work with this program making spreadsheets, charts, calculating financial information, etc. Students will use real data and then integrate skills learned into other classes like math and the sciences.

Prerequisites:

Permission Required: No

Grades: 9,10,11,12

Credits: 1

Internet Research

Course Code: ~Com110

Description: In the Internet Research course, students learn to successfully search for information on the Internet and understand the basic concepts behind the processes that search engines use to look for websites on the Internet. Several major search engines, such as Google and MSN, are used to find relevant information based on keyword search techniques. Several websites are presented that exemplify one of the four traits: accuracy, currency, bias, and persuasion. In this course students learn and apply a variety of invention strategies for research and build their creative confidence as academic researchers. Students apply search skills to complete a research paper that demonstrates their citation skills for websites utilizing the format of MLA or APA standards.

Prerequisites:

Permission Required: No

Grades: 10,11,12

Credits: 3

Keyboarding

Course Code: ~Com120

Description: In this one term course, students improve upon their initial keyboarding skills, based on a short diagnostic evaluation provided in the Mavis Beacon keyboarding program. Students will use the same program to practice keyboarding for approximately twenty minutes per class period, gradually developing their abilities. Students who progress to advanced levels of keyboarding will then engage in transcription and dictation lessons. Each student's progress will be evaluated twice per week and scored for accuracy and adjusted words per minute.

Prerequisites:

Permission Required: No

Grades: 8,9,10

Credits: 1

Web Page Design

Course Code: ~Com100

Description: In the Web Page Design course, students learn the basics of Web Page Design and HTML code, including: page color, font type and size, tables, navigation links, and image insertion. Students will design a website in HTML, meeting the basic Website Accessibility Guidelines. Students will also

be introduced to web design ethics, or the idea that web designers are accountable to the larger social, environmental, political, and economic contexts in which the design will circulate. Students will have opportunities to think through their web design choices, first as design practitioners or makers and second as consumers or users of a design.

Prerequisites:

Permission Required: No

Grades: 10,11,12

Credits: 3

COMPUTER SCIENCE

3 Design Software: Introduction

Course Code: ~Csc130

Description: Students start using Tinkercad, 3D design software for beginners, and then progress to Fusion 360, a professional-level software, when they are ready to make more complicated shapes. In three terms, they will progress from the basics of 3D design to more advanced techniques. In this course, they will design and print objects of their own choosing, but they will be encouraged to make one object that could help a staff member on campus (e.g., a visual aid for a classroom, a special container for an unusual tool, etc.).

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

3D Design Software: Short Introduction

Course Code: ~Csc120

Description: Students start using Tinkercad, 3D design software for beginners, and then progress to Fusion 360, a professional-level software, when they are ready to make more complicated shapes. In one term, they will learn the basics of 3D design and 3D print several objects of their choosing.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

3D Design Studio: Individual Selection

Course Code: ~Csc160

Description: Before the course starts, students must select their own 3D design project and receive approval from the teacher, who will gauge whether or not the project can be accomplished in one term by the proposing student. This will allow that each student can hit the ground running on the first day of class so they have the best chance to finish their project in one term.

Prerequisites: 3D Design Software: Introduction or 3D Design Software: Short Introduction

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

3D Design Studio: Post-Processing Superhero Masks

Course Code: ~Csc155

Description: To make your 3D printed objects look professional, you have to post-process the objects once they are removed from the 3D printer. Learn how to polish, wet sand, and paint the materials used in 3D printers so they lose the subtle printer lines, have the proper texture, and reveal realistic coloring. During the first term, students will select a figurine (about 8 inches tall), 3D print it, and then go through the post-processing steps to improve the look of their characters. During the final two terms, students will select a superhero's headgear (Batman's cowl, Kylo Ren's helmet, etc.) and go through the process again. We will download pre-designed superhero headgear and 3D print it. The challenge will be to post-process it so it looks like what the headgear looks like in the movies.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Advanced 3D Design: Gears and Motion

Course Code: ~Csc180

Description: After learning many skills in the introductory class for making a single objects, students will take on the challenge of creating parts that move relative to each other using gears or some other mechanism of motion. This task requires a great deal of precision in the size and shape of the parts and how they fit together.

Prerequisites: 3D Design: Short Introduction or 3D Design: Introduction

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Advanced Computer Science

Course Code: ~Csc200

Description: This class covers the main ideas in topics such as classic Artificial Intelligence (AI), Machine Learning (ML), databases, quantum computing, and cryptosecurity. Small programming tasks will focus on implementing the main algorithms and processes within each topic. This class has a prerequisite of "Advanced Programming in Python."

Prerequisites: Advanced Programming in Python

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Animation: Introduction Using Blender

Course Code: ~Csc135

Description: Students use Blender, a professional-level animation suite, to learn the basics of making 3D objects and then rendering them using different lighting and textures. Next, they learn to move the objects to make a true animation with some simple objects. Finally, when students reach a limit of what they can absorb in Blender—because it is a complex program—they will move to another animation

program called Alice, which makes it much easier to achieve motion through an underlying system of computer coding. The combination of these two animation programs will provide students a solid introduction to animation.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

App Creation

Course Code: ~Csc165

Description: Using MIT App Inventor (<https://appinventor.mit.edu>), in the first two weeks of the course, students will make a very simple app for an Android device. The purpose of this first project is to give students experience with every step of the app creation process. During the remaining weeks of the course, students will carefully plan out an app that can potentially impact people's lives in their community. We will look at a collection of apps that have been created and how these apps help the people in their targeted communities. Then, students will research the needs of their target community and find a need that could be helped by the existence of an app. For example, maybe an app can quickly calculate your carbon footprint. Maybe an app can help students who have trouble organizing themselves in a particular way. Some apps might require the use of Artificial Intelligence (AI) software, specifically machine learning, in order to classify images or understand spoken language. The MIT App Inventor has several of these AI modules already incorporated into their app creation process. Finally, students will deploy their app, observe the intended users operating it, listen to their feedback, and make alterations to satisfy the intended users.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Entrepreneurial Product Development

Course Code: ~Csc185

Description: Following their interests, students will select a product area, find a gap, and create an original product to fill that gap. At the end of the course, students will have created a prototype of their product. Along the way, students will learn aspects of intellectual property law, business law, market research, design, manufacturing, and marketing.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Extended 3D Design

Course Code: ~Csc190

Description: This course is for students who would like more class time to improve their 3D design skills and challenge themselves to design more complicated objects. Students will have already taken "3 Design Software: Introduction" or "3D Design Software: Short Introduction" before taking this current class.

Prerequisites: 3 Design Software: Introduction or 3D Design Software: Short Introduction

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Introduction to Coding with Python

Course Code: ~Csc110

Description: This class is for students with no coding experience who are interested in standard programming languages used by professional programmers. Python is the most popular coding language among computing professionals and the most user friendly of the standard languages. Students will learn to draw precise geometrical shapes, learning or applying their pre-existing knowledge of geometry. They will use their coding skills to recreate famous company logos, fractals, and other interesting shapes. They will also learn the general coding skills of manipulating integers, real numbers (floating point), and strings of characters (text). Time permitting, students will learn some basics of several data structures such as lists and arrays.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Stop-Action Animation

Course Code: ~Csc175

Description: Stop-Action Animation is an early form of animation in which a still picture of a physical scene is taken, small movements in the scene are made, and another still picture is taken. This process is repeated to create the illusion of motion when all the still pictures are played in sequence. It is a very satisfying art form for students who are into art and crafts. In this course, students will make several short animations of varying lengths. Some will involve common objects (e.g., coins, shoes, etc.). Others will involve making a physical scene with craft items (e.g., construction paper, pipe cleaners, clay, Legos, etc.) or 3D printing some of the needed items. The animation app is very easy to use requiring only a few minutes of instruction.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Video Editing

Course Code: ~Csc205

Description: Students will learn from scratch or improve upon their video editing abilities. They will have the choice to use either iMovie or DaVinci Resolve for their editing tool. Finally, they will also learn some special effects for video using Adobe's After Effects.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Video Game Creation

Course Code: ~Csc195

Description: Don't just play video games; start making your own. Using the Unreal Engine, students will learn how to make their own video games using the same platform that was used to make Fortnite, the most popular game in the world in 2021. Students will be able to make professional-looking game

worlds and learn how to code in Blueprint, a visual scripting system. Using Blueprint, students will learn all the programming constructs they would normally learn in any high-level programming language (e.g., Python, C++, Java, etc.). The main difference is that Blueprint presents the constructs in a visual manner. For those students who choose the longer option, they will progress to using 3D design software to create the characters and props for their game world. These objects will be designed in Fusion 360 and then imported into Unreal in order to populate the student's game world. In this way, we combine two major skills: programming in Unreal and 3D designing in Fusion 360. Further, time permitting, students will also work with motion capture suits and camera to create assets for Unreal and a virtual reality (VR) system to try to turn their game settings into VR worlds.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3,6

DIVERSITY AND SOCIAL JUSTICE

Current Events in Social Justice and Diversity/Inclusion Practices

Course Code: ~Div130

Description: This one term course explores current events as they relate to social justice movements and awareness. Student interest drives this course; students are encouraged to bring a willingness to look at various perspectives of current events as well as historical contexts.

Prerequisites: Social Construction of Identity

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Driving the Green Book

Course Code: ~Div150

Description: The Driving the Green Book course will look at the historic travel guide for African Americans during the height of segregation. Using first person testimonies and texts, this course will provide a new perspective on the legacy of those who lived through this era and fought for equality.

Prerequisites: Social Construction of Identity

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Music in Social Justice

Course Code: ~Div145

Description: Music in Social Justice is open to students interested in how the arts shape their world. Students will study how music can engage and advocate for those on the margins of society and inspire social justice movements. Tailored to the individual interest in social justice topics of the group, the course will analyze historical and current events as the class designs a musical movement that can

empower a people, group or organization in addressing moral and social problems. Such topics may include racial inequality, women's rights, immigration reform, and institutional ableism. A diverse cultural, philosophical, and theological perspective will be taken by the instructor to help guide the ethical implications pertaining to this subject.

Prerequisites: Social Construction of Identity

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Social Justice in Film

Course Code: ~Div140

Description: The Social Justice in Film course provides students with the opportunity to examine their social identities, giving consideration to elements such as race, religion, class, and sexuality. Using documentaries and contemporary films, students will explore how they are perceived by individuals and society. The class will analyze the varying privilege and disadvantage related to social group memberships and the historical roots of these systems. This course will allow students to gain a stronger understanding of themselves as individuals and of their peers.

Prerequisites: Social Construction of Identity

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Speak Up!

Course Code: ~Div135

Description: This one term course focuses on effective and appropriate strategies for bystander intervention. The goals are to raise awareness, increase motivation to intervene, develop skills and confidence, and maintain safety of self and others when addressing difficult situations.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

The Social Construction of Identity

Course Code: ~Div105

Description: This first course in social justice will increase students' understanding and awareness of social identities and how these identities impact our lives and our perception of others. Students will look at some of the basic concepts of social justice including stereotypes, privilege, oppression and socialization. Each of the subsequent courses will allow students the opportunity to look more deeply at a specific form of oppression and establish strategies for change both individual and collectively.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

ENGLISH

Ancient Wisdom for Modern Life

Course Code: ~Eng645

Description: We've all felt at a loss at some point in our lives. How can I keep it together when things fall apart? Can people truly connect with one another? How do I want to be remembered? This course will invite students to wrestle with these questions and more alongside such classical thinkers as Plato, Aristotle, and Seneca from the ancient Mediterranean, and Mencius, Lao Tzu, and Confucius from China, who have offered some enduring answers. The course will also trace the cultural influence of those philosophers' ideas into the present day.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

Change My Mind!

