

ICATT Apprentices

What is the ICATT Apprenticeship Program?

- Three-year “earn while you learn” program
- Combination of coursework at your respective college and hands-on learning with an ICATT Network Company
- Excellent preparation for high-demand professions in manufacturing and other fields with complex technologies

How does it work?

The ICATT Apprenticeship Program alternates between work and college, combining practical skills and theory. Apprentices earn wages while at work, a stipend while at college, and your ICATT Network Company covers the cost of college tuition and fees as well.

What happens when the program is over?

Most ICATT Network Companies have a 2-year employment guarantee upon successful completion. Since the ICATT Apprenticeship Program focuses on high-demand positions, every apprentice who successfully completes the program is guaranteed to have the skills that companies need and want. Some apprentices go on to become supervisors, managers, engineers, and even C-level executives.

BENEFITS:

- Gain skills for an in-demand profession
- Earn a debt-free associate degree
- Receive an industry-aligned education combined with hands-on training
- Obtain national and international credentials
- Increase your salary and advance your career

CURRENT TRAINING PROGRAMS:

Advanced Manufacturing Technicians

Advanced Manufacturing Technicians manufacture, maintain and monitor high-tech mechanical systems, including advanced skills in metalworking combined with knowledge of fluid power and circuits.

Mechatronics Technician

Mechatronics Technicians create, troubleshoot and maintain electromechanical systems, including metalworking, pneumatic and hydraulic systems and a strong focus on electronics and programmable logic controllers.

CNC Machining

CNC Machining Professionals program and operate computer-controlled metalworking machines to produce precision components through processes such as milling, turning, drilling or grinding.

Pharmaceutical Manufacturing Technician

Pharmaceutical Manufacturing Technicians operate, maintain and troubleshoot high-tech equipment and machinery to produce pharmaceutical components and products.

Industrial Electronics Technician

Industrial Electronics Technician install, maintain, and repair electrical operating, production and process systems, from switchgear and control systems to power supply systems and communications and lighting equipment.
