

# PRE-PARTICIPATION PHYSICAL EVALUATION FORM (PPE)

The IHSAA Pre-participation Physical Evaluation (PPE) is the first and most important step in providing for the well-being of Indiana's high school athletes. The form is designed to identify risk factors prior to athletic participation by way of a thorough medical history and physical examination. The IHSAA, under the guidance of the Indiana State Medical Association's Committee on Sports Medicine, requires that the PPE Form be signed by a physician (MD or DO), nurse practitioner or physician's assistant holding a license to practice in the State of Indiana. In order to assure that these rigorous standards are met, both organizations endorse the following requirements for completion of the PPE Form:

- 1. The most current version of the IHSAA PPE Form must be used and may not be altered or modified in any manner.
- 2. The PPE Form must be signed by a physician (MD or DO), nurse practitioner or physician's assistant only after the medical history is reviewed, the examination performed, and the PPE Form completed in its entirety. No pre-signed or pre-stamped forms will be accepted.
- 3. SIGNATURES

The signature must be hand-written. No signature stamps will be accepted.
The provider's signature and license number must be affixed on page three (3).
The parent signatures must be affixed to the form on pages two (2), five (5) and seven (7).
The student-athlete signature must be affixed to pages two (2), five (5) and seven (7).
If the student-athlete is at least 18 years old or parent if not, the signature must be affixed
to pages six (6) and seven (7)

Your cooperation will help ensure the best medical screening for Indiana's high school athletes.

### PREPARTICIPATION PHYSICAL

## 4th Edition, American Academy of Pediatrics

Form is retained by physician/healthcare provider.	inger than 18) before your appointment. <u>History</u>
Name:	Date of birth:
Date of examination:	
Sex assigned at birth (F, M, or intersex):	How do you identify your gender? (F, M, or other):
List past and current medical conditions	
Have you ever had surgery? It yes, list all past	t surgical procedures
	prescriptions, over-the-counter medicines, and supplements
(herbal and nutritional).	
Do you have any allergies? If yes, please list a	all your allergies (ie. Medicines, pollens, food, stinging insects).
Are your required vaccinations current?	

Patient Health Questionnaire Version 4 (PHQ-4)

Overall, during the last 2 weeks, how often have you been bothered by any of the following problems? (Circle Response.)

	Not at all	Several Days	Over half the days	Nearly every day
Feeling nervous, anxious, or on edge	0	1	2	3
Not being able to stop or control worrying	0	1	2	3
Little interest or pleasure in doing things	0	1	2	3
Feeling down, depressed, or hopeless	0	1	2	3

(A sum of  $\geq$  3 is considered positive on either subscale [questions 1 and 2, or questions 3 and 4] for screening purposes.)

GENERAL QUESTIONS (Explain "Yes" answers at the end of this form. Circle questions if you don't know the answer.)	Yes	No
1. Do you have any concerns that you would like to discuss with your provider?		
2. Has a provider ever denied or restricted your participation in sports for any reason?		
3. Do you have any ongoing medical issues or recent illness?		
HEART HEALTH QUESTIONS ABOUT YOU	Yes	No
4. Have you ever passed out or nearly passed out during or after exercise?		
5. Have you ever had discomfort, pain, tightness, or pressure in your chest during exercise?		
6. Does your heart ever race, flutter in your chest, or skip beats (irregular beats) during exercise?		
7. Has a doctor ever told you that you have any heart problems?		
8. Has a doctor ever requested a test for your heart? For example, electrocardiography (ECG) or echocardiography.		

HEART HEALTH QUESTIONS ABOUT YOU (CONTINUED)	Yes	No
9. Do you get light-headed or feel shorter of breath than your friends during exercise?		
10. Have you ever had a seizure?		
HEART HEALTH QUESTIONS ABOUT YOUR FAMILY	Yes	No
11. Has any family member or relative died of heart problems or had an unexpected or unexplained sudden death before age 35 years (including drowning or unexplained car crash)?		
12. Does anyone in your family have a genetic heart problem such as hypertrophic cardiomyopathy (HCM), Marfan syndrome, arrhythmogenic right ventricular cardiomyopathy (ARVC), long QT syndrome (LQTS), short QT syndrome (SQTS), Brugada syndrome, or catecholaminergic poly-morphic ventricular tachycardia (CPVT)?

### PHYSICAL EXAMINATION

(Physical examination must be performed on or after April 1 by a health care professional holding an unlimited license to practice medicine, a nurse practitioner or a physician assistant to be valid for the following school year.) Rule 3-10.