Course Code: ~Eng795

Description: If you're going to change your neighborhood or change the world, you must know how to write to change minds! Students will learn how to invent, arrange, style, and deliver arguments to diverse audiences. Students will research and craft arguments around local, regional, national, and global current events. Students will become familiar with what an argument is and why the ability to craft an argument well is necessary to move people towards new ideas, attitudes, and beliefs about our world. Students will craft traditional and multimodal arguments across genres, including researched arguments, technical documents, advertisements, zines, memes, and pamphlets and brochures.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

Credits: 6

Classic Film as Text

Course Code: ~Eng150

Description: We love movies, which have been called "sacred dramas for a secular society" (Howard Suber, UCLA), yet many people appreciate film just for its surface elements of plot or character. This course will teach students to read films more critically by making apparent the aspects of film that might otherwise remain invisible: performance, direction, cinematography, editing, production design, composition, costume, and dialogue, among others. Students will read academic theory and film criticism while viewing, discussing, and writing about a wide range of films. Coursework will include in-class discussion, nightly reading and writing assignments, and analytic projects both written and visual in nature.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Comedy Sketches from Pen To Performance

Course Code: ~Eng540

Description: In this playwriting course, students are placed with a writing teacher in order to read and study the works of comedy sketch writers then compose their own pieces, both individually and in collaboration. Next, students work with a stage performance teacher on producing and performing their plays for the Eagle Hill School community.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Creative Writing

Course Code: ~Eng175

Description: The Creative Writing course introduces specific strategies for creative writing assignments that deal with a variety of subject matter while strengthening basic written composition skills. Concrete steps are presented and used while allowing independent development of thought through written expression. The following literary forms are addressed in students' writing: short stories, poems, and narratives based on personal experience, reflection and insight.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Food Writing

Course Code: ~Eng800

Description: Who eats it, how it's made, where it's been, where it's going: food is more than what appears on your plate. From aspic to za'atar and Alton Brown to lemon zest, this course reviews the personalities, industries, histories, science, and creativity behind food and food writing. An integral aspect of this course is the restaurant review—as students assume the role of restaurant critic through orders out and dining in, their write-ups about local eats will strengthen their evidence-based argumentative skills and their understanding of writing with an audience in mind. Students should expect to write, read, and eat, but they should also be aware that this is not a culinary arts class. Hands-on cooking and baking are beyond the scope of this course; however, discussion, writing, and reading about the process of food-making are all on the table.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Credits: 6

Haunted Memoirs and Ghost Stories

Course Code: ~Eng775

Description In this literature course, students will read both fictional and non-fictional books, short-stories, folktales, urban legends, and memoirs focusing on the supernatural, apparitions and ghostly

visits by famous historical figures such as Ben Franklin, Abraham Lincoln, and Ann Boleyn and read about historically-haunted places like Gettysburg, Alcatraz, The White House, and Salem, Massachusetts. Students will explore works from authors such as Stephen King, Shirley Jackson, H.P. Lovecraft, Charlotte Perkins Gilman, Nathaniel Hawthorne, Charles Dickens and more.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

Herstory

Course Code: ~Eng785

Description: What is 'memoir'? What does it do, and who is it for? If your words had the power to create change, what is the story that you would like to write? In this course, we will investigate these questions by both reading and writing memoir, together. Each week, we will read and respond to a variety of texts that represent 'memoir,' including creative non-fiction, poetry, and essay; and work to write our own 'memoirs'—our own story/s and experiences of the world. One class per week will be devoted to the writing process, including the weekly exchange and reading of writing among our group, as well as our ability to listen, respond, and to build empathy among one another. This workshop will be conducted by Danielle Pappo, an instructor affiliated with the Herstory Writers Workshop, an organization committed to giving voice to historically underrepresented groups, including youth. For information about Herstory Writers Workshop please visit www.herstorywriters.org.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Holocaust and Genocide

Course Code: ~Eng770

Description: It is often stated that learning about history prevents one from repeating it, but sometimes those lessons can be overlooked because of personal discomfort or other elements. In this course, students will study literature that focuses on the Holocaust and other (in some cases, more recent) genocides throughout the world, examining the social and political factors that contributed to these tragedies. The course will cover historical context, memoirs, short stories, film, and both fiction and non-fiction accounts from a variety of parts of the world affected by genocide, and will challenge students to make connections amongst acts of genocide across different cultures, as well as to consider there may be a reluctance to acknowledge these historical events.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

Indigenous Literature

Course Code: ~Eng780

Description: Our understanding of the modern world--its folk stories, political structures, literature, environmental concerns, and society and culture as a whole--has been heavily influenced by Indigenous

knowledge, language, and storytelling. This course will investigate examples of Indigenous stories in spoken and written traditions throughout history and across cultures, including many modern authors like Joy Harjo, the U.S. Poet Laureate; Tommy Orange, whose first book won the 2019 American Book Award; and Sherman Alexie, whose teenage characters face racism and stereotypes on the basketball court. This course will allow students to learn how significant many aspects of the Indigenous worldview are in modern U.S. culture. For example, did you know that the Iroquois Constitution inspired the founding fathers of The United States of America as they crafted the U.S. Constitution?

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

Literature and the Law

Course Code: ~Eng217

Description: Literature and the Law explores interpretive practices in literary study through the examination of both fictional texts and legal documents. Students are encouraged to bring traditional literary skills to the reading of the law and to understand the close relationship between legal and literary studies. Students in Literature and the Law commit to participation in the Massachusetts Bar Association Mock Trial program and are expected to participate fully in preparation for the Mock Trial competition in addition to meeting other class requirements.

Prerequisites:

Permission Required: Yes

Grades: 9,10,11,12

Credits: 6

Masterpieces in Fantasy Literature

Course Code: ~Eng320

Description: Despite their wild popularity, fantasy series such as Harry Potter and Game of Thrones are often dismissed as pure entertainment and escapism, rather than as texts worthy of critical discussion. In this course, we will discuss how fantasy, as a genre of the imagination, employs alternate forms of representation, such as the fantastical, estranging, or even impossible, which other genres would not allow. By reading novels, short stories, graphic novels, and academic articles, we will examine the literary strategies texts use to represent the world through speculative modes, as well as discuss how we can distinguish fantasy from, or relate it to, other genres such as science fiction, horror, fairy tales, and magical realism. We will explore fantasy's investment in world-building, history, tradition, and categories of identity such as race, class, and gender. Throughout the course, we will consider how fantasy, as a genre, form, and world-view, is well-suited to represent our contemporary reality.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

Mystery Writing

Course Code: ~Eng790

Description: On March 18, 1990, thieves robbed the Isabella Stewart Gardner Museum of millions

of dollars' worth of art. Nobody knows who did it, and the thirteen stolen paintings have never been recovered. It's a mystery, still unsolved—one of many this course will cover. The whodunnit, the murder mystery, the art heist, the detective story, even the true crime podcast: students will become familiar with a range of genres as they investigate secrets, crimes, culprits, plot twists, and the art of suspense. Coursework includes writing creatively, researching thoroughly, and engaging with multimodal texts.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

Reading & Writing: Critical Analysis

Course Code: ~Eng330

Description: This course provides the opportunity to develop writing skills required in post-secondary programs. Students complete essay responses to questions and readings, term and research papers, critiques, literary analysis, and persuasive essays with a focus on academic argument and proper citation. This course may be taken repeatedly; the coursework targets the development of sophisticated reading and writing skills on an individual basis. This course is open to juniors and seniors. Enrolling in this class as a sophomore requires department chair approval.

Prerequisites:

Permission Required: grade 10 with permission of English department chair

Grades: 11,12

Credits: 6

Sports Literature

Course Code: ~Eng235

Description: In this course, students will read a variety of challenging texts, from fiction to non-fiction, from stories to poetry to articles, all dealing with the theme of sports and athletics. Students will be exposed to historical as well as current sports events while enhancing reading comprehension, writing and critical thinking skills.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

Who's the GOAT?

Course Code: ~Eng805

Description: In this one-term writing class, students will practice their argumentative skills based on comparing who is the best in one discipline of the instructor's choosing, ranging from athletics to politics, the possibilities are limitless. Who is the GOAT in basketball: LeBron James or Michael Jordan? Who is the greatest actor or actress of all-time? How about the greatest video game or board game? Hot dogs or chicken nuggets, when it comes to the greatest junk food of all-time? All you need for this course is an open mind and a closed-case to fight for your winner.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Writing About Music

Course Code: ~Eng765

Description: This course invites students to explore the realm of music and its impact on the world. Students will have the opportunity to learn and to write about music from many different artists, genres, cultures, and eras. Students will write about music through journalistic writing, creative nonfiction, research, review, and analytical pieces. This course will also investigate lyricism and expression through song and music.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

Writing for Publication

Course Code: ~Eng260

Description: Have you started a big story and need time to write with the guidance of an experienced editor? Do you have a completed manuscript that you'd like to get published, but you know it's rough and you need help with editing and proofreading? Would you like to be able to share your writing with your peers and a supportive teacher--and hear their constructive criticism? Do you have a great idea for an essay, or a group of poems, or a film script, but haven't started turning that idea into reality? If any of these apply to you, Writing for Publication may be your course. This course invites students to consider as part of their writing aesthetics, ethics, electracy, materiality, and curation across literary forms.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

HISTORY

A New Nation: Independence to Reconstruction

Course Code: ~His460

Description: A survey of American history from Independence through the Civil War and Reconstruction.

Prerequisites:

Permission Required: No

Grades: 9,10,11,12

Credits: 3

Founding of a Nation: The Earliest Americans to the Revolution

Course Code: ~His455

Description: A survey of American history from the first peopling of the Americas up to the American War of Independence.

Prerequisites:

Permission Required: No

Grades: 9,10,11,12

Credits: 3

Global Economy

Course Code: ~His100

Description: In the Global Economy course, students learn, identify, and define economic terms currently in use. They are introduced to major economic practices and globalization and the influences of these concepts are studied. Global banking, investing, and funding organizations such as the World Bank, stock markets, and private organizations are discussed. Foreign policy and its overall political effect is considered as a motivator for local and global economic decisions.

Prerequisites:

Permission Required: No

Grades: 10,11,12

Credits: 3

Global Perspectives

Course Code: ~His105

Description: The Global Perspectives course is built around the following concepts: diversity, acceptance, globalization, and sustainability. The basic elements of each concept are introduced and then different countries' perspectives are woven into the learning experience. Specific information is taken from individual countries and taught as a part of the overall concept. Students are also introduced to major topics in geography and how they influence the lifestyles, decisions, and policy making of different peoples of the world. Students maintain an archive for all the class papers, assignments, and homework. Those archives are checked and graded periodically.

Prerequisites:

Permission Required: No

Grades: 8,9

Credits: 6

Government

Course Code: ~His110

Description: The Government course is an introduction to the fundamentals of American government and politics. It is designed to guide students as they consider their relationship to the government of the country in which they live. This course aims to help develop critical and analytical reasoning skills as students evaluate issues and public policies in American politics.

Prerequisites:

Permission Required: No

Grades: 11,12

Credits: 8

Hamilton!

Course Code: ~His530

Description: There's so much more to learn about the founding father on the ten dollar bill. Explore the tale of Alexander Hamilton, an orphan and immigrant who came to America with nothing and who became George Washington's "Right Hand Man" and the first U.S. Treasury Secretary. Students will use a variety of primary and contemporary sources to investigate the real-life events presented in selected scenes and lyrics from Hamilton: An American Musical.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Moving Toward the Future: The Cold War and Beyond

Course Code: ~His495

Description: This course explores the history of the United States from the beginning of the Cold War through the Civil Rights Movement, the Vietnam Era, and the end of the Cold War.

Prerequisites:

Permission Required: No

Grades: 9,10,11,12

Credits: 3

Revolutions

Course Code: ~His375

Description: What would it take for a population to rise up against its government, overthrow its leaders and establish a new order? This course is designed for students to analyze and evaluate uprisings that have turned into revolutions that changed the world. The American, French, Chinese, Russian and other Revolutions will be studied with the aim of finding commonalities amongst their causes and their leaders. (The analytical nature of this course makes it more suited for older students with well-developed reasoning skills).

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

The Most Evil Men and Women in History

Course Code: ~His305

Description: Explore the lives and minds of the villains who have tainted the pages of history with their crimes.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

IB DIPLOMA PROGRAMME

Biology HL (I)

Course Code: ~IB200

Description: Biology is the study of life. The vast diversity of species makes biology both an endless source of fascination and a considerable challenge. Biologists attempt to understand the living world at all levels from the micro to the macro using many different approaches and techniques. Biology is still a young science and great progress is expected in the 21st century. This progress is important at a time of growing pressure on the human population and the environment. By studying biology in the DP students should become aware of how scientists work and communicate with each other. While the scientific method may take on a wide variety of forms, it is the emphasis on a practical approach through experimental work that characterizes the sciences. Teachers provide students with opportunities to design investigations, collect data, develop manipulative skills, analyze results, collaborate with peers and evaluate and communicate their findings. Biology HL is a two-year course. This is part one.

