

Procedure - Response to Student Injury or Illness

EVALUATION

When a student is injured or ill at school or during any school-sponsored activity to any degree, it is the responsibility of staff to see that immediate care and attention is provided to the student unless or until the staff member is relieved by a staff member certified in first aid, a nurse, a doctor, or emergency personnel.

Except in cases of very minor injuries (e.g., cuts, scrapes, rug burns) that, in the judgment of the school nurse, staff member certified in first aid or principal or designee do not pose a serious health risk to the student and will not worsen if the student remains at school, the principal or designee and school nurse (if not already notified) will be promptly notified of any student's: 1) injury; 2) illness; or 3) physical trauma that could have caused injuries as yet unobservable.

For any injury, illness, or trauma serious enough to call 911, any staff member may call 911 and initiate the building or department emergency response plan.

EMERGENCY TREATMENT

Upon recommendation of the school nurse or a staff member certified in first aid, Emergency Medical Services (EMS) will be called immediately and the student will be transported to the hospital by EMS. Students with uncontrolled bleeding and those who have suffered temporary suffocation, cardiac arrest, fractures or head, neck, eye, ear, or spinal injuries will only be moved and transported by EMS.

PARENT OR EMERGENCY CONTACT NOTIFICATION

Except in cases of very minor injuries (e.g. cuts, scrapes, rug burns) the principal or designee will notify the parent (or, if the parent cannot be reached, the emergency contact), to advise them of the student's condition as soon as practicable.

The student's parent or emergency contact will decide, in non-emergency cases, whether: 1) the parent or emergency contact will transport the student to the hospital; 2) the parent or emergency contact will pick up the student or 3) the student will remain at school.

ADVANCED DIRECTIVES

The district will consult with its legal counsel prior to accepting any advance directives to physicians to limit medical treatment.