Name \_\_\_\_\_\_ Date of Birth \_\_\_\_\_ Grade \_ Valid April 1, 2023-May 31, 2024 IHSAA Member School . PHYSICIAN REMINDERS 1. Consider additional questions on more sensitive issues • Do you feel stressed out or under a lot of pressure? • Do you ever feel sad, hopeless, depressed, or anxious? • Do you feel safe at your home or residence? • Have you ever tried cigarettes, chewing tobacco, snuff, or dip? • During the last 30 days, did you use chewing tobacco, snuff, or dip? • Do you drink alcohol or use any other drugs? • Have you ever taken anabolic steroids or use any other appearance/performance supplement? • Have you ever taken any supplements to help you gain or lose weight or improve your performance? • Do you wear a seat belt, use a helmet, and use condoms? 2. Consider reviewing questions on cardiovascular symptoms (questions 5-14) **EXAMINATION** Weight Height ☐ Male ☐ Female Vision R 20/ Corrected? MEDICAL NORMAL ABNORMAL FINDINGS Appearance • Marfan stigmata (kyphoscoliosis, high-arched palate, pectus excavatum, arachnodactyly, arm span > height, hyperlaxity, myopia, MVP, aortic insuffiency Eyes/ears/nose/throat • Pupils equal Hearing Lymphnodes Heart • Murmurs (auscultation standing, supine, +/- Valsalva) • Location of point of maximal impuluse (PMI) Pulses Simultaneous femoral and radial pulses Lungs Abdomen Genitourinary (males only) Skin HSV, lesions suggestive of MRSA, tinea corporis Neurologic MUSCULOSKELETAL NORMAL ABNORMAL FINDINGS NORMAL ABNORMAL FINDINGS Neck Knee Back Leg/ankle Shoulder/arm Foot/toes Elbow/forearm Functional Duck-walk, single Wrist/hand/fingers leg hop Hip/thigh ☐ Cleared for all sports without restriction ☐ Cleared for all sports without restriction with recommendations for further evaluation or treatment for ☐ Not cleared Pending further evaluation For any sports Reason Recommendations I have examined the above-named student and completed the preparticipation physical evaluation. The athlete does not present apparent clinical contraindications to practice and participate in the sport(s) as outlined above. A copy of the physical exam is on record in my office and can be made available to the school at the request of the parents. If conditions arise after the athlete has been cleared for participation, the physician may rescind the clearance until the problem is resolved and the potential consequences are completely explained to the athlete (and parents/guardians). Name of Health Care Professional (print/type) Signature of Health Care Professional , MD, DO, PA, or NP (Circle one)

### PREPARTICIPATION PHYSICAL EVALUATION IHSAA ELIGIBILITY RULES

#### **INDIVIDUAL ELIGIBILITY RULES (Grades 9 through 12)**

ATTENTION ATHLETE: Your school is a member of the IHSAA and follows established rules. To be eligible to represent your school in interschool athletics, you:

- must be a regular bona fide student in good standing in the school you represent; must have enrolled not later than the fifteenth day of the current semester.
- 2. must have completed 10 separate days of organized practice in said sport under the direct supervision of the high school coaching staff preceding date of participation in interschool contests. (Excluding Girls Golf SeeRule 101)
- 3. must have received passing grades at the end of their last grading period in school in at least seventy percent (70%) of the maximum number of full credit subjects (or the equivalent) that a student can take and must be currently enrolled in at least seventy percent (70%) of the maximum number of full credit subjects (or the equivalent) that a student can take. Semester grades take precedence.
- 4. must not have reached your twentieth birthday prior to or on the scheduled date of the IHSAA State Finals in a sport.
- 5. must have been enrolled in your present high school last semester or at a junior high school from which your high school receives its students . . .
  - ... unless you are entering the ninth grade for the first time.
  - ... unless you are transferring from a school district or territory with a corresponding bona fide move on the part of your parents.
  - ... unless you are a ward of a court; you are an orphan, you reside with a parent, your former school closed, your former school is not accredited by the state accrediting agency in the state where the school is located, your transfer was pursuant to school board mandate, you attended in error a wrong school, you transferred from a correctional school, you are emancipated, you are a foreign exchange student under an approved CSIET program. You must have been eligible from the school from which you transferred.
- 6. must not have been enrolled in more than eight consecutive semesters beginning with grade 9.
- 7. must be an amateur (have not participated under an assumed name, have not accepted money or merchandise directly or indirectly for athletic participation, have not accepted awards, gifts, or honors from colleges or their alumni, have not signed a professional contract).
- 8. must have had a physical examination between April 1 and your first practice and filed with your principal your completed Consent and Release Certificate.
- 9. must not have transferred from one school to another for athletic reasons as a result of undue influence or persuasion by any person or group.
- 10. must not have received in recognition of your athletic ability, any award not approved by your principal or the IHSAA.
- 11. must not accept awards in the form of merchandise, meals, cash, etc.
- 12. must not participate in an athletic contest during the IHSAA authorized contest season for that sport as an individual or on any team other than your school team. (See Rule 15-1a) (Exception for outstanding student-athlete See Rule 15-1b)
- 13. must not reflect discredit upon your school nor create a disruptive influence on the discipline, good order, moral or educational environment in your school.
- 14. students with remaining eligibility must not participate in tryouts or demonstrations of athletic ability in that sport as a prospective post-secondary school student-athlete. Graduates should refer to college rules and regulations before participating.
- 15. must not participate with a student enrolled below grade 9.
- 16. must not, while on a grade 9 junior high team, participate with or against a student enrolled in grade 11 or 12.
- 17. must, if absent five or more days due to illness or injury, present to your principal a written verification from a physician licensed to practice medicine, stating you may participate again. (See Rule 3-11 and 9-14.)
- 18. must not participate in camps, clinics or schools during the IHSAA authorized contest season. Consult your high school principal for regulations regarding out-of-season and summer.
- 19. girls shall not be permitted to participate in an IHSAA tournament program for boys where there is an IHSAA tournament program for girls in that sport in which they can qualify as a girls tournament entrant.