Prerequisites: Biology

Permission Required: Yes

Grades: 11,12

Credits: 9

Biology HL (II)

Course Code: ~IB240

Description: Biology is the study of life. The vast diversity of species makes biology both an endless source of fascination and a considerable challenge. Biologists attempt to understand the living world at all levels from the micro to the macro using many different approaches and techniques. Biology is still a young science and great progress is expected in the 21st century. This progress is important at a time of growing pressure on the human population and the environment. By studying biology in the DP students should become aware of how scientists work and communicate with each other. While the scientific method may take on a wide variety of forms, it is the emphasis on a practical approach through experimental work that characterizes the sciences. Teachers provide students with opportunities to design investigations, collect data, develop manipulative skills, analyze results, collaborate with peers and evaluate and communicate their findings. Biology HL is a two year course. This is part two.

Prerequisites: Biology HL (I)

Permission Required: Yes

Grades: 11,12

Credits: 9

Biology SL (I)

Course Code: ~IB140

Description: Biology is the study of life. The vast diversity of species makes biology both an endless source of fascination and a considerable challenge. Biologists attempt to understand the living world at all levels from the micro to the macro using many different approaches and techniques. Biology is

still a young science and great progress is expected in the 21st century. This progress is important at a time of growing pressure on the human population and the environment. Credits: 9

History HL (I)

Course Code: ~IB130

Description: The DP history course is a world history course based on a comparative and multi-perspective approach to history. It involves the study of a variety of types of history, including political, economic, social and cultural, and provides a balance of structure and flexibility. The course emphasizes the importance of encouraging students to think historically and to develop historical skills as well as gaining factual knowledge. It puts a premium on developing the skills of critical thinking, and on developing an understanding of multiple interpretations of history. In this way, the course involves a challenging and demanding critical exploration of the past. Teachers explicitly teach thinking and research skills such as comprehension, text analysis, transfer, and use of primary sources. There are six key concepts that have particular prominence throughout the DP history course: change, continuity, causation, consequence, significance and perspectives.

Prerequisites:

Permission Required: Yes

Grades: 11,12

Credits: 9

History HL (II)

Course Code: ~IB260

Description: The DP history course is a world history course based on a comparative and multi-perspective approach to history. It involves the study of a variety of types of history, including political, economic, social and cultural, and provides a balance of structure and flexibility. The course emphasizes the importance of encouraging students to think historically and to develop historical skills as well as gaining factual knowledge. It puts a premium on developing the skills of critical thinking, and on developing an understanding of multiple interpretations of history. In this way, the course involves a challenging and demanding critical exploration of the past. Prerequisites: History HL (I)

Permission Required: Yes

Grades: 11,12

Credits: 9

Language and Literature HL (I)

Course Code: ~IB100

Description: The language A: language and literature course aims to develop skills of textual analysis and the understanding that texts, both literary and non-literary, can relate to culturally determined reading practices. The course also encourages students to question the meaning generated by language and texts. An understanding of the ways in which formal elements are used to create meaning in a text is combined with an exploration of how that meaning is affected by reading practices that are culturally defined and by the circumstances of production and reception. The study of literature in translation from other cultures is especially important to IB DP students because it contributes to a global perspective. Texts are chosen from a variety of sources, genres and media. Language and Literature HL is a two year course. This is part one.

Prerequisites: Reading and Writing Critical Analysis

Permission Required: Yes

Grades: 11,12

Credits: 9

Language and Literature HL (II)

Course Code: ~IB270

Description: The language A: language and literature course aims to develop skills of textual analysis and the understanding that texts, both literary and non-literary, can relate to culturally determined reading practices. Mathematics: Analysis and Approaches SL (I)

Course Code: ~IB360

Description: Mathematics: Analysis and approaches is designed for students who wish to study mathematics as a subject in its own right or to pursue their interests in areas related to mathematics. This course has a strong emphasis on calculus and on algebraic, graphical and numerical approaches. Students will develop strong skills in mathematical thinking and become fluent in the construction of mathematical arguments. It will appeal to students who are interested in exploring real and abstract applications of mathematical concepts. They will enjoy problem solving and generalization. This course is suitable for students who may go on to further study in subjects that have a significant level mathematics content, for example mathematics itself, engineering, physical sciences or economics.

Prerequisites: Algebra II

Permission Required: Yes

Grades: 11,12

Credits: 9

Mathematics: Analysis and Approaches SL (II)

Course Code: ~IB370

Description: Mathematics: Analysis and approaches (II) is designed for students who wish to study mathematics as a subject in its own right or to pursue their interests in areas related to mathematics. This course is suitable for students who may go on to further study in subjects that have a significant level mathematics content, for example mathematics itself, engineering, physical sciences or economics.

Prerequisites: Mathematics: Analysis and Approaches (I)

Permission Required: Yes

Grades: 11,12

Credits: 9

Music SL (I)

Course Code: ~IB190

Description: The IB Diploma Programme music course seeks to develop students' knowledge and potential as musicians, both personally and collaboratively. IB Diploma Programme music students are

required to study musical perception and actively listen to a wide range of music from different parts of the world, musical cultures and time periods. They also develop aural perception and understanding of music by learning about musical elements, including form and structure, notations, musical terminology, and context. Through the course of study, students become aware of how musicians work and communicate. Music SL is a two year course. This is part one.

Prerequisites: Introduction to the Performing Arts

Permission Required: No

Grades: 11,12

Credits: 9

Music SL (II)

Course Code: ~IB300

Description: The IB Diploma Programme music course seeks to develop students' knowledge and potential as musicians, both personally and collaboratively. IB Diploma Programme music students are required to study musical perception and actively listen to a wide range of music from different parts of the world, musical cultures and time periods. They also develop aural perception and understanding of music by learning about musical elements, including form and structure, notations, musical terminology, and context. Through the course of study, students become aware of how musicians work and communicate. Music SL is a two year course. This is part two.

Prerequisites: Music SL (I)

Permission Required: Yes

Grades: 11,12

Credits: 9

Spanish ab initio (I)

Course Code: ~IB110

Description: The IB DP language ab initio course is designed to provide students with the necessary skills and intercultural understanding to enable them to communicate successfully in an environment where the language studied is spoken. This process encourages the learner to go beyond the confines of the classroom, expanding an awareness of the world and fostering respect for cultural diversity. The language ab initio course develops students' linguistic abilities through the development of receptive, productive and interactive skills by providing them opportunities to respond and interact appropriately in a defined range of everyday situations. Language ab initio is available at standard level only. Spanish ab initio is a two year course. This is part one.

Prerequisites: Spanish

Permission Required: Yes

Grades: 11,12

Credits: 9

Spanish ab initio (II)

Course Code: ~IB310

Description: The IB DP language ab initio course is designed to provide students with the necessary skills and intercultural understanding to enable them to communicate successfully in an environment

where the language studied is spoken. This process encourages the learner to go beyond the confines of the classroom, expanding an awareness of the world and fostering respect for cultural diversity. The language ab initio course develops students' linguistic abilities through the development of receptive, productive and interactive skills by providing them opportunities to respond and interact appropriately in a defined range of everyday situations. Language ab initio is available at standard level only. Spanish ab initio is a two year course. This is part two.

Prerequisites: Spanish ab initio (I)

Permission Required: Yes

Grades: 11,12

Credits: 9

Theory of Knowledge (I)

Course Code: ~IB170

Description: Theory of knowledge (TOK) is a course about critical thinking and inquiring into the process of knowing, rather than about learning a specific body of knowledge. It plays a special role in the DP by providing an opportunity for students to reflect on the nature of knowledge, to make connections between areas of knowledge and to become aware of their own perspectives and those of the various groups whose knowledge they share. It is a core element undertaken by all DP students, and schools are required to devote at least 100 hours of class time to the course. The overall aim of TOK is to encourage students to formulate answers to the question "how do you know?" in a variety of contexts, and to see the value of that question. This allows students to develop an enduring fascination with the richness of knowledge. Theory of knowledge is a two year course. This is part one.

Prerequisites:

Permission Required: Yes

Grades: 11,12

Credits: 3

Theory of Knowledge (II)

Course Code: ~IB330

Description: Theory of knowledge (TOK) is a course about critical thinking and inquiring into the process of knowing, rather than about learning a specific body of knowledge. It plays a special role in the DP by providing an opportunity for students to reflect on the nature of knowledge, to make connections between areas of knowledge and to become aware of their own perspectives and those of the various groups whose knowledge they share. It is a core element undertaken by all DP students, and schools are required to devote at least 100 hours of class time to the course. The overall aim of TOK is to encourage students to formulate answers to the question "how do you know?" in a variety of contexts, and to see the value of that question. This allows students to develop an enduring fascination with the richness of knowledge. Theory of knowledge is a two year course. This is part two.

Prerequisites: TOK (I)

Permission Required: Yes

Grades: 11,12

Credits: 3

Visual Arts SL (I)

Course Code: ~IB160

Description: The IB Diploma Programme visual arts course encourages students to challenge their own creative and cultural expectations and boundaries. It is a thought-provoking course in which students develop analytical skills in problem-solving and divergent thinking, while working towards technical proficiency and confidence as art-makers. In addition to exploring and comparing visual arts from different perspectives and in different contexts, students are expected to engage in, experiment with and critically reflect upon a wide range of contemporary practices and media. The course is designed for students who want to go on to further study of visual arts in higher education as well as for those who are seeking lifelong enrichment through visual arts. Visual Arts SL is a two year course. This is part one.

Prerequisites:

Permission Required: Yes

Grades: 11,12

Credits: 9

Visual Arts SL (II)

Course Code: ~IB350

Description: The IB Diploma Programme visual arts course encourages students to challenge their own creative and cultural expectations and boundaries. It is a thought-provoking course in which students develop analytical skills in problem-solving and divergent thinking, while working towards technical proficiency and confidence as art-makers. In addition to exploring and comparing visual arts from different perspectives and in different contexts, students are expected to engage in, experiment with and critically reflect upon a wide range of contemporary practices and media. The course is designed for students who want to go on to further study of visual arts in higher education as well as for those who are seeking lifelong enrichment through visual arts. Visual Arts SL is a two year course. This is part two.

Prerequisites: Visual Arts SL (I)

Permission Required: Yes

Grades: 11,12

Credits: 9

LIFE SKILLS

College Orientation

Course Code: ~Lif100

Description: The College Orientation class is a required course designed to help students understand their learning styles and effective learning strategies in order to prepare them for college and potential support and accommodations they may need. Students are exposed to various postsecondary options. This is done through discussions, visits from college representatives, and various college search mechanisms. The class also helps students become more prepared for the college process through college visits, mock interviews, and application completion assistance.

Prerequisites:

Permission Required: No

Grades: 11,12

Credits: 3

MATHEMATICS

Algebra I

Course Code: ~Mat100

Description: The Algebra I course covers all aspects of understanding variables and how they are utilized to solve problems in many different life activities. Among the topics covered are operations with monomials and polynomials, solving equations, solving inequalities, factoring, graphing linear equations and solving systems of equations. Word problems are presented with each concept. Students engage in design thinking, or a human-centered process for creative problem solving. They are encouraged to ask questions, learn and practice a variety of strategies to solve equations, and apply those strategies to everyday human experiences that they identify. Students in Algebra I engage in active learning, offering and receiving feedback, tinkering, and academic risk-taking. Students in Algebra I will make basic connections among mathematics and other disciplines.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Algebra II

Course Code: ~Mat105

Description: Advanced concepts utilizing both algebra and geometry skills are taught in Algebra II. Systems of equations, functions and graphs, rational expressions, complex numbers, the quadratic formula, polynomial functions, and basic trigonometry are covered. The graphing calculator and its functions are introduced in this course. Students learn to solve complex word problems relating to science and business, with the assistance of the graphing calculator. Students engage in design thinking, or a human-centered process for creative problem solving. They are encouraged to ask questions, learn and practice a variety of strategies to solve equations, and apply those strategies to everyday human experiences that they identify. Students in Algebra I engage in active learning, offering and receiving feedback, tinkering, and academic risk-taking. Students in Algebra I will continue to make connections among mathematics and other disciplines.

