- Shortness of **BREATH**
- New loss of **TASTE OR SMELL**

- **COUGH**
- **SORE THROAT**
- **VOMITING**

- Been in **CONTACT** with someone with COVID-19

What should you do if you suspect your child may have COVID-19

If your child has experienced the symptoms listed above in the last 14 days, or has been in contact with anyone who has tested positive for COVID-19 in the last 14 days, or have questions, call:
BARTON COVID-19 HEALTH LINE 530.600.1999

If your child needs to be tested for COVID-19

Health Line callers can ask questions and may be scheduled for screening, testing and medical care at Barton's referral-only respiratory screening centers or our Respiratory Urgent Care at Stateline Medical Center. El Dorado County Public Health is also providing COVID-19 testing in South Lake Tahoe to anyone who would like a test; pre-registration is required for an appointment: <https://lhi.care/covidtesting> (or call 888-634-1123). Schedule a visit with your pediatrician afterwards to discuss if your child can return to daycare based on the results.

If your child is experiencing symptoms

You and your child should restrict activities outside your home, except for getting medical care and/or getting tested. Do not send your child to daycare, school, or to public areas.

To prevent the spread of illness:

- Cover coughs and sneezes.
- Clean hands often.
- Avoid sharing personal household items.
- Clean all "high-touch" surfaces daily.

If your child tests positive for COVID-19

Your child should remain at home for 10 days from the onset of their symptoms AND be fever free for a minimum of 72 hours prior to returning to daycare or school.

If your child is not tested or receives a non-COVID-19 diagnosis

If your child is seen by a provider and does not meet criteria for COVID-19 testing, they will not be tested at Barton. Please plan to keep your child out of daycare or school for 10 days from the start of their illness unless they have a note from their provider.
