

TARGETED INTERVENTION FOR STUDENT SUCCESS

The Indian River School District believes that all students should be provided a high quality, scientific, research-based education; and, when needed, additional strategic interventions at increasing levels of intensity aligned to student needs. In order to meet the diverse needs of all learners, the district recognizes the core components of the Delaware Department of Education's Multi-Tiered System of Support (MTSS) as a valuable process.

In accordance with MTSS guidance from the Delaware Department of Education and Section 12 of Title 14 of the Delaware Administrative Code, the district has established Targeted Intervention for Student Success (TISS) as a district-wide system of providing high quality, researched-based interventions to students needing additional support.

Adopted 5/23/16
Revised 8/26/19, 3/27/23