Prerequisites: Algebra I

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Basic Math

Course Code: ~Mat110

Description: The Basic Math course develops skills in fractions, decimals, measurement, and factoring (greatest common factor, least common multiple, prime numbers), as well as the terminology of factoring. Skills in conversion of measurements, both standard and metric, are also developed. Students in Basic Math engage in design thinking, or a human-centered process for creative problem solving. They are encouraged to ask questions, learn and practice a variety of strategies to solve equations, and apply those strategies to

everyday human experiences that they identify. Students in Basic Math engage in active learning, offering and receiving feedback, tinkering, and academic risk-taking. Students will engage in conversations and collaborative activities that cultivate an interest in and appreciation for mathematics.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Basics of the Stock Market

Course Code: ~Mat225

Description: Students learn about buying and selling stocks and using different stock market strategies in this course. At the beginning of the course, students will develop a portfolio of investments that they will follow for the remaining weeks of the course and will attend regular follow-up visits with the instructor until the school year is completed.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Calculus

Course Code: ~Mat115

Description: The Calculus course focuses primarily on differential calculus. Topics covered are limits, continuity, derivatives, rules of derivatives, and their applications. Some integral calculus will be covered if time permits. Word problems are presented relating to such fields as physics, geology, architecture, chemistry, and business. Students utilize a graphing calculator in this class.

Prerequisites: Pre-Calculus

Permission Required: No

Grades: 10,11,12

Credits: 8

Calculus II

Course Code: ~Mat190

Description: This course is offered after one year of successful completion of the Calculus course. Topics covered include optimization, anti-derivatives, the definite integral, applications of the definite integral, logarithmic, exponential and trigonometric functions, techniques of integration, indeterminate forms and L'Hopital's Rule, improper integrals, Taylor series expansion of function, infinite series and sequences and application of integral.

Prerequisites: Calculus I

Permission Required: No

Grades: 10,11,12

Credits: 8

Consumer Math

Course Code: ~Mat120

Description: In the Consumer Math course, students learn how to apply the basic mathematics skills needed to contribute personally and professionally in today's world. Topics such as money, balancing a checkbook, finding discounts, estimation, percents, shopping, and budgeting are covered. Students also discover how to measure distance, liquid, mass, and calculate metric conversions. Students in Consumer Math engage in design thinking, or a human-centered process for creative problem solving. They are encouraged to ask questions, learn and practice a variety of strategies to solve equations, and apply those strategies to everyday human experiences that they identify. Students in Consumer Math engage in active learning, offering and receiving feedback, tinkering, and even academic risk-taking. Students will engage in conversations and collaborative activities that cultivate an interest in and appreciation for mathematics. Calculators and many different measuring tools are employed in this course.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Contemporary Mathematics

Course Code: ~Mat210

Description: The Contemporary Mathematics course is designed to survey theoretical and practical applications in mathematics. Topics such as problem solving, finance, measurement, number concepts, art and math, and mathematical modeling are covered. Students in Contemporary Mathematics engage in design thinking, or a human-centered process for creative problem solving. They are encouraged to ask questions, learn and practice a variety of strategies to solve equations, and apply those strategies to everyday human experiences that they identify. Students in Contemporary Math engage in active learning, offering and receiving feedback, tinkering, and academic risk-taking. Students will engage in conversations and collaborative activities that cultivate an interest in and appreciation for mathematics. Students will develop critical thinking and problem solving strategies, and learn about the use of various technologies, including operating systems, software, and maker technology.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Fraction Fluency

Course Code: ~Mat235

Description: Fraction Fluency is a course tailored to meet the needs of an individual student based upon his or her experience and skill in the area of fractions. The mathematical skills targeted range from simplifying fractions, to practicing the four operations of addition, subtraction, multiplication, and division, to solving algebraic expressions and equations involving fractions.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Fundamentals of Advanced Mathematics

Course Code: ~Mat125

Description: The primary objective of the Fundamentals of Advanced Mathematics course is to assist students with mastering algebra and geometry topics and then apply these concepts to real-life situations. Some of the specific topics include: solving polynomial equations using the quadratic formula, the Pythagorean Theorem, basic trigonometric functions, and solving right triangles. Fundamentals of Advanced Mathematics is recommended for students who have completed Algebra I, Algebra II, and Geometry and need reinforcement of basic algebra and geometry skills before taking Pre-calculus.

Prerequisites: Algebra II

Permission Required: No

Grades: 11,12

Credits: 8

Geometry

Course Code: ~Mat135

Description: The Geometry class emphasizes the understanding and interrelationships of geometry concepts, vocabulary, postulates, and theorems. These are presented in a multimodal manner, allowing the students to learn through visual, auditory, kinesthetic and hands-on activities. Topics covered include but are not limited to: lines, line segments, rays, angles, line segment and angle properties, polygons, perimeter, circumference, area, and planes. In addition, students develop their diagram-drawing skills, logical thinking abilities and organizational skills.

Prerequisites: Algebra I

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Integrated Mathematics

Course Code: ~Mat140

Description: Integrated Mathematics features opportunities for students to make connections among informal geometry, basic algebraic concepts, probability and statistics, measurement, and fractions. Students study mathematical terminology, concepts such as similarity and congruence, area, perimeter, and volume. Problems in statistics include applying the mean, median, mode, and range while utilizing graphs, tables, and charts to make predictions and inferences. Students engage in design thinking, or a human-centered process for creative problem solving; they are encouraged to ask questions, learn and practice a variety of strategies to solve equations, and apply those strategies to everyday human experiences that they identify. Students Integrated Mathematics engage in active learning, offering and receiving feedback, tinkering, and academic risk-taking.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Introduction to Algebra

Course Code: ~Mat145

Description: The concepts of ratio, proportion, and percent are covered in the Introduction to Algebra course. Word problems that help explain the use of proportions and percents are discussed. Integers are also introduced in this class as the students learn to add, subtract, multiply, and divide positive and negative numbers. The order of operations is an integral part of the course, as are understanding exponents and working with variables.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Introduction to Algebra II

Course Code: ~Mat290

Description: This course is designed for students who have already taken Algebra I and Geometry and provides the opportunity to review the most important skills in these areas. Topics covered include: solving equations and inequalities, graphing linear equations, using algebraic reasoning to solve for various angle measures, parallel and perpendicular lines, triangles and polynomials. Once students have fully developed these skills, they will work on solving word problems related to these particular topics. Standardized test sample problems, such as those found on the ACT, will be utilized for this purpose.

Prerequisites: Algebra I

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Introduction to Probability & Statistics

Course Code: ~Mat250

Description: This course covers topics in both descriptive and inferential statistics. Topics include permutations, combinations, axiomatic probability and statistical inference. The course consists of displaying, analyzing, and interpreting various graphs with given data. Students will calculate measures of central tendency with group frequency distributions and learn about outliers. Calculating measures of dispersion (range, quartiles, interquartile range, standard deviation, and variance) for both samples and population will be taught. Students will also learn how to utilize the TI-83 calculator to display and understand data.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Mathematics: Test-Prep Strategies

Course Code: ~Mat175

Description: This course is designed to help individual students improve their mathematics skills and knowledge of test taking techniques for standardized achievement tests, especially college admission testing. Course material is developed and based on standard test examples.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Personal Finance

Course Code: ~Mat220

Description: The Personal Finance course develops a student's ability to comprehend day-to-day finances in a technological society. Students are taught what types of banks and bank accounts are appropriate for their individual life styles. Specific units of study include checking accounts, the advantages and disadvantages of using credit cards, and paychecks, specifically targeting tax deductions, gross, and net pay.

Prerequisites:

Permission Required: No

Grades: 11,12

Credits: 3

Pre-Calculus

Course Code: ~Mat150

Description: The Pre-Calculus course includes the study of functions, circular functions, exponential and logarithmic functions, sequences, and series. The limit concept is introduced through infinite series.

Prerequisites: Algebra II

Permission Required: No

Grades: 10.11.12

Credits: 8

Statistics I

Course Code: ~Mat255

Description: The main objective of Statistics I is to provide students with skills to deal with acquisition, analysis and representation of data in useful formats. Topics include characteristics of data, statistical concepts, and statistical charts. Microsoft Excel is used extensively to process data and represent data graphically.

Prerequisites: Algebra I

Permission Required: No

Grades: 11,12

Credits: 8

Statistics II

Course Code: ~Mat260

Description: The main objective of Statistics II is for students to develop the skills to draw inferences about the statistics of population based on statistical procedure. Topics include probability, normal distribution, sampling theory and estimate of confidence intervals. Microsoft Excel and TI 83/84 are used to process data and represent data graphically.

Prerequisites: Statistics I

Permission Required: No

Grades: 11,12

Credits: 8

Trigonometry

Course Code: ~Mat155

Description: In Trigonometry, the topics covered include trigonometric functions, graphing trigonometric functions, right triangle trigonometry, the law of sines, the law of cosines, trigonometric identities, and inverse trigonometric functions. The students solve many intriguing word problems, with the use of a graphing calculator, from the construction of the pyramids of ancient Egypt to the building of bridges and skyscrapers.

Prerequisites: Algebra II

Permission Required: No

Grades: 11,12

Credits: 8

Using the Graphing Calculator

Course Code: ~Mat165

Description: Students develop self-confidence while learning a variety of functions available on a graphing calculator. Experience shows that the level of skillful use of the graphing calculator is directly proportional to the accurate performance of most students completing high school mathematics assignments. The class also studies the historical development of the method for finding Pi, as students have fun and develop their enthusiasm for learning significant mathematics. This course is designed for students who have a sound understanding of algebraic concepts.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

PHYSICAL EDUCATION

Advanced Outdoor Adventure

Course Code: ~Pe105

Description: The Advanced Outdoor Adventure class is an advanced physical education class. Participants are required to have already successfully taken Outdoor Adventure and have a background in group games and team-work skills. This class focuses on developing leadership skills through a higher level of training for the participants. Each student is required to go through the belay certification program and will be trained in safety techniques (bear claws and pulley repair) and basic wilderness first aid (will not be a certification program). Students are taught how to develop and facilitate team building and problem solving games, as well as leading high ropes activities. Because of the advanced nature of the class, students will be working on the high and low ropes courses in cooler weather, as long as it is safe to do so.

Prerequisites: Outdoor Adventure

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Athletic Director Internship

Course Code: ~Pe155

Description: This internship course is open to any junior or senior who is involved in the athletic program. Interning students assist the Athletic Director in the management of the athletic website, the scheduling of contests for athletic teams, the setup of athletic events, and perform other related office tasks and game preparation responsibilities. Students should have good communication skills, general computer knowledge and a willingness to work at events outside of the classroom. The Athletic Director will assist academic advisors in the process of selecting individuals for this class/internship. This four-credit internship class meets for three terms and requires an additional commitment of approximately two hours per week before and after school.

Prerequisites:

Permission Required: yes

Grades: 11,12

Credits: 3

Exercise Physiology

Course Code: ~Pe190

Description: The objective of this cross-curricular course is to provide students with an anatomical outline of the human body as it relates to body movement conducted during physical activity such as exercise and sports. Students will participate in various sports, games, and exercise focused on different portions of musculature. This course consists of both classroom learning and physical exercise.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Golf Statistics

Course Code: ~Pe205

Description: The objective of this cross-curricular course is to provide students with real world application of mathematic principles. The primary way of learning those principles in this course is the use of golf statistics. Real world data will be gathered while students use a golf simulator. This course consists of both classroom learning and physical exercise.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Introductory Nutrition and Fitness

Course Code: ~Pe185

Description: The objective of this cross-curricular course is to educate students on the basic elements of good nutrition principles and eating habits while also promoting the benefits of physical activity through exercise to help individuals establish a healthy lifestyle. Over time students will work with the instructor on creating an appropriate workout regimen for their goals. This course consists of both classroom learning and physical exercise.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Outdoor Adventure

Course Code: ~Pe100

Description: The Outdoor Adventure course has two main thematic components. The physical component involves use of the ropes course, initiative activities, and noncompetitive group games. The emotional component builds self-esteem, self-confidence, and ego strength. The ropes course and the group games are designed to increase agility, flexibility, balance, general strength and coordination. In addition to individual benefits, the course is meant to develop mutual trust among class members. The level of involvement in activities, as well as participation on the ropes course is individualized so that each student may achieve his or her full potential. Students in Outdoor Adventure have opportunities to solve “wicked” problems through radical collaboration.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Physical Education

Course Code: ~Pe130

Description: The Physical Education curriculum is designed to improve the individual’s spirit, body, and mind. Classes are structured so that each student’s need to improve or to learn new skills for team and individual sports is best met. Strategies and rules are taught to increase the enjoyment of participating in

a physically active environment. A great deal of emphasis is placed on teamwork, sportsmanship, and fair game play—the elements necessary for a positive and rewarding athletic experience.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Physical Education Internship

Course Code: ~Pe160

Description: This internship is open to seniors who have an interest in the physical education field. The course will expose students to the daily routine of leadership, responsibility and flexibility. The student will assist in leading activities, prepare and gather game/fitness equipment, and will be an active role model for students in a physical education class. Individuals accepted for this internship will possess significant levels of knowledge regarding the traits of sociability, sportsmanship, self-discipline, and cooperation. The physical education department head will assist advisors in the selection of interns. Interested students should have fulfilled all of their PE requirements for graduation prior to taking this class.

