

This algebra based course divided into 2 semesters.

For the 1st semester, we will learn to how to think about experiments, solve for standard deviation and use Statistics in practical life.

The 2nd semester is where you can apply what you have learned by taking the dual credit collage course and save time, money, and stress in your future academics.

Have you ever wondered how many blue m&m's are in each bag? Or wanted to figure out what spaces to buy in monopoly? Or how many combinations of food there are on the menu? Then this is the class for you! Apply real world concepts, understand math for collage, and have some fun in DC Probability & Statistics.

Prerequisite : Algebra 1

Probability & Statistics
Foodⁿ