This is only a brief summary of the eligibility rules.

You may access the IHSAA Eligibility Rules (By-Laws) at <a href="https://www.ihsaa.org">www.ihsaa.org</a>
Please contact your school officials for further information and before participating outside your school.

# North Montgomery Schools CONCUSSION INFORMATION SHEET

This sheet has information to help protect your children or teens from concussion or other serious brain injury. Use this information at your children's or teens' games and practices to learn how to spot a concussion and what to do if a concussion occurs.

#### WHAT IS A CONCUSSION?

A concussion is a type of traumatic brain injury—or TBI—caused by a bump, blow, or jolt to the head or by a hit to the body that causes the head and brain to move quickly back and forth. This fast movement can cause the brain to bounce around or twist in the skull, creating chemical changes in the brain and sometimes stretching and damaging the brain cells.

CONCUSSION?

As a parent, if y concussion, you concussion in the brain and sometimes in jury.

#### **HOW CAN I SPOT A POSSIBLE CONCUSSION?**

Children and teens who show or report one or more of the signs and symptoms listed below—or simply say they just "don't feel right" after a bump, blow, or jolt to the head or body—may have a concussion or other serious brain injury.

#### SIGNS OBSERVED BY PARENTS OR COACHES

- Appears dazed or stunned.
- Forgets an instruction, is confused about an assignment or position, or is unsure of the game, score, or opponent.
- Moves clumsily.
- Answers questions slowly.
- Loses consciousness (even briefly).
- Shows mood, behavior, or personality changes.
- Can't recall events prior to or after a hit or fall.

#### SYMPTOMS REPORTED BY CHILDREN AND TEENS

- Headache or "pressure" in head.
- Nausea or vomiting.
- Balance problems or dizziness, or double or blurry vision.
- Bothered by light or noise.
- Feeling sluggish, hazy, foggy, or groggy.
- Confusion, or concentration or memory problems.
- Just not "feeling right," or "feeling down."

# WHAT ARE SOME MORE SERIOUS DANGER SIGNS TO LOOK OUT FOR?

In rare cases, a dangerous collection of blood (hematoma) may form on the brain after a bump, blow, or jolt to the head or body and can squeeze the brain against the skull. Call 9-1-1 or take your child or teen to the emergency department right away if, after a bump, blow, or jolt to the head or body, he or she has one or more of these danger signs:

- One pupil larger than the other.
- Drowsiness or inability to wake up.
- A headache that gets worse and does not go away.
- Slurred speech, weakness, numbness, or decreased coordination.
- Repeated vomiting or nausea, convulsions or seizures (shaking or twitching).
- Unusual behavior, increased confusion, restlessness, or agitation.
- Loss of consciousness (passed out/knocked out). Even a brief loss of consciousness should be taken seriously.

# WHAT SHOULD I DO IF MY CHILD OR TEEN HAS A POSSIBLE CONCUSSION?

As a parent, if you think your child or teen may have a concussion, you should:

- 1. Remove your child or teen from play.
- Keep your child or teen out of play the day of the injury. Your child or teen should be seen by a healthcare provider and only return to play with permission from a health care provider who is experienced in evaluating for concussion.
- Ask your child's or teen's health care provider for written instructions on helping your child or teen return to school. You can give the instructions to your child's or teen's school nurse and teacher(s) and return-to-play instructions to the coach and/or athletic trainer.

Do not try to judge the severity of the injury yourself. Only a health care provider should assess a child or teen for a possible concussion. Concussion signs and symptoms often show up soon after the injury. But you may not know how serious the concussion is at first, and some symptoms may not show up for hours or days. The brain needs time to heal after a concussion. A child's or teen's return to school and sports should be a gradual process that is carefully managed and monitored by a health care provider.