Prerequisites:

Permission Required: No

Grades: 12

Credits: 1

Sports History

Course Code: ~Pe200

Description: The objective of this cross-curricular course is to provide students with an overview of individual sports and their origin while also looking at specific time periods and historic events during which those sports developed. Students will participate in various sports originating from different time periods. This course consists of both classroom learning and physical exercise.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Swimming

Course Code: ~Pe180

Description: Students in swimming class will utilize the pool in the RMB Center. They will be expected to swim a designated amount of laps, learn proper strokes in swimming, and participate in group water games. There will be time to use the diving board and other equipment to enhance swimming experience. Students are expected to swim on a daily basis.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

PRAGMATICS

Abnormal Psychology

Course Code: ~Pra175

Description: The Abnormal Psychology course reviews the etiology, diagnosis, prevention, and treatment of abnormal behavior, including the anxiety and psychosomatic disorders, depressive disorders, social and interpersonal disorders, substance abuse disorders, psychoses, and other abnormal personality patterns. Psychopharmacology, theories of counseling, and individual and group therapy are discussed. Students learn through lecture, activities, readings, discussions and documentaries.

Prerequisites: Biology, Psychology I and II

Permission Required: No

Grades: 11,12

Credits: 3

Child Development

Course Code: ~Pra155

Description: The Child Development course supplies those students interested in pursuing psychology in college an opportunity to work with a college text. Students cover various topics such as the three developmental processes, history of child development, different theories of development, and the periods of development. The material is presented lecture style and projects are used to help the students develop their own understanding of how a child develops. Students are presented with a syllabus and are expected to manage their own deadlines, as well as summaries of the text readings.

Prerequisites: Biology

Permission Required: No

Grades: 11,12

Credits: 3

Coping with Stress

Course Code: ~Pra225

Description: Coping With Stress was designed to assist students in understanding stress and the effects it has on their lives. Students identify stressors in their lives and are taught strategies to manage their stress more effectively. Topics include listening and expression skills, identification of one's emotions, problem-solving, assertiveness, and a variety of relaxation and stress-reducing techniques. Skills are practiced in class and through structured homework assignments, which result in generalization.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1,3

Education Foundations

Course Code: ~Pra220

Description: This course introduces teaching as a profession in the American education system. It will offer a variety of perspectives on education including historical, philosophical, social, legal, and ethical issues in a diverse society. The course will include practical application using the school's peer tutoring program, which includes understanding the role of a peer tutor, the relationship between the student and peer tutor during tutoring sessions, the ethics of peer tutoring, and effective study strategies, including the use of assistive technologies. During the course, students will learn theory and instructional practices for peer tutoring, and will participate in and reflect upon role-plays of peer tutoring sessions. Students who take this class will be given priority consideration for peer tutoring positions after successful course completion. Students who are thinking about a career in education and those who would like to be a peer tutor may be interested in taking this course.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Gender Studies

Course Code: ~Pra130

Description: The Gender Studies class addresses relevant issues pertinent to adolescents. The class addresses social and personal issues within a gender-specific context. The primary focus of the class is to instruct students on various social issues while also creating an environment in which students can feel comfortable to discuss and question various gender specific concerns. The development of each student's own values is an important part of the class, as well as expressing those values clearly and assertively. This is accomplished through class discussions, small group activities, critical thinking exercises, role-playing, and analysis of each student's values and beliefs. Some of the topics discussed are healthy relationships and the portrayal of genders in the media, including body image and personal rights and responsibilities.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

General Psychology I

Course Code: ~Pra250

Description: The General Psychology I course is designed to provide students with an understanding of the basic concepts and techniques of psychology as a behavioral science. Topics include a basic understanding of the scientific method and an overview of research methods, familiarity with writing techniques used in psychology, the endocrine system, the brain, consciousness, and operant and classical conditioning with a focus on terminology and the application of concepts. The course uses small group activities, lectures, discussions, films and other media.

Prerequisites:

Permission Required: No

Grades: 11,12

Credits: 3

General Psychology II

Course Code: ~Pra255

Description: The General Psychology II course is designed to as a continuation of the topics presented in General Psychology I for students who wish to pursue seriously their psychology studies after high school. Topics include sensation and perception, memory, language and intelligence, motivation, social psychology, and personality. Through the study of human behavior and personality development along with activities and critical thinking skills, students will develop an increased knowledge and understanding of themselves and others. The course uses small group activities, lectures, discussions, films and other media.

Prerequisites: General Psychology I

Permission Required: No

Grades: 11,12

Credits: 3

Inspiring Leadership

Course Code: ~Pra235

Description: Everyone will be called on to be a leader at some point in life. This course investigates the key traits of leadership, including but not limited to the characteristics of good leaders, how to improve leadership qualities, understanding and executing effective communication and leading groups. Students will put their skills in practice as they work in underclassmen dorms and around campus in the Prefect role. In addition, students will complete a campus improvement project of their choosing. The course meets during evening hours as part of the residential curriculum.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Intrapersonal Pragmatics

Course Code: ~Pra120

Description: The Intrapersonal Pragmatics course assists students as they become more responsible for their thoughts, emotions and behavior. As in all pragmatics courses, the course strategy is to instruct students about the various topics targeted in the classroom through role-plays and discussion, and to encourage the generalization of targeted skills outside of the classroom. Some course topics include harassment and teasing, the effects of self-talk, and three styles of behavior: passive, aggressive and assertive. Students work towards cultivating empathy, resilience, and a growth mindset.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1,3

Mindfulness in Everyday Life

Course Code: ~Pra195

Description: Mindfulness can transform how you are in your body—in your mind—with your friends—at your work—in the world. Learn how to breathe, how to walk, how to sit, how to eat a potato chip, how to listen to a bell, how to turn a door-handle, how to talk, and how to listen, in an entirely new way. Learn how to be fully in the present moment—the only moment we ever have. The course will include exercises both inside and outside the classroom, readings, and discussion, films on meditation, and if time permits, a tour of the Insight Meditation Society in Barre, Massachusetts.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Movements: Basic Self Defense

Course Code: ~Pra230

Description: This class involves a combination of basic self-defense and the study of women's issues. Participants will spend three days a week learning and practicing the basic techniques of self-defense and the importance of self-awareness. Through safety discussions, students will discuss topics such as, how to use your voice, and the power of body language: verbal and non-verbal cues. Two days of the week will be dedicated to women's studies wherein students will explore how women's roles in U.S. history have changed and expanded. Students will focus on political, social, economic, educational, and gender issues. Through media and technology, writing, presentations, and discussions, students will broaden their knowledge and critical thinking skills while respectfully considering other perspectives. The class is open to female juniors and seniors.

Prerequisites:

Permission Required: No

Grades: 11,12

Credits: 1

Positive Psychology

Course Code: ~Pra140

Description: Positive Psychology assists students in understanding stress and the effects it has on their lives and interpersonal relationships. Students identify stressors in their lives and learn skills to assist them in managing their stress more effectively. Topics are presented through lecture and discussion with a goal of student self-exploration. Appropriate use of the skills is demonstrated and followed by student rehearsal in class activities. The goal of the practice sessions is to establish the skills while also offering the opportunity to examine alternative methods of handling situations. Additional practice occurs in structured homework assignments with feedback given the following class period. Generalization is encouraged through practice of skills during daily concerns volunteered by students accompanied by their understanding of alternative strategies. Topics include identifying positive and negative stressors, coping techniques, and effects on overall health.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Psychology

Course Code: ~Pra200

Description: The Psychology course is designed to provide students with an understanding of the basic concepts and techniques of psychology as a behavioral science. Topics include a basic understanding of the scientific method, familiarity with writing techniques used in psychology, terminology and theories, and an overview of research methods. Through the study of human behavior and personality development along with activities and critical thinking skills, students gain an increased knowledge and understanding of themselves and others. The course uses small group activities, lectures, discussions, films and other media.

Prerequisites: Biology

Permission Required: No

Grades: 11,12

Credits: 3

Seminar on Learning

Course Code: ~Pra100

Description: The Seminar on Learning course provides students with a general overview of the history and development of the field of special education (social and cultural factors are addressed). More importantly, students develop a self-awareness pertaining to their own individual learning approaches, identify areas of academic strengths, and help those in need of further development. Learning strategies are introduced and explained, providing students with the opportunity to utilize these strategies in their current coursework in other subject areas. Students are exposed to a series of multi-modal instructional tools that introduce and explain the importance of self-advocacy and teach them to understand the process of appropriately addressing one's own academic needs.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Social Emotional Communication

Course Code: ~Pra240

Description: Social Emotional Communication supports students to develop foundational skills that are important in maintaining healthy relationships and interpersonal communication. Skills are presented in an organic, conversation style with each individual student in mind. Skills are demonstrated, modeled, and followed by student rehearsal in class activities. The goal of the practice sessions is to establish the skills while also developing the students' level of self-esteem, confidence, and social emotional learning. Generalization is encouraged through increased confidence stemming from positive reinforcement of the successful demonstration of skills. Topics include building and maintaining healthy relationships, respectful etiquette within relationships, and mindfully managing peer pressure.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1,3

Sociology

Course Code: ~Pra245

Description: The sociology course is designed to provide students with a foundational background of how groups and/or social structures have a profound influence on the way we think, feel, and act. Students will explore the history of sociology, research approaches, culture, and society as a whole. Students will gain knowledge and understanding of the three main sociological perspectives and theories and apply these theories to present-day social problems. The course includes small group work, lectures, discussion, and scientific research.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Verbal Communication

Course Code: ~Pra125

Description: The Verbal Communication course develops enhanced verbal skills and strategies for students that have basic pragmatic skills and the ability to understand the fundamentals of conversation. The goal of the course is to develop the students' ability to understand the messages that they give and receive, as well as to consider the perspective of their audience. Topics include interview skills, basic conversation skills, and public speaking.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

READING

Close Reading Strategies for Fiction

Course Code: ~Rea280

Description: The Close Reading Strategies for Fiction course covers the multi-sensory, explicit, sequential learning of the art of understanding various fiction genres—how to analyze, synthesize and use critical thinking skills to understand fictional text, through learning the structure of narrative writing with the assistance of graphic organizers, vocabulary development, and class discussions. This course is a great starting place for those with weak reading comprehension skills, which can open up the world of literature for them. For students with comprehension skills in fictional text, who, with explicit instruction in story structures, could improve their understanding of this type of text. The course may be combined with Expository Reading Comprehension or taken singly.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

Comprehension Imagery

Course Code: ~Rea125

Description: The Comprehension Imagery course covers the multi-sensory, explicit, sequential learning of the art of concept imaging in order to increase the ability to form pictures or movies in one's mind while reading. This skill expands language/reading comprehension, reasoning, critical thinking and expressive language skills. Students who have an underdeveloped ability to picture and remember scenes while they read, dramatically affecting comprehension, memory and critical thinking.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Reading and Writing Children's Literature

Course Code: ~Rea265

Description: This back to the basics course exposes students to a variety of children's literature. Students read, discuss and critique various genres of literature with a focus on setting, plot, characters, theme, and overall appeal to children. After being exposed to numerous pieces of children's literature, students write their own children's stories. These stories involve character, setting, and plot development, as well as the incorporation of various themes. Students do not have to be artisans for this class they just need a desire to study this genre and have a positive attitude.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Reading and Writing Technology Tools

