<u>Indian Hill Bond/Operating Levy</u> - May, 2021

Mason City Schools Operating Levy - March, 2020

FINDINGS

- What are the critical factors of school financial planning IN WYOMING
- What are the key point of understanding and key communication points for Wyoming's Financial Stability
- How can our school community better understand and support our efforts towards Financial Stewardship

FINDINGS

Local funding is key - Wyoming is 73% locally funded through property taxes and income tax

Detailed expenditure data is confusing & difficult to understand, but can help address specific concerns as needed Comparative analysis should be used on a limited basis Education is a personal experience and the experience Wyoming families are

looking for is unique

Achievement matters and is linked to willingness to contribute financially

Rankings are important

Student experience is important - are students being offered engaging opportunities and how are my kids being treated Confidence in teachers is high

Engagement and communication is critical These factors drive confidence in Wyoming finances - not necessarily specific financial data

RECOMMENDATIONS AND CONCLUSIONS

- Communication of achievement, rankings and report card data = value indicators
- Parent / family / taxpayer / teacher / student testimony
- Straightforward / explicit financial information when communicating financial planning Example: Any new levies will partially replace expiring debt levies
- Share expenditure data in a way that demonstrates the "Wyoming Opportunity" and how the investment impacts the experience
- Understand community / voter demographics
- Upcoming Strategic Plan work should include financial stability components
- Continue to offer opportunities for feedback (surveys) student, family & alumni