#### HOW CAN I HELP KEEP MY CHILDREN OR TEENS SAFE?

Sports are a great way for children and teens to stay healthy and can help them do well in school. To help lower your children's or teens' chances of getting a concussion or other serious brain injury, you should:

- Help create a culture of safety for the team.
  - Work with their coach to teach ways to lower the chances of getting a concussion.
  - Talk with your children or teens about concussion and ask if they have concerns about reporting a concussion. Talk with them about their concerns; emphasize the importance of reporting concussions and taking time to recover from one.
  - Ensure that they follow their coach's rules for safety and the rules of the sport.
  - Tell your children or teens that you expect them to practice good sportsmanship at all times
- When appropriate for the sport or activity, teach your children or teens that they must wear a helmet to lower the chances of the most serious types of brain or head injury. However, there is no "concussionproof" helmet. So, even with a helmet, it is important for children and teens to avoid hits to the head.

#### SUDDEN CARDIAC ARREST

#### **WARNING SIGNS**

There may not be any noticeable symptoms before a person experiences loss of consciousness and a full cardiac arrest (no pulse and no breathing).

Warning signs can include a complaint of:

- Chest Discomfort
- **Unusual Shortness of Breath**
- Racing or Irregular Heartbeat
- Fainting or Passing Out

#### **EMERGENCY SIGNS - Call EMS (911)**

If a person experiences any of the following signs, call EMS (911) immediately:

- If an athlete collapses suddenly during competition
- If a blow to the chest from a ball, puck or another player precedes an athlete's complaints of any of the warning signs of sudden cardiac arrest
- If an athlete does not look or feel right and you are just not sure

#### **FACTS for STUDENTS ATHLETES**

Sudden cardiac arrest can occur even in athletes who are in peak shape. Approximately 500 deaths are attributed to sudden cardiac arrest in athletes each year in the United States. Sudden cardiac arrest can affect all levels of athletes, in all sports, and in all age levels. The majority of cardiac arrests are due to congenital (inherited) heart defects. However, sudden cardiac arrest can also occur after a person experiences experiences an illness which has caused an inflammation to an illness which has caused an inflammation to the heart or after a direct blow to the chest. Once a cardiac arrest occurs. there is very little time to save the athlete, so identifying those at risk before the arrest occurs is a key factor in prevention.

#### How can I help prevent a sudden cardiac arrest?

Daily physical activity, proper nutrition, and adequate sleep are arrest by: all important aspects of lifelong health. Additionally, you can assist by:

- Knowing if you have a family history of sudden cardiac arrest (onset of heart disease in a family member before the age of 50 or a sudden, unexplained death at an early age)
- Telling your health care provider during your preseason physical about any unusual symptoms of chest discomfort, shortness of breath, racing or irregular heartbeat, or feeling faint, especially if you feel these symptoms with physical activity
- Taking only prescription drugs that are prescribed to you by your health care provider
- Being aware that the inappropriate use of prescription medications or energy drinks can increase your risk
- Being honest and reporting symptoms of chest discomfort, unusual shortness of breath, racing or irregular heartbeat, or feeling faint

### What should I do if I think I am developing warning signs that may lead to sudden cardiac arrest?

- 1. Tell an adult your parent or guardian, your coach, your athletic trainer or your school nurse
- 2. Get checked out by your health care provider
- 3. Take care of your heart
- 4. Remember that the most dangerous thing you can do is to do nothing

#### **FACTS for PARENTS**

Sudden cardiac arrest is a rare, but tragic event that claims the lives of approximately 500 athletes each year in the United States. Sudden cardiac arrest can affect all levels of athletes, in all sports, and in all age levels. The majority of cardiac arrests are due to congenital (inherited) heart defects. However, sudden cardiac arrest can also occur after a person the heart or after a direct blow to the chest.

### How can I help my child prevent a sudden cardiac arrest?

Daily physical activity, proper nutrition, and adequate sleep are all important aspects of lifelong health. Additionally, parents can assist student athletes prevent a sudden cardiac

- Ensuring your child knows about any family history of sudden cardiac arrest (onset of heart disease in a family member before the age of 50 or a sudden, unexplained death at an early age)
- Ensuring your child has a thorough preseason screening exam prior to participation in an organized athletic activity
- Asking if your school and the site of competition has an automatic defibrillator (AED) that is close by and properly maintained
- Learning CPR yourself
- Ensuring your child is not using any non-prescribed stimulants or performance enhancing drugs
- Being aware that the inappropriate use of prescription medications or energy drinks can increase risk
- Encouraging your child to be honest and report symptoms of chest discomfort, unusual shortness of breath, racing or irregular heartbeat, or feeling faint

### What should I do if I think my child has warning signs that may lead to sudden cardiac arrest?

- 1. Tell your child's coach about any previous events or family history
- 2. Keep your child out of play
- 3. Seek medical attention right away