Course Code: ~Rea290

Description: In this course, students will be introduced to extensions, apps and technology websites that assist in reading and writing. The course will introduce Snap & Read, Co:Writer, and Learning Ally, as well as other helpful tools depending upon students' academic needs. Any student who would benefit from assistive technology for academic success in reading and writing should consider this course.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Reading Between the Lines

Course Code: ~Rea300

Description: Reading Between the Lines allows students to hone their skills at making inferences. In order to infer meaning from text, readers must combine information from the text with their own background knowledge to make a theory about what is possibly true. Students will practice the skill using

a variety of media such as short film clips, photos, cartoons, song lyrics, and short passages. When they have gained proficiency, they will apply the skill to short stories.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Reading Development

Course Code: ~Rea275

Description: The Reading Development course teaches the multi-sensory development of advanced decoding skills through understanding of linguistic structures (phonetic and meaning-based patterns in words of Anglo-Saxon, Latin, Greek, French origins, grammar), multi-syllabic word attack, vocabulary development, specific comprehension and encoding (spelling). Reading Development is for students who need further explicit instruction to improve decoding and related reading skills after Word Attack Skills or Reading Tutorial.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Reading Fluency

Course Code: ~Rea120

Description: The Reading Fluency course covers the development of reading fluency through intensive oral and silent reading practice linked with comprehension, multi-syllabic word recognition mastery and vocabulary development. This course is for students whose reading speed/accuracy is below the norm and impairs memory and comprehension of what is read. This course may be taken more than once and for different term lengths.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 6

Reading for Academic Purposes

Course Code: ~Rea135

Description: Reading for Academic Purposes covers the multi-sensory, explicit, sequential learning of the art of understanding nonfiction text through focusing on collecting, gathering, organizing and synthesizing information in a text through the use of graphic organizers, teacher modeling, class discussion, notetaking and summarizing. A particular emphasis is put on identifying main ideas and supporting details. This course is for students who have emerging comprehension skills with academic text. Students will practice reading with curiosity, resilience, and empathy. This course may be combined with the Reading Comprehension for Fiction course or taken singly.

Prerequisites:

Permission Required: No

Grades: 10,11,12

Credits: 3

Reading Tutorial

Course Code: ~Rea100

Description: The Reading Tutorial course provides a multi-sensory, alphabetic-phonetic and sequential approach to basic word attack, reading, spelling, and writing skills, explicitly teaching the association between written symbols and their spoken sounds and the correspondence between the sequences of sounds and the sequences of letters. Students read words in isolation, participate in sound dictation, spell targeted words and sentences, read orally from appropriate skill level trade books, and write short pieces toward mastery of these skills. This course is designed for students with significant weaknesses in basic decoding skills, who may also have coexisting challenges that present difficulty for the student in making effective progress in a group of more than three students. Students appropriate for Reading Tutorial are in need of individualized, explicit, intense instruction in order to make effective progress. Students will practice reading with curiosity, resilience, and empathy. This course may be taken only with the recommendation of the reading department and may be taken more than once.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

The Novella

Course Code: ~Rea260

Description: The Novella course provides an opportunity for students served by the reading department to enjoy the classics while sharpening their vocabulary, fluency, and comprehension skills. Through the use of carefully selected literature, students will continue to foster a love of reading while exploring classic novellas. Students will practice reading with curiosity, resilience, and empathy. This course can be used as a precursor for literature courses in the English department.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Understanding Informational Texts

Course Code: ~Rea305

Description: The Understanding Informational Text course explicitly teaches methods in a multi-sensory, sequential way to assist students in understanding and applying information from expository text about various topics. Students will learn about different organization structures of informational text and the unique features that are encountered when reading a nonfiction passage, text, or article. Students will be able to navigate information and have a better understanding of the content. Students will practice reading with curiosity, resilience, and empathy. This course is for students that need support in collecting, synthesizing, and studying information from nonfiction academic texts. This course may be taken in combination with the Close Reading Strategies for Fiction course or taken singly.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Word Attack Skills

Course Code: ~Rea270

Description: The Word Attack Skills course teaches the multi-sensory development of decoding skills through recognition and understanding of linguistic structures (phonetic and meaning-based patterns in words of Anglo-Saxon and Latin origins, along with basic grammar), multi-syllabic word attack, vocabulary development, specific comprehension and encoding (spelling). This course is for students with relatively weak multi-syllable decoding and spelling abilities, perhaps causing dysfluent reading and weak comprehension.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

SCIENCE

Advanced Robotics

Course Code: ~Sci340

Description: Advanced Robotics explores robotic technology, including iterative design, design ethics, user experience, structure, motion, sensors, programming, and logic controls. Students engage with one another in Do-It-Yourself and Do-It-With-Others projects. Students in this course are participants in our school's growing maker culture, which promotes shared leadership and collaboration. This course uses the VEX Robotics platform.

Prerequisites: Intro to Robotics

Permission Required: No

Grades: 9,10,11,12

Credits: 1

All About Birds!

Course Code: ~Sci440

Description: All About Birds! introduces several unique aspects of bird physiology and behavior within the animal kingdom. Students will explore the life history, speciation, and migratory patterns of birds. This course will also discuss factors of avian life history that have been influenced by humans as well as the environmental significance of our interest in bird life and behavior.

Prerequisites:

Permission Required: No

Grades: 9,10,11,12

Credits: 3

Anatomy and Physiology

Course Code: ~Sci100

Description: Anatomy and Physiology introduces students to the structure and function of the human body. Topics include anatomical terminology, detailed exploration of all major body systems, and

common diseases affecting humans. Students will learn how the systems of the body work together by completing a series of laboratory exercises and through class demonstrations.

Prerequisites: Biology
Permission Required: No
Grades: 11,12
Credits: 8

Beekeeping

Course Code: ~Sci450

Description: Beekeeping takes a beginner beekeepers, with no experience, and teaches them the history, the uses, and the “how-to” of being a beekeeper. Students will learn about popular hive designs, construct their own beehives and frames, install live honey bee colonies, split hives, and learn to care for hives during the warmer months. Students will learn how to spot hive diseases, how to medically treat hives, as well as how to collect and extract honey and wax from hives. Students will learn how to prepare hives for winter months, as well as bottle and sell honey to the local community.

Prerequisites:
Permission Required: No
Grades: 8,9,10,11,12
Credits: 3

Biology

Course Code: ~Sci110

Description: Biology introduces students to the fundamental characteristics of living organisms and the biotic and abiotic systems in which they exist. Major topics of study include, but are not necessarily limited to, the following “big ideas” of biology: the importance of homeostasis, both in individual organisms and the ecosystems in which they exist; the cellular basis of life, which includes cell classification, structure, function, metabolism, and role in creating larger structures in multicellular organisms; the role of genetics in determining traits of living things, which includes both Mendelian and non-Mendelian patterns of inheritance, sex linked traits, and the structure and function of DNA; the evolutionary history of life on Earth; evidence of evolution, both as it existed in the past and is seen in the present day is examined, as are the mechanisms by which speciation occurs; systems of classification, which includes classification of cells (prokaryotic and eukaryotic), as well as classification of organisms into domains, kingdoms, and so on.; and the interconnected nature of all living things, introduced through the study of the interactions between living things in the environment. Lab work is an integral part of student exploration of all topics in this course.

Prerequisites:
Permission Required: No
Grades: 9,10,11,12
Credits: 8

Chemistry

Course Code: ~Sci120

Description: Chemistry continues building the core critical, analytical skills required to succeed in the science, including different experimental procedures used to obtain data, as well analytical tools designed to facilitate an understanding of the mechanisms by which chemical reactions progress.

Students are also introduced to the core ideas of chemistry, including: the basis of atomic theory, including the history of the evolution of the idea, an appreciation for electron structure and the properties of different structures, culminating with a discussion of the modern day theory along with critical technological advancements such as the atomic force microscope; balancing chemical equations, the Law of Conservation of Mass, Stoichiometry and the concept of the Mole; and the different types of chemical bonding and the properties of the resulting compounds, and how these properties relate to the number and organization of electrons. Students are also introduced to different modes of data presentation and information organization, including diagramming to represent important information in context, effective note-taking, and table-graphic organizers; mathematical modeling of observed phenomena and data, including the generation and derivation of complex equations in order to make predictions about future behaviors and experimental outcomes; the chemical nature of acids and bases, including an appreciation for reversible reactions, mass action and equilibria, along with usage of the log function. The chemical nature of salts is also explored in the context of this acid-base chemistry. Electrochemistry, including a discussion of the concept of electronegativity and its associated pattern in the periodic table is covered, as well as the concept of anode and cathode. A discussion of reduction-oxidation chemistry and its applications to constructing batteries is included. An introduction to organic chemistry, including the conventions for naming organic molecules, the chemistry of related functional groups, isolation procedures for purifying organic compounds, and an introduction to the chemical mechanisms involved in organic reactions, including substitution and elimination reactions, completes the course of study.

Prerequisites: Algebra I

Permission Required: No

Grades: 9,10,11,12

Credits: 8

Conceptual Physics

Course Code: ~Sci125

Description: Conceptual Physics emphasizes the understanding and appreciation of the physical phenomena discovered in mechanics, forces, waves, sound, light, and electromagnetism without the mathematical emphasis which students acquire in our standard physics course.

Prerequisites:

Permission Required: No

Grades: 10,11,12

Credits: 8

Environmental Science

Course Code: ~Sci175

Description: Environmental Science emphasizes the terminology, theories, and cycles evident in various environments, as well as the relationships among ecosystems. Students will focus on the changes brought about by human involvement, as well as current topics such as pollution, the greenhouse effect, pest control, and biodiversity.

Prerequisites:

Permission Required: No

Grades: 9,10,11,12

Credits: 3

General Science

Course Code: ~Sci185

Description: This course explores the fundamentals of physical interactions, Earth sciences, material sciences and life sciences. Students in this course engage in active learning through playfulness, curiosity, collaboration, and academic risk-taking.

Prerequisites:

Permission Required: No

Grades: 8

Credits: 8

Health

Course Code: ~Sci385

Description: Health emphasizes the importance of students making informed and positive healthy choices, both for themselves and for others around them. The course examines the short- and long-term benefits of physical fitness and includes a study of nutrition. Substance use, including alcohol, illicit drugs, tobacco and vaping products are discussed, with an emphasis on the negative effects abuse of these products can have both in the short and long term. Students are introduced to the human reproductive system and the processes of conception, pregnancy, and birth. The importance of healthy sexual practices is addressed in a comprehensive manner, encompassing both the use of various methods of contraception as well as the benefits of abstinence. Sexually transmitted infections (STIs) are also addressed in this course. Additionally, healthy relationships and the concept of consent in a relationship are addressed. This course develops skills and poses challenges for college preparation through varied information acquisition, presentation of knowledge, and discussion of intrapersonal experiences.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Health: CPR & First Aid Certification

Course Code: ~Sci390

Description: CPR/First Aid Certification combines lectures, demonstrations, and video with hands-on training and practice. Students in this course learn to recognize and respond to emergencies including shock, cardiac and breathing emergencies (for adults, children, and infants), heat and cold emergencies, sudden illnesses, and poisonings. Additionally, participants learn first aid for everything from cuts and scrapes to muscle, bone, and joint injuries.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Introduction to Marine Biology

Course Code: ~Sci210

Description: Introduction to Marine Biology emphasizes the principles, concepts, and terminology involving the study of marine organisms found in shallow water, tropical ocean environments. The anatomy

and relationships of organisms from algae to fish are examined in detail. The course also examines the human impact on this part of the ocean. Students will gain the information and skills needed for a foundation in marine biology, and for further study in the life sciences. This course includes laboratory exercises and demonstrations to assist students in understanding and investigating the processes of specific marine environments, and provides practical, manipulative, and problem solving experiences.

Prerequisites: Biology
Permission Required: No
Grades: 10,11,12
Credits: 3

Introduction to Robotics

Course Code: ~Sci335

Description: The Introduction to Robotics course presents elements of study (including structure, motion, sensors, and programming controls) necessary for this technology. Students engage with one another in Do-It-Yourself and Do-It-With-Others projects. Students in this course are participants in our school's growing maker culture, which promotes shared leadership and collaboration. This course uses the VEX Robotics platform.

Prerequisites:
Permission Required: No
Grades: 8,9,10,11,12
Credits: 1

Maker Science

Course Code: ~Sci445

Description: Maker science focuses on how materials respond to the manufacturing process, explored through a number of projects of the student's choice. Materials used vary from non-ferrous metals (jewelry metals), glass, wood, and stone. A large variety of processes can be applied to projects for making jewelry or other small decorative items. Journaling and research are used to enrich the experience.

Prerequisites:
Permission Required: No
Grades: 8,9,10,11,12
Credits: 3

Physical Science

Course Code: ~Sci255

Description: Physical Science is designed to introduce students to multiple fields of scientific study in order to help them better gauge their interests and goals as they proceed through their individualized science curriculum. Major fields of study include physics, chemistry, and geology.

Prerequisites:
Permission Required: No
Grades: 8,9,10,11,12
Credits: 8

Physics

Course Code: ~Sci230

Description: The Physics course emphasizes the mathematical techniques and concepts needed to solve problems involving physical phenomena of mechanics, forces, waves, sound, light, and electromagnetism. Students in this course engage in active learning through playfulness, curiosity, collaboration, and academic risk-taking.

Prerequisites: Algebra II

Permission Required: No

Grades: 10,11,12

Credits: 8

Technology Design Challenge

Course Code: ~Sci235

Description: Technology Design Challenge incorporates scientific technology into the design and construction of one or more projects. Students will learn and apply design thinking into their creative processes. They will learn to recognize the many uses of technology, and think through the constraints they may face as designers, helping them to develop creative confidence.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

The Medical Lab

Course Code: ~Sci510

Description: We've all had the experience of getting sent to "the lab" and having our blood drawn as part of our visits to the doctor. But what happens next to these samples, and what does that tell us about our health? In this course, students will explore some common types of lab tests done on blood and urine samples and will make connections between the results of these tests and the implications for a person's health.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

VISUAL AND PERFORMING ARTS

3D Cardboard Design

Course Code: ~Vis680

Description: This class focuses on 2D drafting to create 3D projects. 3D design will make use of cardboard and chipboard materials. Students will be using box-cutters and X-Acto knives to construct 3D models. Students will be introduced to basic ideas of construction and architectural planning skills.

Projects will include designing a haunted house, an animal head, and mini-studies of well-known sculptures. The work of artist James Grashaw will be discussed and analyzed with respect to the topics of permanence in art and the distinction between plagiarism and inspiration.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Acting Shakespeare

Course Code: ~Vis110

Description: Students will learn techniques for understanding and acting Shakespeare's works. Most important is that students find acting Shakespeare fun and enlightening. Emphasis will be put on learning to turn Shakespearean acting into a physical experience including stage combat, appropriate expressiveness, and clowning. The student will come away from the class wanting more Shakespeare in his/her life.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Advanced Acting Techniques

Course Code: ~Vis400

Description: In Advanced Acting Techniques, students will build on techniques learned in Basic Acting and Performing Arts Seminar. The course will include Michael Chekhov's Acting Techniques, the basics of the Stanislavsky Method, and Boleslavsky's ideas in his book Acting. Students will gain an understanding of acting through the ages from Greek chorus to Victorian melodrama to modern theatre. A performance piece will be chosen, and students will be required to take on a character or characters and present a performance to the public.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Arts Management Internship

Course Code: ~Vis200

Description: Supporting the brilliant performances at the Cultural Center is the business of Arts Management. The performing arts cannot happen without the important background work of budgeting, scheduling, coordinating, marketing, and publicizing. Arts Management student interns help to make the Cultural Center and its programs a success by playing a vital role in the Center's operation.

Prerequisites:

Permission Required: yes

Grades: 8,9,10,11,12

Credits: 9

Basic Acting Techniques

Course Code: ~Vis115

Description: Basic Acting Techniques is a course for beginners or a refresher class for seasoned actors. This course builds actors' creative confidence through active learning, creativity, and play. This course covers a broad range of acting techniques.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Basic Black and White Photography

Course Code: ~Vis280

Description: This course is designed to introduce the basic concepts and skills of black and white photography. This class focuses on proper use of the camera, darkroom techniques, and creative photography. Students learn about the history of photography through discussion of the work of 19th and early 20th century photographers as well as contemporary photographic artists, and through demonstration of lensless photography. This course builds students' creative confidence through active learning, creativity, and play.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Block Printing

Course Code: ~Vis170

Description: This course utilizes the graphics process of block printing, which involves carving away part of a wood or rubber block and printing the remaining raised portion. The history of block printing and a study of block printing artist, M. C. Escher are on-going themes throughout the course.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Chorale

Course Code: ~Vis220

Description: The Eagle Hill Chorale class serves to increase the musicianship of individual students while building a musical ensemble. Musicianship is measured by students' understanding of 1) musical terminology and its applications, 2) what constitutes effective and healthy vocal technique, 3) how to achieve appropriate expression in singing and in choral performance, and 4) what is necessary from the individual at any one moment in a performance to improve the sound of the whole ensemble. Building any musical ensemble requires that its members, including the director, treat each other with respect and good humor; that they be mutually supportive, working for the good of the whole rather than of any one individual; and that they be willing to make substantive contributions towards

publicizing and presenting the ensemble's concerts. Chorale students need to be able to sing in tune and to hold their part in a four-voice choral arrangement.

Prerequisites: Introduction to the Performing Arts
Permission Required: No
Grades: 8,9,10,11,12
Credits: 6

CNC Woodworking

Course Code: ~Vis475

Description: The CNC Woodworking class takes the student through the process of planning, designing, programming and running projects on a Shopbot CNC machine. The students will learn the process and create original pieces. They will have the opportunity to choose and design their own projects and see them through to a final product. Students are limited only by their imaginations in this class. As they master the Vcarve software, they will see their ideas come to fruition. Time will be divided between the desktop publishing computer room and the woodshop. While in the computer room, students will learn the software and design their projects. The second portion of the class will take place in the woodshop where their projects will be created using the CNC Shopbot machine.

Prerequisites:
Permission Required: No
Grades: 8,9,10,11,12
Credits: 3

Dance Concepts

Course Code: ~Vis595

Description: Dance Concepts is a studio course that explores the dance activities of improvisation, technique, choreography/composition, and performance. Students will create and perform short and informal dance studies in a variety of styles and will use movement analysis, choreographic concepts, and personal reactions to write about and critique dance performances, both informal and professional. Students will engage in creative/critical conversations that challenge their awareness of arts making, individual creative voice, and the overall process of discovery. Close attention will be paid to an ethical creation of work and the authentic use of voice.

Prerequisites:
Permission Required: No
Grades: 8,9,10,11,12
Credits: 3

Desktop Publishing & Yearbook

Course Code: ~Vis190

Description: This course utilizes the computer software Adobe Creative Suite to produce the school's yearbook. Targeted skills include using digital cameras, scanners, preparing photographs for publication, page layout and design, and meeting publisher's deadlines.

Prerequisites:
Permission Required: No
Grades: 8,9,10,11,12
Credits: 3

Digital Drawing

Course Code: ~Vis670

Description: Operating in Adobe Fresco, students will become familiar with the digital drawing software and related techniques. Students will explore a range of possibilities within the digital drawing world based in the Adobe Creative Cloud suite.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Drawing

Course Code: ~Vis235

Description: Drawing helps students learn to translate the world around them into 2-D space. This course explores fundamental drawing techniques through observational study and the use of a variety of drawing materials and methods. Individual instruction is given, with periodic group critiques providing the source of shared challenges and inspirations. This class follows a plan of sequential projects building on fundamental drawing principles.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Fashion Sketching

Course Code: ~Vis675

Description: Fashion sketching focuses on creating the fashion figure referred to as a croquis. Students will be introduced to techniques pertaining to rendering the fashion form using marker, colored pencil and watercolor. Reading and analyzing fashion trends and mood boards will help inform students' sketches. This class will culminate with the creation of a 8-10 look line-up, and students will be expected to participate in a constructive critique giving and receiving comments among their peers. Students will design their own set of croquis forms to represent their personal style and intentions.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Fiber Arts

Course Code: ~Vis665

Description: This class will focus on contemporary-styled fiber art wall hangings. Students will be introduced to the differences between natural and synthetic fibers and experiment to see how each type of fiber takes dye differently. Students will practice multiple techniques, including wrapping, braiding,

weaving, felting, and fraying which they will apply to their own fiber wall hanging designs. Students will also explore color palette development and keep records of dye labs to create their own colorways.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Film as Art

Course Code: ~Vis135

Description: Film as Art explores American and foreign films as an art form. The objective is to develop a keen, critical appreciation of films, from all over the world, as art. The method is to work with established criteria for judging and appreciating the film medium. Students view films and read the reviews of each film. Then each student writes his or her own review based on the established criteria.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Hand Built Pottery

Course Code: ~Vis255

Description: Hand Built Pottery covers the basics of creating pottery by hand. Students will be exposed to the main terms and techniques that accompany the making pottery. The first half of the course focuses on learning the process for creating with clay, and students will be asked to follow along with task-specific demonstrations to understand fully how a technique works and its purpose. The basic hand techniques of coil, pinch pot and slab construction will be taught. Once proficient with these processes, students will plan and create their own pottery pieces to be glazed and fired in the kiln to presentation-worthy completion. Students will also be required to make preparatory sketches in their sketchbooks to plan their individual pieces.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Improvisation

Course Code: ~Vis105

Description: This course builds students' confidence and improvisational skills. They practice acting in improvisational situations, using their voices, creating songs, and using props. In addition, students learn to act with partners on the stage and to understand the methods of improvisational performance.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Introduction to Guitar

Course Code: ~VIS685

Description: This course will give students hands-on instruction in playing the guitar. The instruction will begin at an entry level with scaffolding and advanced challenges provided. Students will learn how to play notes, scales, chords, and songs. Students will also be taught various rhythmic techniques, such as alternating strumming patterns and finger picking.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1,3,6,9

Introduction to Lighting

Course Code: ~Vis695

Description: The class will explore the theories of theatrical lighting design. We will begin with learning the different lighting instruments and the safe process of rigging and hanging the lights. Students will learn how to cable and operate the dimming system and focus all fixtures. Following that, the course will introduce the ETC ION lighting board. Students will learn how to write cues and program the board for performances.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Introduction to Technical Theater

Course Code: ~Vis570

Description: The Introduction to Technical Theater class will work with students who have an interest in exploring the world of backstage work. They must demonstrate attention to detail, teamwork, organizational skills, responsibility, initiative, and a can-do attitude. They will work with faculty members designing and implementing lighting, sound, rigging, and set construction, and running the technical functions for each concert and production—in addition to less glamorous but equally important labor such as setting up risers and other furniture, and helping to keep equipment organized and well-maintained. This introductory class will be an opportunity to see if the Technical Theater Intern program is a good fit for the student.

Prerequisites:

Permission Required: Yes

Grades: 8,9,10,11,12

Credits: 3

Introduction to the Performing Arts

Course Code: ~Vis625

Description: Introduction to the Performing Arts is an exploratory course focused on performance art. Integrating the study of world music, instruments, artistic theory and history with the practice of singing, playing, acting, and dance, the course introduces students to a variety of performance opportunities and arts knowledge. Students will be challenged to create, practice, and perform

each day as they discover different ways they are interested in interacting with the arts. Topics to be introduced include but are not limited to: percussion and rhythm, instrumental practice, choral singing, spoken word, songwriting, improvisation, music in social justice, production, and dance, as well as brief introductions to some of the visual art offerings at Eagle Hill. This class is a prerequisite for EHS Chorale, Jam Band, and IB Music.

Prerequisites:

Permission Required: No

Grades: 8,9

Credits: 1

Introduction to Watercolor

Course Code: ~Vis660

Description: This class will focus on the range of what can be done with watercolor. Students will work with tube, pan, and liquid watercolors. Coursework will consist of observational work as well as experimental work. The class will cover basic techniques (e.g., wet on wet, wet on dry) as well as experimental techniques like incorporating salt, plastic wrap, and alcohol to create new textures.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Jam Band

Course Code: ~Vis240

Description: The Jam Band course provides students with an understanding and appreciation of collective creative expression in music through playing and singing, both in class and in live performances. Students develop creative skills, performance techniques, and social skills through working with their instruments, different musical forms, specific songs, and the benefits and challenges of musical group dynamics. The culmination of the course is an all-day recording session at a professional studio, where the class essentially creates its own CD.

Prerequisites: Introduction to the Performing Arts

Permission Required: Yes

Grades: 8,9,10,11,12

Credits: 6

Making with Lasers

Course Code: ~Vis610

Description: Students in this course will become familiar with laser cutters and their different applications. The course begins with work in Corel Draw to create designs, models and prototypes. Students will then learn how to operate the makerspace laser. Challenge projects in design, cutting and assembly will be assigned. A final project will be determined and completed.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Making with Metal

Course Code: ~Vis605

Description: In this course, students will be introduced to different areas of working with metal. Whether it is to solve a problem or to create a piece of art, metal can be used in many different ways. We will explore melting steel and casting it into new parts, welding and the different types and applications, sheet metal and assorted types of steel stock. Students will start with instruction, be assigned a number of challenges, then decide on a final project.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Making with Metal Exploratory

Course Code: ~Vis640

Description: In this course, students will learn the basics of cutting metal, shaping metal, MIG welding, and turning steel/aluminum on a metal lathe. Students will have the opportunity to practice their new skill in the making of an individual project.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Mixed Art Media

Course Code: ~Vis260

Description: The Mixed Media course encourages creative expression that incorporates multiple materials within two-dimensional artwork. Openness to experimentation is essential. Through freely manipulating traditional materials such as pencil, ink, paint, chalk, and crayons with non-traditional materials such as adhesives, foils, and transfers, students develop a flexible approach to the problem of visually expressing and presenting their creative thoughts.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Modern/Contemporary Dance

Course Code: ~Vis620

Description: Modern/Contemporary Dance is a studio technique course that allows students to develop expression through movement. This style of dance focuses on body and core strength, spatial awareness, and the use of breath, body weight, and release/recovery. Students will build from the techniques of modern dance pioneers José Limón and Martha Graham. By the end of the term, students will have learned a full-length dance utilizing these techniques.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Music Appreciation

Course Code: ~Vis460

Description: Music Appreciation is open to all levels of students who enjoy listening to and discussing music. Students will bring their own musical interests to class discussions through presentations on songs and artists while learning about the diverse musical interests of their peers. Through readings and class discussion students will be introduced to a variety of musical styles and cultures. Tailored to the individual group, possible topics explored in Music Appreciation include song writing, drums of the world, and Western music history and important composers.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Music Theory

Course Code: ~Vis215

Description: Music Theory is open to any student who is interested in music to develop a basic understanding and knowledge of the theory behind why music works, while gaining basic keyboard and sight-reading skills. This course helps students build a foundation in basic musical elements as they discover how pitch, rhythm, harmony, and structure work together to create original music. Students will study existing music to understand compositional rules and techniques, while using their knowledge to analyze the form, key, and rhythmic features as well. This course provides essential groundwork for students interested in music performance and composition, as well as a good introduction to those new to music study. Possible topics include learning the Circle of Fifths, finding the right chords for a melody, figuring out rhythmic patterns, and sight-reading at the keyboard. A Prerequisite for Advanced Music Theory and recommended for those interested in IB Music.

Prerequisites: Advanced Music Theory

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Musical Theater Dance

Course Code: ~Vis615

Description: Musical Theater Dance is a studio technique course that develops jazz technique and performance quality for the stage. Students will examine the styles of well-known Broadway choreographers, such as Bob Fosse (Chicago, Pippin), Jerome Robbins (West Side Story, Fiddler on the Roof), and Michael Bennett (A Chorus Line). In addition to creating new choreography as a class, students will also have a chance to learn pieces of original Broadway choreography.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

One Act Competition

Course Code: ~Vis125

Description: An advanced acting course for students who want to be involved in dramatic competitions with other schools. Students would have to audition or be screened by me to take part in the class. The commitment would mean that students would agree to all that is required by the Massachusetts High School Drama Guild including attending technical rehearsals and Performances as scheduled by the Guild. In addition, they would make a commitment to attend all rehearsals called by the director. Students would receive state recognition for their efforts as well as having the experience of performing in a competitive venue.

Prerequisites:

Permission Required: yes

Grades: 8,9,10,11,12

Credits: 3

Photoshop

Course Code: ~Vis185

Description: This course utilizes the computer graphics program, Adobe Photoshop CS3. Targeted skills include scanning, digital photography, manipulation of photographs, collages and the basics of digital darkroom techniques.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Pottery Lab

Course Code: ~Vis655

Description: This one-term lab course provides access to the pottery studio for an advanced student to use the wheel independently. Students enrolling in the Pottery Lab must be self-sufficient and experienced on the wheel.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Public Speaking

Course Code: ~Vis365

Description: A fun, practical course to improve your ability to communicate with others and become an effective student and leader.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Screen Printing for Commercial Graphics

Course Code: ~Vis165

Description: This course utilizes the graphics process of screen printing, focusing on projects such as t-shirts, stickers and posters found in the commercial graphics field. In screen-printing, the principle involved is forcing ink through a stenciled screen. Procedures for making screens will include both hand-cut and photographic methods.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Screen Printing: Warhols

Course Code: ~Vis160

Description: This course utilizes the graphics process of screen printing. In screen-printing, the principle involved is forcing ink through a stenciled screen which has been created utilizing a photographic process. Basic art skills such as drawing, painting and color theory are targeted. Students create a 'self-portrait' in the style and manner of 60's pop artist, Andy Warhol who is considered to be the first artist to combine the areas of fine-arts and graphics.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Set Building and Design

Course Code: ~Vis140

Description: This course exposes students to the technical and creative aspects of set designing and building. Students design and build sets to be used in productions at Eagle Hill School. Using hand drawings and theater software, students create interactive 3-D computer models of theater or performance spaces where the systems usually associated with performance (lights, sound, fly bars, revolves, and trucks) are used. Basic carpentry and electrical skills are learned while building sets, as well as painting and color coordination for dramatic effect. In addition, students learn about 'dressing the set' for performances.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Stage Combat

Course Code: ~Vis385

Description: In Stage Combat, students learn about stage combat and how to fight safely on stage. The two areas they will be working on are hand-to-hand combat and single-sword combat. Hand-to-hand combat entails falling, slaps, grabs, chokes, pushes, tackles, punches, and kicks. Single-sword combat is

sword fighting with one sword. Students will learn the parts of a sword and terms of the trade. The class will train in the fighting techniques and will perform in front of an audience.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Studio Art & Portfolio Preparation

Course Code: ~Vis285

Description: This class is designed for students who want to continue their artistic efforts at a more advanced level and/or intend to participate in post-high school graduation education at an art school, college, or university. Students work in all areas of art with particular emphasis on drawing, painting, and two-dimensional design. Through a variety of projects students are encouraged to look at and respond to themselves in terms of the aesthetic world around them. Students experience many opportunities to explore varied media, art styles, and subjects. To be successful in this class, students are required to complete homework on a weekly basis and keep a thorough personal sketchbook of observation sketches.

Prerequisites:

Permission Required: yes

Grades: 8,9,10,11,12

Credits: 9

Technical Theater Internship

Course Code: ~Vis205

Description: Students manage and run the state-of-the-art theatrical lighting, sound, and rigging systems at the Cultural Center for our own plays, concerts and other functions and for visiting productions. Interns must be interested in technical theater and ready to be a responsible, reliable, devoted member of a team. Student interns participate in intensive training. Then, they take on responsibilities such as consulting with performing artists about their technical needs, designing and implementing lighting, sound, rigging, and set, and running the technical functions for each concert and production. Ongoing professional development helps interns hone their practice of technical arts. Interns work at scheduled times but must also be available as-needed. They earn academic credit, but more importantly, they benefit from the exciting experience, becoming expert in theatrical systems, collaborating with performing artists, and building unusually substantive resumes.

Prerequisites:

Permission Required: yes

Grades: 8,9,10,11,12

Credits: 9

The Art of Oral Storytelling

Course Code: ~Vis690

Description: Oral storytelling existed long before writing ever existed. Without writing, one could not memorize a story because there was no objective written record that was considered to be the correct version. So, stories were slightly different every time they were told but were, nevertheless, considered to

be the same story. Students will learn how to internalize a story image by image instead of memorizing it word for word. They will practice how to tell just the right amount of detail by watching and responding to an audience. Students will tell one story of their choice in front of the class at the end of this course. Students will also learn the important role, influence, and responsibilities held by oral storytellers in ancient Irish culture.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

Woodworking

Course Code: ~Vis155

Description: This course acquaints the students with the essential principles of woodworking. Topics include wood characteristics, use of hand tools, portable power tools, and basic machinery. Emphasis is placed on proper technique, safety, and policies for the woodshop. Students complete a project designed to develop primary woodworking skills.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Woodworking: Box Making

Course Code: ~Vis555

Description: In this course students learn basic woodworking techniques, power/hand tool use and safety while making a small box project. The project will start with a student generated design idea, developed cooperatively with the teacher. As the design evolves, the student will learn about design aspects as well as how various woodworking techniques play an important role in the project's development. Each student will complete a small box of their own design before the term's completion.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 1

WORLD LANGUAGES

Fantasmas on Film

Course Code: ~Wor250

Description: Ghosts mark loss and a return and Spanish cinema is filled with them. This course will ask why. Through in-class discussions, presentations, and written assignments, students will explore Spain's culture and history through "hauntings" in film, photography, and visual art. The course will be

conducted in English. Films will be viewed in Spanish with English subtitles, and readings will be made available in both languages.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 3

Latin I

Course Code: ~Wor110

Description: Latin I provides a general introduction to the nature of language study for students across the spectrum of backgrounds and abilities. Goals for the series of Latin courses include students reading the Latin of classical authors with confidence, developing an awareness of the culture of the Romans (including its historic significance and contemporary relevance), enhancing their general language learning techniques and aptitudes (including facility with English), and developing their thinking skills by strengthening the skills used for deductive and analogous reasoning, interactive learning, comparative analysis, and critical assessment.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Latin II

Course Code: ~Wor115

Description: Latin II provides continued instruction in the language. Goals for the series of Latin courses include reading the Latin of classical authors with confidence, developing an awareness of the culture of the Romans (including its historic significance and contemporary relevance), enhancing students' general language learning techniques and aptitudes (including facility with English) and developing thinking skills by strengthening deductive and analogous reasoning, interactive learning, comparative analysis, and critical assessment.

Prerequisites: Latin I

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Spanish I

Course Code: ~Wor140

Description: Spanish I introduces students to Spanish culture and language. Students read, write, listen and speak about cultural topics such as home and family, community, health, environment, education, food, clothing, and leisure activities. Students learn to express information about themselves and to compare and contrast their cultural backgrounds with those of Spanish-speakers around the world. In addition, students reinforce and expand their knowledge of other academic areas through interdisciplinary connections. Class activities include dialogues, discussions, readings, film viewing, computer

activities, performance tasks and essays. They will engage in independent, paired, and group practice, as well as oral and written quizzes and tests. For listening comprehension and improvement of their pronunciation, students use computer-based applications.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Spanish II

Course Code: ~Wor145

Description: Spanish II is a continuation of Spanish I. The course builds on the cultural knowledge and language acquired during the students' first year of study and furthers their understanding of Spanish. Class activities include dialogues, discussions, readings, film viewing, computer activities, performance tasks and essays. They will engage in independent, paired, and group practice, as well as oral and written quizzes and tests.

Prerequisites:

Permission Required: No

Grades: 8,9,10,11,12

Credits: 8

Spanish III

Course Code: ~Wor150

Description: Spanish III is a continuation of Spanish I and II. The course builds on the cultural knowledge and language acquired during the students' prior years of study and furthers their understanding of Spanish. Class activities include dialogues, discussions, readings, film viewing, computer activities, performance tasks and essays. They will engage in independent, paired, and group practice, as well as oral and written quizzes and tests.

The Marvelous Real: Short Fiction in Latin America

Course Code: ~Wor255

Description: Latin American literature is famous for short stories that subvert, exceed, or abandon the real. Why? From colonial encounters to magical realism, this course grapples with how empire, race, and gender occasion ruptures in narrative realism. Students will read, discuss, and write about short fiction from authors like Gabriel García Márquez, Jorge Luis Borges, and Silvina Ocampo. The course will be conducted in English and readings will be available in English and Spanish.
